Important Notice

This Confidential Discussion Material (this "Material") outlines certain characteristics of a proposed collateralized debt obligation transaction ("CDO"). This Material is presented solely for purposes of discussion to assist prospective investors in determining whether they have a preliminary interest in investing in a transaction with the general characteristics described herein. This transaction is in a structuring phase and there may be material changes to the structure, terms and assets prior to the offering of any securities (the "Securities").

This Material is not an offer to sell, or a solicitation to buy, the Securities or any other investment. Any such offering of the Securities will only be made pursuant to a final offering circular relating to the Securities (the "Offering Circular"), which will contain material information not contained herein and to which the prospective purchasers are directed. In the event of any such offering, this Material will be deemed superseded, amended and supplemented in its entirety by the Offering Circular (including any preliminary version thereof).

This Material is confidential and proprietary to Merrill Lynch, Pierce, Fenner & Smith, Incorporated and its affiliates (collectively, "Merrill Lynch") and, accordingly, except as described below, this Material is to be treated as strictly confidential and not disclosed directly or indirectly to any party other than the recipient and its advisers or used for any purpose other than to make a preliminary analysis of the Securities. Notwithstanding the foregoing, recipients of this Material and each employee, representative or other agent of any such recipient may disclose to any and all persons, without limitation of any kind, the U.S. federal income tax treatment and tax structure of the CDO issuer and all materials of any kind, including opinions or other tax analyses, that are provided to the recipients relating to such tax treatment and tax structure. This authorization to disclose such tax treatment and tax structure does not permit disclosure of information identifying the CDO issuer, the investment adviser, the collateral manager or any other party or the pricing (except to the extent pricing is relevant to tax structure or tax treatment) of the CDO.

No person has been authorized to give any information or make any representations other than the information contained herein, as amended and superseded by the information contained in the Offering Circular relating to the eventual offering, if any, of the Securities. The Securities described herein, if offered, will not be registered with the U.S. Securities and Exchange Commission. This document may not be disseminated other than (1) within the United States of America, to investors that are (A)(i) "qualified institutional buyers" (as defined in Rule 144A under the U.S. Securities Act of 1933, as amended (the "Securities Act") or (ii) "accredited investors" within the meaning of Rule 501(a) under the Securities Act and, in each case, who are also (B)(i) "qualified purchasers" within the meaning of Section 3(c)(7) of the U.S. Investment Company Act of 1940, as amended, ("Investment Company Act") or (ii) "knowledgeable employees" with respect to the issuer of the Securities within the meaning of Rule 3c-5 promulgated under the Investment Company Act and (2) outside the United States of America, to non-U.S. persons in offshore transactions in reliance on Regulation S under the Securities Act. The offer or sale of the Securities may be further restricted by law and the restrictions set forth in the Offering Circular. Potential investors are required to inform themselves of and to observe any legal restrictions on their involvement in the transaction. Additional net worth and/or sophistication requirements may be required of individual non-US persons. Application will be made to list the Securities on the Irish Stock Exchange Limited ("Irish Stock Exchange"). There can be no assurance that listing on the Irish Stock Exchange will be granted.

Prospective investors should not construe this Material, the Offering Circular or any prior or subsequent communication as legal, accounting or tax advice. Certain information herein is presented in summary form and is not complete. In addition, certain information contained herein has been provided by third parties and has not been independently verified by Merrill Lynch and Merrill Lynch makes no representation or warranty, express or implied, as to the accuracy or the completeness of such information. An investment in the Securities presents substantial risks and investors should be prepared to suffer a loss of their entire investment. Prior to making an investment decision, an investor should conduct such investigations as such investor deems necessary in order to determine if an investment in the Securities offered by the Offering Circular is appropriate and suitable for such investor and should consult such investor's own legal, accounting and tax advisers in order to determine the consequences of an investment in such Securities and to make an independent evaluation of such investment. With respect to Institutional Clients, Merrill Lynch is acting in the capacity of an arm's length contractual counterparty and not in the capacity of a financial advisor or fiduciary.

THE ATTENTION OF POTENTIAL INVESTORS IS DIRECTED TO THE RISK FACTORS AND TAX CONSIDERATIONS WHICH WILL BE DESCRIBED MORE FULLY IN THE OFFERING CIRCULAR TO BE PROVIDED.
Forward Looking Statements: Any projections, forecasts and estimates contained in this Material are forward looking statements and are based upon assumptions. Projections are necessarily speculative in nature, and it can be expected that some or all of the assumptions underlying the projections will not materialize or will vary significantly from actual results. Accordingly, the projections are only an estimate. Actual results will differ and may vary substantially from the projections shown. In addition, certain analyses are based on mathematical models that use hypothetical inputs to calculate results. As with all models, results may vary significantly depending upon the values of the inputs used. Models used in any analysis may be proprietary, making the results difficult for any third party to reproduce. Moreover, hypothetical performance analyses will address only certain aspects of the characteristics of the Securities and will not provide a complete assessment of the results that may follow from all possible contingencies (including default, interest rate and other scenarios and certain economic features of the Securities, including call features and cash flow diversion events). Prospective investors should understand the assumptions used in any analysis and evaluate whether they are appropriate for their purposes. Prospective investors should further consider whether the behavior of these Securities should be tested based on assumptions different from those used to prepare the analyses.

Note to Historical Data: Any historical investment results of any person or entity described in this Material are not indicative of the CDO issuer's future investment results. Such results are intended only to give potential investors information concerning the general experience of the relevant person or entity as an asset manager or adviser and is not intended as a representation or warranty by Merrill Lynch or any other person or entity as to the actual composition of or performance of any future investments that would be made by the CDO issuer. The nature of, and risks associated with, the CDO issuer's future investments may differ substantially from (and will be subject to constraints that were not applicable to) those investments and strategies undertaken historically by such persons and entities. There can be no assurance that the CDO issuer's investments will perform as well as, or in a manner similar to, the past investments of any such persons or entities. For these reasons, there are limitations on the value of the hypothetical illustrations contained herein. This Material is provided to you on the understanding that as a sophisticated investor, you will understand and accept its inherent limitations, will not rely on it in making any investment decision with respect to any Securities that may be issued, and will use it only for the purpose of discussing with Merrill Lynch your preliminary interest in investing in a transaction of the type described.

Potential investors are urged to conduct their own investigation regarding the underlying asset classes, including reviewing any sources cited herein and obtaining additional information regarding the underlying collateral.

For UK investors only: This document has been approved for distribution in the UK by Merrill Lynch International, which is regulated by the Securities and Futures Association. The securities described herein are not available in the UK to private investors as defined by the Securities and Futures Association. This document is only communicated to, and is directed at, (a) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (the “Order”), (b) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(2)(a)-(d) of the Order or (c) any client of Merrill Lynch International Bank Limited (or any UK affiliate) who are either an “intermediate customer” or “market counterparty” for the purposes of the FSA Handbook, all such persons together being referred to as “relevant persons”. In addition to being an intermediate customer, an investor must also have at least US$5 million (or equivalent) in net investments. This document must not be acted on or relied on by persons who are not relevant persons”. Any investment or investment activity to which this document relates is only available to relevant persons.

THE ATTENTION OF POTENTIAL INVESTORS IS DIRECTED TO THE RISK FACTORS AND TAX CONSIDERATIONS WHICH WILL BE DESCRIBED MORE FULLY IN THE OFFERING CIRCULAR TO BE PROVIDED.

1. Executive Summary
Transaction Summary

- E*TRADE ABS CDO III, Ltd. ("E*TRADE") plans to issue $[302.8] MM ABS CDO securities (the "Offered Securities"). E*TRADE ABS CDO III, Ltd. is a newly formed collateralized debt obligation ("CDO") that will be managed by E*TRADE Global Asset Management, Inc. ("ETGAM" or the "Collateral Manager").

- The Offered Securities will be backed by a portfolio consisting primarily of Residential Mortgage Backed Securities ("RMBS"), Commercial Mortgage Backed Securities ("CMBS"), CDOs, Consumer and Commercial Asset-Backed Securities ("ABS"), and together with (RMBS and CMBS as "Structured Finance Securities"), and CDOs.(1)

- Structured Finance Securities, have historically exhibited lower default rates, higher recovery rates upon default and better stability when compared to corporate bonds with similar ratings.(2)

- E*TRADE ABS CDO III, Ltd. will issue the following five classes of Offered Securities:

---

**Assets held by CDO**

- RMBS, ABS, CMBS, REIT & CDOs

**Securities issued by CDO**

- $37.75 MM Class A1 Aaa/AAA/Aaa (Moody's/S&P/Fitch)
- $37.90 MM Class B Aaa/AAA/Aaa (Moody's/S&P/Fitch)
- $13.25 MM Class C Baa2/BBB/BBB (Moody's/S&P/Fitch)
- $12.90 MM Preference Shares Ba1/BB+ (Moody's/S&P)
- $14.80 MM Composite Shares I Baa2/BBB (Moody's/S&P)
- $6.00 MM Class A1 Ba1 (Moody's)

---

(1) See E*TRADE ABS CDO III, Ltd. Portfolio-Portfolio Assumptions.
2. Asset Class Selection
Structured Finance Market Overview

Historical Defaults (1)

The Offered Securities will be backed by a pool of assets that consists primarily of "Baa" rated Structured Finance Securities

- RMBS one-year average default rate (1993 - 2002) ~0.1% (2)
- CMBS one-year average default rate (1993 - 2002) ~0.1% (3)
- ABS one-year average default rate (1993 - 2002) ~0.2% (4)

(2) This number denotes the total number of material impairments in RMBS (excluding deals originated from the mortgage lender "Quality Mortgage", which will not originate any of the underlying mortgages in the E-TRADE ABS CDO III) as a percentage of the sample of 4,285 rated RMBS analyzed in the study.
(3) This number denotes the total number of material impairments in CMBS as a percentage of the sample of 2,634 rated CMBS analyzed in the study.
(4) This number denotes the total number of material impairments in ABS (excluding Franchise Loan and Manufactured Housing Securities from 1993-2002, which are prohibited securities in the E-TRADE ABS CDO III) as a percentage of the total number of the 6,522 rated ABS analyzed in the sample.
Structured Finance Market Overview

Historical Recovery Rates of Structured Finance Securities *(1)(2)(3)*

- A Moody’s study on recovery rates of ABS, RMBS and CMBS collateral has concluded the following:
  - Historically, RMBS have recovered at a greater rate than that of corporate bonds and CMBS have recovered at more than twice the rate of corporate bonds.
  - Compared to corporate securities, ABS, RMBS, and CMBS may receive more substantial cashflow in respect of interest and principal after a default.

<table>
<thead>
<tr>
<th>Average Recoveries of Defaulted RMBS</th>
<th>55% <em>(1)</em></th>
</tr>
</thead>
<tbody>
<tr>
<td>Average Recoveries of Defaulted CMBS</td>
<td>100% <em>(1)(4)</em></td>
</tr>
<tr>
<td>Average Recoveries of Defaulted Other ABS</td>
<td>59% <em>(1)</em></td>
</tr>
</tbody>
</table>

In contrast, the average recovery rate for corporate bonds from 1982-2003 is approximately 43% *(5)*.

---

*(3)* Certain of the information contained has been obtained from third-party sources and neither Merrill Lynch nor any of its affiliates makes any representation or warranty, express or implied as to the accuracy or the completeness of such information. Certain of the information is presented in summary form. Potential Investors are urged to conduct their own investigation regarding the underlying asset class including reviewing any sources cited herein and obtaining additional information regarding the underlying collateral. The data discussed in this Overview relates only to historical investment performance. Future investment performance may vary. See “Important Notice”.

*(4)* Loans on defaulted structured finance securities accumulate gradually over time. The information above is limited to those (84 in total) defaulters in the sample study that ceased making their payments (paid down or written down defaulters). Among the 84 defaulters that have had zero outstanding balances, four were from CMBS, all of which were cured before their last payment date, and hence suffered zero lifetime cumulative losses.

### Structured Finance Market Overview

#### Rating Stability (1)(2)

According to a recent Moody's study, the long-term historical average (1983–2003) of unchanged ratings of Structured Finance Securities(3) was 92.3%, which compares favorably to the 76.6% average of unchanged ratings of corporate bonds for the same period.

## Collateral Profile

- Maximum Single Issue Concentration: 2.00%
- Maximum Single Servicer Concentration: 7.5% \(^{(5)}\)
- Minimum Diversity Score: 15
- Maximum Average Rating Score: 340 (Baa1/Baa2)
- Expected Fixed Collateral: 18.0%
- Weighted Average Fixed Coupon: 5.22%
- Weighted Average Floating Spread: 2.15%
- Maximum Weighted Average Life: 6.0 Years

\(^{(1)}\) All the information shown on this page is for illustrative purposes only. The transaction is at a structuring phase, and the actual structure of the transaction and characteristics of the offered securities may differ from those presented herein. Definitions and other terms will be fully described in the Offering Circular. It is understood that the "Collateral Profile" would apply on and after the the ramp-up completion date.

\(^{(2)}\) Merrill Lynch may, but is not obligated to make a market in the Offered Securities.

\(^{(3)}\) Please see "Transaction Highlights - Structuring Assumptions" for a description of modeling assumptions. Based on an auction call in 10 years from closing.

\(^{(4)}\) There may be some exceptions.

\(^{(5)}\) With some exceptions (yet to be determined).
Transaction Highlights

Advantages of Deleveraging

Benefits of the RAPID Structure

Class A1 Notes Early Principal Paydown

- From the inception of the transaction, principal paydowns on the underlying collateral will be used to pay down the Class A1 Notes.

Class C Notes Early Principal Paydown

- Returns on Preference Shares will be capped at 16.0% until Class C Notes are fully amortized. Excess interest proceeds will be used to fully amortize the Class C (Baa2/BBB/BBB) Notes from the initial distribution date.

Benefits to Class A1 Noteholders

- Principal payments are expected upon the first distribution date
- Build up of overcollateralization levels

Benefits to Class C Noteholders

- Expected average life of the Class C (Baa2/BBB/BBB) Notes will be shorter as a result
- Build up of overcollateralization levels
## Transaction Highlights

Future market and economic conditions are impossible to predict. Future market or economic conditions that materially differ from those on which the assumptions are based may have a negative impact on the performance of E*TRADE ABS CDO III, Ltd. For these reasons, there are limitations on the value of this or any hypothetical illustration. This information is not intended to be either an express or implied guaranty of investment performance.

---

1. Break in yield is the default rate at which the first dollar loss in principal occurs, and 0% Yield is the default rate at which total cashflow received does not equal initial investment.
2. Assumes no default lag, 60% immediate recoveries and forecasted LIBOR.
3. Please see "Transaction Highlights – Structuring Assumptions" for a description of modeling assumptions.
4. All the information shown on this page is for illustrative purposes only. The transaction is at a structuring phase, and the actual structure of the transaction and characteristics of the offered securities may differ from those presented herein. Definitions and other terms will be fully described in the Offering Circular. It is contemplated that the "Collateral Profile" would apply as and after the the ramp-up completion date.

(1) These assumptions are general and are not conclusive or exhaustive. Actual collateral characteristics may be different from these assumed and even if they are the same on a weighted average basis, the use of individual securities in the actual CDO structure may substantially change the results indicated. None of the assumptions contained herein are meant to be historical descriptions nor predictors of future performance. In addition, certain of the assumptions contained herein have been made for modeling purposes and it is unlikely that such assumptions will in fact be realized. No representation or warranty is made by Merrill Lynch or E*TRADE Global Asset Management as to the reasonableness of such assumptions or as to any other financial information contained in such models (including the assumptions on which they are based). These assumptions have certain inherent limitations, and will be affected by any changes in the structure or assets for this transaction. As a sophisticated investor, you should review each assumption carefully and make your own determination as to its accuracy or reasonableness. Actual collateral characteristics may be different from those assumed and even if they are the same on a weighted average basis, the use of individual securities in the actual CDO structure may substantially change the results indicated. No representation is made that such assumptions are accurate or complete or do not contain errors, or that alternative modeling techniques or assumptions would not be more appropriate or produce significantly different results. The attached material is provided to you on the understanding that as a sophisticated investor, you will understand and accept its inherent limitations, will not rely on it in making any investment decision with respect to any securities that may be issued, and will use it only for the purpose of discussing with Merrill Lynch your preliminary interest in investing in a transaction of the type described. Any investor should rely only upon the final offering materials for the definitive conditions and terms of the offering. Neither Merrill Lynch nor E*TRADE Global Asset Management assumes any responsibility for the accuracy or validity of the results of such models.

(2) Calculated on the outstanding collateral balance as of the first day of each period.

(3) Subject to change. "Initial" represents expected characteristics of target portfolio.

(4) On the Closing Date, the Co-issuers will use a portion of the gross proceeds from the offering to pay various fees and expenses, including expenses, fees and commissions incurred in connection with the acquisition of the Collateral, structuring and placement agency fees payable to Merrill Lynch and legal, accounting, rating agency and other fees. Fees payable to Merrill Lynch and others will be determined on an arm's length basis. Closing fees and expenses reduce the amount of the gross proceeds of the offering available to purchase Collateral and, therefore, the return to purchasers of the Securities. Rating agencies will consider the amount of net proceeds available to purchase Collateral in determining any ratings assigned to them in the Securities. For information about the amount of such fees and expenses, please review the final Offering Circular before investing.
Transaction Highlights
Transaction Analysis

Preference Share Return (IRR) (1) (2) (3)

- Assuming every year of the transaction experiences 0.5% default rate, which is approximately 2.5 times the average one-year default rate for ABS and RMBS Securities, the Preference Share return would be approximately [13.8]% (1).
- Assuming every year of the transaction experiences 1.00% default rate, which is approximately 5 times the average annual default rate for ABS and RMBS Securities, the Preference Share return would be approximately [10.4]% (1).

Future market and economic conditions are impossible to predict. Future market or economic conditions that materially differ from those on which the assumptions are based may have a negative impact on the performance of E*TRADE ABS CDO III, Ltd. For these reasons, there are limitations on the value of this or any hypothetical illustration. This information is not intended to be either an express or implied guaranty of investment performance.

(1) Please see page entitled "Transaction Highlights - Structuring Assumptions" for a description of modeling assumptions.
(2) Scenario assumptions: Annual defaults begin immediately at "Stated Default Rate." Recovery Assumptions: 60%.
100% of the equity principal is returned at call date. There are no call premiums assumed. There is a 10% equity cap for the life of the CDO, excess will be used to pay down Class C Notes.
(3) All information shown is for illustrative purposes only, actual results may vary. See "Important Notice."

Risk Factors

An investment in the Securities described in this Information, if such offering is consummated, will involve certain risks. Set forth below is a summary description of certain of the risks to which an investor in the Securities would be subject. A detailed list of risk factors will be included in the Offering Circular (including the preliminary and final versions thereof). An investor should not make any decision to invest in the Securities until after such investor has had an opportunity to read and review carefully the Offering Circular.

**Limited Liquidity.** There is currently no market for the Offered Securities. Although Merrill Lynch may from time to time make a market in any class of Offered Securities, it is under no obligation to do so. In the event that Merrill Lynch commences any market-making, it may discontinue the same at any time. There can be no assurance that a secondary market for any of the Offered Securities will develop, or if a secondary market does develop, that it will provide the holders of such Offered Securities with liquidity of investment or that it will continue for the life of the Offered Securities. In addition, the Offered Securities are subject to transfer restrictions and can only be transferred to certain transferees. Consequently, an investor in the Offered Securities must be prepared to hold its Offered Securities for an indefinite period of time.

**Limited-Recourse Obligations.** The Notes will be limited-recourse obligations of the co-issuers, payable solely from the collateral pledged by the issuer to secure the Notes. None of the security holders, members, officers, directors, managers or incorporators of the issuer, the co-issuer, the trustee, the administrator of the issuer, the Collateral Manager, Merrill Lynch, any of their respective affiliates and any other person or entity will be obligated to make payments on the Notes. Consequently, the holders of the Notes must rely solely on amounts received in respect of the collateral for the payment of principal thereof and interest thereon. There can be no assurance that the distributions on the collateral pledged by the issuer to secure the Notes will be sufficient to make payments on any class of Notes, in particular after making payments on more senior classes of Notes and certain other required amounts ranking senior to such Notes. The issuer's ability to make payments in respect of any Class of Notes will be constrained by the terms of the Notes of classes more senior to such class and the indenture. If distributions on the collateral are insufficient to make payments on the Notes, no other assets will be available for payment of the deficiency and, following liquidation of all of the collateral, the obligations of the co-issuers to pay such deficiencies will be extinguished.

**Payments in respect of the Preference Shares.** The issuer will pledge substantially all of its assets to secure the Notes and certain other obligations pursuant to the indenture. The proceeds of such assets will only be available to make payments in respect of the Preference Shares as and when such proceeds are released from the lien of the indenture in accordance with the priority of payments that will be set forth therein. There can be no assurance that, after payment of principal and interest on the Notes and other fees and expenses of the co-issuers in accordance with such priority of payments, the issuer will have funds remaining to make distributions in respect of the Preference Shares.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular. The attention of potential investors is drawn to the risk factors which are described in the Offering Circular to be provided.
Risk Factors

Subordination of Each Class of Subordinate Notes. No payment of interest on any class of Notes will be made until all accrued and unpaid interest on the notes of each class that is senior to such class and that remain outstanding has been paid in full. Except as otherwise described in, and subject to, the priority of payments that will be set forth in the offering circular, no payment of principal of any class of Notes will be made until all principal of, and all accrued and unpaid interest on the Notes of each class that is senior to such class and that remain outstanding have been paid in full. If an event of default occurs, so long as any Notes are outstanding, the holders of the most senior class of Notes then outstanding will be entitled to determine the remedies to be exercised under the indenture. It is anticipated that so long as any Class A and Class B Notes are outstanding, the failure on any payment date to make payment in respect of interest on the Class C Notes will not constitute an event of default under the indenture and such interest will be deferred and capitalized. Remedies pursued by the holders of the class or classes of Notes entitled to determine the exercise of such remedies could be adverse to the interest of the holders of the other classes of notes. It is anticipated that, to the extent that any losses are suffered by any of the holders of any Offered Securities, such losses will be borne, first, by the holders of the Preference Shares, second, by the holders of the Class C Notes, third, by the holders of the Class B Notes, and fourth, by the holders of the Class A Notes.

Volatility of the Preference Shares. The Preference Shares represent a leveraged investment in the underlying collateral. Therefore, it is expected that changes in the value of the Preference Shares will be greater than the change in the value of the underlying collateral, which will be subject to credit, liquidity, interest rate and other risks. Utilization of leverage is a speculative investment technique and involves certain risks to investors. The indebtedness of the issuer under the Notes will result in interest expense and other costs incurred in connection with such indebtedness that may not be covered by proceeds received from the Collateral. The use of leverage generally magnifies the issuer's opportunities for gain and risk of loss.

Nature of Collateral. The collateral will be subject to credit, liquidity, interest rate, market, fraud, operations and structural risk. The amount and nature of the collateral securing the Notes will be established with a view to withstanding certain assumed deficiencies in payment occasioned by defaults in respect of the securities included in the collateral. If any deficiencies exceed such assumed levels, however, payments on the Notes and distributions on the Preference Shares could be adversely affected. To the extent that a default occurs with respect to any security included in the collateral, it is not likely that the issuer will receive the full amount of principal and interest owing to the issuer in respect of such security. The market value of the collateral generally will fluctuate with, among other things, the financial condition of the obligors on or issuers of the securities included in the collateral, the remaining term thereof to maturity, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates.

It is currently anticipated that 75% of the collateral will have been purchased by the closing date. The issuer expects that it will have purchased 100% of the collateral by the ramp-up completion date, and that the collateral will satisfy the coverage tests. However, there can be no assurance that this will occur. Failure to satisfy the coverage tests may result in repayment or redemption of all or a portion of the Notes (in accordance with the priority of payments to be specified in the Offering Circular).

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular. The attention of potential investors is drawn to the risk factors which are described in the Offering Circular to be provided.
Risk Factors

Early Redemption of the Notes. In addition to the risk of early redemption of the Notes discussed in the immediately preceding paragraph, the notes may be subject to early redemption 3 years after the closing date at the election of a majority in interest of the holders of the Preference shares. It is anticipated that if a coverage test is breached, interest proceeds and then principal proceeds will be applied to pay principal on the Notes until the applicable coverage test is met. In addition, it is anticipated that if the Notes have not been paid in full prior to [January 2012], an auction of the collateral will be conducted and subject to satisfaction of certain conditions, will be sold and used to redeem the Notes. The Notes may also be subject to early redemption on the occurrence of certain adverse tax events to be described in the Offering Circular.

Certain Conflicts of Interest. The activities of the Collateral Manager, Merrill Lynch and their respective affiliates may result in certain conflicts of interest.

Conflicts of Interest Involving the Collateral Manager. Various potential and actual conflicts of interest may arise from the overall investment activities of the Collateral Manager and its affiliates for their own accounts or for the accounts of others. The Collateral Manager and its affiliates may invest for their own accounts or for the accounts of others in debt obligations that would be appropriate investments for the issuer and they have no duty, in making such investments, to act in a way that is favorable to the issuer or the holders of the Offered Securities. Such investments may be different from those made on behalf of the issuer. The Collateral Manager and its affiliates may have economic interests in or other relationships with issuers in whose obligations or securities the issuer may invest. In particular, such persons may make and/or hold an investment in securities that may be pari passu, senior or junior in ranking to an investment in securities of the same issuer that are held by the issuer or in which partners, security holders, officers, directors, agents or employees of such persons serve on boards of directors or otherwise have ongoing relationships. Each of such ownership and other relationships may result in securities laws restrictions on transactions in such securities by the issuer and otherwise create conflicts of interest for the Issuer. In such instances, the Collateral Manager and its affiliates may in their discretion, subject to certain restrictions, make investment recommendations and decisions that may be the same as or different from those made with respect to the issuer's investments.

Although the officers and employees of the Collateral Manager will devote as much time to the issuer as the Collateral Manager deems appropriate, the principals and employees may have conflicts in allocating their time and services among the issuer and other accounts advised by the Collateral Manager and/or its affiliates. In addition, the Collateral Manager and its affiliates, in connection with their other business activities, may acquire material non-public confidential information that may restrict the Collateral Manager from purchasing securities or selling securities for itself or its clients (including the Issuer) or otherwise using such information for the benefit of its clients or itself.

The Collateral Manager and any of its affiliates may engage in any other business and furnish investment management and advisory services to others, which may include, without limitation, serving as collateral manager or investment manager for, investing in, lending to, or being affiliated with, other entities organized to issue collateralized bond obligations secured by securities such as those included in the collateral and other trusts and pooled investment vehicles that acquire interests in, provide financing to, or otherwise deal with securities issued by issuers that would be suitable for inclusion in the collateral. The Collateral Manager will be free, in its sole discretion, to make recommendations to others, or effect transactions on behalf of itself or for others, that may be the same as or different from those effected on behalf of the issuer, and the Collateral Manager may furnish investment management and advisory services to others who may have investment policies similar to those followed by the Collateral Manager with respect to the issuer and who may own securities of the same class, or which are the same type as, the securities included in the Collateral.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.
Risk Factors

Although the Collateral Manager or one of its affiliates may at times be a holder of the Offered Securities, its interests and incentives will not necessarily be completely aligned with those of the other holders of the Offered Securities (or of the holders of any particular class of the Notes or of the Preference Shares). Furthermore, although the Collateral Manager is expected to purchase Preference shares, it is not required to maintain minimum holdings in the Preference shares.

Conflicts of Interest Involving Merrill Lynch. Certain of the Collateral Debt Securities acquired or to be acquired by the Issuer will consist of obligations of issuers or obligors, or obligations sponsored or serviced by companies, for which Merrill Lynch or an affiliate thereof has acted as underwriter, agent, placement agent or dealer or for which Merrill Lynch or an affiliate thereof has acted as lender or provided other commercial or investment banking services. Merrill Lynch or an affiliate thereof may structure issuers of Collateral Debt Securities and arrange to place such Collateral Debt Securities with the Issuer. Merrill Lynch or an affiliate thereof may also act as counterparty with respect to one or more Synthetic Securities. In its role as counterparty with respect to Synthetic Securities, Merrill Lynch or one of more of its affiliates may manage a pool of Reference Obligations with respect to the Synthetic Securities and make determinations regarding those Reference Obligations. In addition, an affiliate of Merrill Lynch may act as Hedge Counterparty under one or more Hedge Agreements with the Issuer. Moreover, Merrill Lynch or its affiliates may from time to time enter into derivative transactions with third parties with respect to the Offered Securities or with respect to Collateral Debt Securities acquired by the Issuer, and Merrill Lynch or its affiliates may, in connection therewith, acquire (or establish long, short or derivative financial positions with respect to) Offered Securities, Collateral Debt Securities or one or more portfolios of financial assets similar to the portfolio of Collateral Debt Securities acquired by (or intended to be acquired by) the Issuer. Merrill Lynch, its employees, affiliates and employees of affiliates will receive compensation in connection with the structuring of the CDO and/or distribution of the Securities. These activities may create certain conflicts of interest, and there can be no assurance that the terms on which the Issuer entered into (or enters into) any of the foregoing transactions with Merrill Lynch (or an affiliate thereof) were or are the most favorable terms available in the market at the time from other potential counterparties.

It is anticipated that, in the event that the transaction will include an administrative agency agreement, an affiliate of Merrill Lynch, as administrative agent, would become successor collateral manager, if the Collateral Manager were removed pursuant to the collateral management agreement. If this occurs, such affiliate could experience conflicts of interest similar to those described above with respect to the collateral manager.

Significant Fees Reduce Proceeds Available for Purchase of Collateral Debt Securities. On the Closing Date, the Co-Issuers will use a portion of the gross proceeds from the offering to pay various fees and expenses, including expenses, fees and commissions incurred in connection with the acquisition of the Collateral, structuring and placement agency fees payable to Merrill Lynch and legal, accounting, rating agency and other fees. Fees payable to Merrill Lynch and others will be determined on an arm’s length basis. Closing fees and expenses reduce the amount of the gross proceeds of the offering available to purchase Collateral and, therefore, the return to purchasers of the Securities. Rating agencies will consider the amount of net proceeds available to purchase Collateral in determining any ratings assigned by them to the Securities. For information about the amount of such fees and expenses, please review the final Offering Circular before investing.

Purchase of Collateral Debt Securities. It is anticipated that many of the securities that will be purchased by the issuer on the date on which the Offered Securities are issued will be purchased from one or more portfolios of securities held by affiliates of Merrill Lynch pursuant to separate warehouse agreements between such affiliates of Merrill Lynch and the Collateral Manager. Some of the securities subject to such warehouse agreements may have been originally acquired by Merrill Lynch from the Collateral Manager or one of its Affiliates. The issuer will purchase securities included in such warehouse portfolios only to the extent that such purchases are consistent with the investment guidelines of the issuer, the restrictions contained in the indenture and the collateral management agreement and applicable law. The purchase price payable by the issuer for such securities will be based on the purchase price paid when such securities were acquired under the warehouse agreements, accrued and unpaid interest on such securities as of the date they are acquired by the issuer and gains or losses incurred in connection with hedging arrangements entered into with respect to such securities. Accordingly, it is likely that the issuer will bear the risk of market changes subsequent to the acquisition of such securities and related hedging arrangements pursuant to the warehousing agreements as if it had acquired such securities directly.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.
Risk Factors

Redemption and Diversion of Interest Proceeds. The Securities will be subject to redemption under certain circumstances described in the Offering Circular (including, under certain circumstances, upon the failure of certain financial coverage tests to be satisfied). Any such redemption may cause the economic return from an investment in the Securities to vary from the economic returns that may be modeled in this Information. In addition, the failure to satisfy certain financial coverage tests could result in an elimination, deferral or reduction in the payments to be made to holders of one or more classes of notes or equity securities, which could adversely impact the economic return realized by such holders.

 Auction Call Redemption. If the Notes have not been redeemed in full prior to the Payment Date occurring in [January 2012], then an auction of the Collateral Debt Securities will be conducted and, provided that certain conditions are satisfied, in particular with respect to the sufficiency of anticipated proceeds from the proposed sale of the Collateral Debt Securities, the Collateral Debt Securities will be sold and the Notes will be redeemed on such Payment Date. If such conditions are not satisfied and the auction is not successfully conducted on such Payment Date, the Collateral Manager will conduct auctions on each Payment Date thereafter, however, the Notes will not be redeemed until the conditions are satisfied.

Application of Principal Proceeds. Principal Proceeds from the Collateral Debt Securities, except for sales proceeds that are reinvested during the substitution period in substitute Collateral Debt Securities, will be used to pay principal on the Notes. The timing of receipts of principal on the Collateral Debt Securities with respect to such substitute Collateral Debt Securities will depend on, among other factors, the rate of prepayments on Collateral Debt Securities which may be influenced by the level of interest rates and economic conditions. The Issuers cannot predict the actual rate of principal payments that will be experienced on the Collateral Debt Securities. After the ramp-up completion date, there will be no further purchases made in the portfolio.

Redemption of Class C Notes. If Preference Shareholders have received distributions on the Preference Shares sufficient to achieve a Preference Share Preference Return (as defined herein) of [16.0] during the related calculation period for such Payment Date, any remaining Interest Proceeds will be applied to redeem the Class C Notes. While the anticipated effect of this feature is to accelerate the payment of the Class C Notes, the Issuers cannot predict whether Interest Proceeds received on the Collateral Debt Securities will be sufficient to make such redemptions. Moreover, if the Class C Notes are redeemed sooner than anticipated due to this feature, investors in the Class C Notes may not be able to reinvest the proceeds in investments with the same yield.

CDO of CDOs. The assets held by E*TRADE ABS CDO III, Ltd. ("E*TRADE ABS CDO III") which back the Offered Securities consist of (i) Asset Backed Securities including RMBS, CMBS and (iii) ABS CDOs. The portion of the assets held by E*TRADE III CDO may consist of ABS CDO securities; provided that the securities issued by any one CDO may not exceed [10]% of E*TRADE III CDO's portfolio. As a result, purchasers of the Offered Securities must understand that if they hold debt or equity issued by other CDOs, their credit exposure to such CDOs will increase to the extent securities issued by those CDOs are also included in the assets of E*TRADE III CDO.

Investment in CDO Equity. CDO equity securities are a first loss, leveraged credit position. An investor in a CDO is exposed to a portfolio of diversified credits, but only a portion of those credits need to default (recovery values adjust this range upward) for clients that invest in CDO equity securities to lose 100% of their original investment – hence the leveraged credit position. Client loss is limited to original investment. CDO debt tranche investors effectively loan money to CDO equity investors. Criteria governing an CDO will divert cashflow intended for equity to start paying down debt in the event that certain coverage ratios (over-collateralization and interest coverage tests) are triggered. Collateral deterioration is the cause for these ratios to be triggered. This may result in a cutoff of cashflow to CDO equity securities for some time and potential phantom income tax issues. Equity investors are leveraged. Spread movement in the underlying collateral portfolio will have exaggerated mark-to-market effect on client positions. These cashflows are amortizing in nature, i.e., investors do not normally receive their full principal at maturity. CDO equity returns are projected in terms of the IRR of this stream of cashflows. The earlier cash is received, the higher the IRR will be.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.
5. About the Collateral Manager
A. Introduction to E*TRADE Financial
Mission Statement

To create long term shareholder value through superior financial performance driven by the delivery of an integrated range of innovative, customer-focused financial products and services and supported by an operating culture based on the highest levels of teamwork, efficiency and integrity.

- Strong credit discipline
- Focus on core competencies
- Identify attractive sectors and relative value opportunities
- Invest in high quality assets with stable cash flows and high risk-adjusted returns on a total return basis
- Ongoing surveillance of industry trends and performance of individual securities
ETGAM Research and Credit Process

Investment Process

**Initial Screening**
Portfolio Manager performs initial screening on investment opportunities available in the market

**Due Diligence**
Interview Banker, Issuer/Servicer, Rating Agencies, Site Visit

**Decision**
ETGAM Credit Approval

**Detailed Credit Analysis**
- Sector Analysis
- Collateral Analysis
- Structural Analysis
- Seller/Servicer Analysis
- Stress Analysis

**Surveillance**
Conducted monthly by credit team to monitor each asset in the ABS portfolio
ETGAM Research and Credit Process
Collateral Analysis

Proprietary scoring methodology

- ETGAM's Credit Team employs a proprietary scoring system in order to assess the creditworthiness of the underlying obligors

  - The methodology is based upon a multi-faceted analysis of the collateral “tails”, defined as those groups of loans that have perceived credit weaknesses (for example low FICO combined with high LTV)

  - By cross referencing multiple credit metrics, ETGAM is able to identify weak or over-leveraged borrowers

    - FICO scores are cross-referenced with LTV ratios
    - DTI ratios are cross-referenced with FICO scores
    - LTV, with DTI thresholds, are used to identify stressed loans
    - Loans with small balances are rated as riskier because the fixed costs associated with the foreclosure process generally result in lower recovery rates
    - Additional factors: Documentation Level, Property Type, and Geographic Location

- A collateral score is established by using ETGAM’s proprietary methodology

- Collateral scores are then compared to a database of previously scored deals to ascertain collateral relative strength

- To date, ETGAM Credit has generated a proprietary score for more than 378 deals representing over $420 billion of collateral.
ETGAM Research and Credit Process

Structural and Sensitivity Analysis

- After the deal is scored, internal loss and prepayment curves are generated

- Stress tests are run using the aforementioned curves to assess the structural integrity of the deal
  - Multiple stress analyses are run in Intex using the following variables:
    - Interest rate shocks
    - Prepayment shocks
    - Default and Severity shocks
  - Structural analysis includes a review of the following items:
    - Cash flow waterfall and priority of payments (sequential, pro rata or turbo)
    - Hedging instrument used to protect against interest rate risk
    - Delinquency and Cumulative Loss triggers
    - Available Funds Cap
  - Additionally, ETGAM prefers deals with the following structural features:
    - Fully funded Over-Collateralization
    - High initial Excess Spread
    - Trapping mechanisms that prevent excess spread from leaving the deal if loan performance deteriorates
ETGAM Research and Credit Process

Surveillance

- Review monthly remittance reports for each transaction to monitor performance of the underlying pool, emphasizing available credit enhancement, delinquencies, losses and prepayments
- ETGAM Early Detection Report uses asset specific triggers to spot early indicators of potential performance deterioration
- Maintain internal watchlist of deals with potential credit deterioration
- Monitor rating agency actions
- Monthly ETGAM Credit Committee meeting to review entire portfolio

Ongoing

- Regular contact with servicers, rating agencies, trustees and industry analysts
- Periodic Issuer and Servicer reviews
- Evaluate external research provided by investment banks and ratings agencies to assist in performance evaluation and trade ideas in various sectors
- ETGAM Analysts notify the Credit Committee immediately upon any substantive event (such as ratings changes)

Tools

- Analytics: Intex, Bloomberg, proprietary Security Evaluation Model
- Performance Tracking: Remittance reports, ABSNet, Intex, Bloomberg, Rating Agency reports/models
- Research: Dealer research, Rating Agency research, Bloomberg, SEC filings on Edgar On-line

Note: As of September 30, 2004.
Key Fixed Income Investment Professionals

Biographical Information

Dennis E. Webb, CFA, CPA

Dennis Webb is the CEO of E*TRADE Global Asset Management. He is a member of E*TRADE Financial's Operating Team and is responsible for all investment management activities of ETGAM. These activities include portfolio management for E*TRADE Bank, secondary marketing for E*TRADE Mortgage, funds management for certain E*TRADE mutual funds, and ETGAM's CDO business. Mr. Webb was Chairman of E*TRADE Bank's Asset and Liability Committee (ALCO) and was responsible for the Bank's $15 billion derivative portfolio until he joined ETGAM in June 2001. Prior to joining E*TRADE in 2000, Mr. Webb was the Senior Vice President of Asset/Liability Management of Allfirst Bank, an $18 Billion regional bank based in Baltimore, Maryland. Mr. Webb has nearly 18 years experience in banking and portfolio management. Mr. Webb has a MBA-Finance degree from Johns Hopkins University and a BS in Accounting Information Systems from Virginia Polytechnic Institute and State University. Mr. Webb is a Chartered Financial Analyst and a Certified Public Accountant.

Lance C.A. Ullom

Lance Ullom is a Vice President and Head of Trading for the E*TRADE Global Asset Management Investment Portfolio. He is responsible for all investments in ABS, Corporates, Municipals and Preferred securities as well as ETGAM's CDO Business. Mr. Ullom has held several senior positions in ETGAM during his eight year tenure including Senior Whole Loan Trader and Sr. MBS Portfolio Manager. Prior to joining E*TRADE, Mr. Ullom worked for two years at Arbor Capital, a licensed broker dealer / mortgage hedge fund based in NYC, where he was responsible for trading structured bonds and whole loans. Mr. Ullom worked at Barclay Investments for six years in various capacities from institutional sales to Co-Head of Trading for all mortgage product. Mr Ullom has over 13 years experience in the structured product market. Mr. Ullom received a Bachelors Degree from Franklin Pierce College, majoring in Finance and Business Management.

Sunil Malik

Sunil Malik is a Vice President and Head of trading for the E*TRADE Global Asset Management MBS and Mortgage Loan Investment Portfolio. He is responsible for all investments in Agency MBS, Private-label MBS, Whole Loan Mortgage Conduit, and Secondary Marketing as well as Securitization. Prior to joining the organization, Mr. Malik was Vice President of Treasury and Director of Risk Management of Capital Markets for Ocwen Financial Corporation. Mr. Malik has over 23 years investment experience, 14 years of which were as a portfolio manager for Fannie Mae where he oversaw $25 billion of various fixed income investments. Mr. Malik received his MBA in Finance from Pune University in India, and a BS in Accounting from Delhi University.

(1) There is no guarantee that a specific individual or employee will continue to be employed by ETGAM.
Key Fixed Income Investment Professionals
Biographical Information (cont'd)

J. Laurie Webster, CFA

Laurie Webster is a Vice President and Senior Portfolio Manager for E*TRADE Global Asset Management. She is responsible for the management of the E*TRADE Proprietary Mutual Funds. She and her team directly manage E*TRADE Bond Fund, and E*TRADE Money Market Funds and perform sub advisor oversight for the externally managed equity funds. Total assets under management currently top $4 Billion. Prior to joining E*TRADE, Ms. Webster managed several billion dollars in institutional money market Mutual Funds accounts, most recently for the Calvert Group where her efforts were rewarded by being awarded "top grossing fund" for 1999 within her category. She has over 19 years combined portfolio management experience. Ms. Webster received her Chartered Financial Analyst designation in 1992 and is a member of both the Washington Financial Analyst Society and AIMR. She received her Bachelors Degree from University of Colorado, majoring in Finance and Accounting.

Kris (Krishnan) Harihara, FCCA

Kris Harihara is Director of Credit for E*TRADE Global Asset Management. He is responsible for directing activities surrounding credit administration within E*TRADE Global Asset Management, including determination and implementation of credit policies and procedures, approving and monitoring various credits, industries and sectors and performing regulatory reporting. Prior to E*TRADE Kris was a Vice President at GE Asset Management and was the team leader for Structured Products' Research. He was a Managing Director at Structured Finance Advisors prior to that. In that capacity he was managing CDO portfolios as well as insurance company investments. He worked at MBIA in ABS surveillance prior to joining SFA. Prior to that he had roles in Public Accounting with KPMG Peat Marwick especially in investments audit. Kris has an MBA from Pace University. He is a Fellow of the Chartered Association of Certified Accountants, UK.

Eric Seasholtz

Eric Seasholtz is a Director and Portfolio Manager for E*TRADE Global Asset Management. He is responsible for managing E*TRADE Bank's $8.0 billion mortgage securities portfolio. Prior to joining the organization in August 2001, Mr. Seasholtz spent two years as Director of Whole Loan Trading for GMAC/RFC. Prior to that, he worked as a Director in the Capital Market Group of Ocwen Financial Corporation for six years where he was responsible for executing trades, hedging positions, as well as modeling and monitoring a number of the Banks portfolios. Mr. Seasholtz has significant experience in various mortgage products including, residential mortgage derivatives, whole loans, commercial IO, and residual cash flows. Mr. Seasholtz has 13 years of financial markets experience with 10+ years focusing on mortgage products. He holds a BA in Business Economics from Brown University and holds the Series 7 and 63 licenses.

---

(1) There is no guarantee that a specific individual or employee will continue to be employed by ETGAM.
Key Fixed Income Investment Professionals(1)
Biographical Information (cont'd)

Kulwant Sharma, CFA

Kulwant Sharma is a Portfolio Manager for the E*TRADE Global Asset Management Residential ABS portfolio. He is responsible for analyzing the structure and collateral characteristics of asset-backed and mortgage-backed securities for ETGAM. Prior to joining ETGAM, Mr. Sharma was with Penn Capital Management, a High Yield/Small Cap money manager, where he was responsible for equity and fixed income analysis, trading, and modeling for Equus Capital Funding, a cash flow CDO. Previously, Mr. Sharma was with the Vanguard Group where he was directly responsible for the planning and analysis of a $118MM divisional budget within the Vanguard Individual Investor Processing Group. Mr. Sharma holds an MBA (Finance) from Temple University, a BS in Mechanical Engineering, and a Master's degree in Industrial Engineering from Thapar University in India. Mr. Sharma is a Chartered Financial Analyst and a member of AIMR and NYSSA.

Kenneth Elder, CFA

Ken Elder is a Portfolio Manager for E*TRADE Global Asset Management. He is responsible for managing E*TRADE Bank’s $5.6 billion consumer assets portfolio. Mr. Elder previously managed the Bank’s CMBS and ABS investments. Prior to joining E*TRADE in July 2003, Mr. Elder spent 10 years at Credit Suisse First Boston, most recently as a Vice President in CMBS research. Mr. Elder also worked in structured products sales at CSFB, covering institutional clients in the Boston area. Mr. Elder holds a BSBA from Washington University in St. Louis and received the CFA designation in 1998.

Brian Hansen, CFA

Brian Hansen joined E*TRADE Global Asset Management in April 2003 as a Portfolio Manager. He is responsible for managing ETGAM’s corporate bond and structured finance portfolios. Prior to ETGAM, Mr. Hansen spent 6 years with Prudential Global Asset Management as a Senior Investment Analyst with primary duties including corporate credit analysis and underwriting for private placement debt investments, along with assisting in the ongoing management of a private placement corporate portfolio of $2 billion. Former duties also involved the establishment and management of a $1.5 billion mortgage REIT. Mr. Hansen holds a BS in Finance from Georgetown University and is a Chartered Financial Analyst.

(1) There is no guarantee that a specific individual or employee will continue to be employed by ETGAM.
Key Fixed Income Investment Professionals\(^{(1)}\)
Biographical Information

Samuel Crow

Sam Crow is the Senior Manager for Commercial Lending at E*TRADE Global Asset Management. He is responsible for all operations including originating, underwriting and managing the portfolio of commercial loans. Mr. Crow has fourteen years of experience in commercial lending including nine years at Fleet Capital and five years at Guaranty Business Credit. 6. Tax Considerations
Tax Considerations

The following is a general discussion of the US federal income tax consequences of investment in securities issued by CDO issuers. The precise tax consequences of investment in the Offered Securities may vary based on the terms thereof and the circumstances of particular prospective investors.

EXPECTED TAX TREATMENT

- The Class A Notes and the Class B Notes [will be] debt and the Class C Notes [should be] debt for US Federal income tax purposes.
- The issuer will be a passive foreign investment company ("PFIC"). Tax treatment of a US investor in the Preference Shares thus generally will depend on whether it elects to treat the issuer as a qualified electing fund ("QEF").
  - If a US investor in Preference Shares makes the QEF election, it will be required to include in gross income each year, whether or not the issuer makes distributions, its pro rata share of the issuer’s net earnings. Amounts required to be included will not be taxed again when distributed. The issuer will provide the information needed to make a QEF election.
  - If a US investor in Preference Shares fails to make the QEF election, it will be taxable only when it receives a distribution or sells its Preference Shares. However, "excess distributions" (generally, distributions in any year exceeding 125% of the average amount received during the three preceding years or, if shorter, the investor's holding period) and gains on sale will be subject to an additional tax.
    - To compute the tax on any excess distribution or gain, (i) the excess distribution or gain is allocated ratably over the investor's holding period, (ii) the amount allocated to the current year is taxed as ordinary income and (iii) the amount allocated to each previous year is taxed at the highest applicable marginal rate for that year and an interest charge is imposed to offset the deemed benefit of deferral of that tax.
    - These rules effectively prevent a US investor from treating gain as capital gain.

- The issuer may also be a controlled foreign corporation ("CFC") and/or a foreign personal holding company ("PFHC"), as well as a PFIC.
  - The issuer will be a PFHC if five or fewer US citizens or resident individuals own more than 50% of the Preference Shares. If the issuer is a PFHC, a US investor in Preference Shares (i) generally will be required to include in income constructive dividends equal to its share of the issuer's specially adjusted taxable income whether or not it receives distributions and (ii) may be subject to the PFHC rules with respect to excess distributions and gains not taxed under the PFHC rules.
  - Pending legislation seeks to repeal the PFHC rules. If passed, the tax consequences to a US investor of an investment in Preference Shares would be modified. Prospective investors should consult their tax advisors regarding this matter.
  - The issuer may be a CFC if US persons that each own at least 10% of the Preference Shares together own more than 50% of the Preference Shares. If the issuer is a CFC, a US investor that owns 10% of the Preference Shares (i) will not be subject to the PFHC rules or PFHC rules and (ii) should recognize each year as ordinary income its pro rata share of the issuer's net earnings whether or not the issuer makes a distribution.

- Distributions to US investors in the Preference Shares will not be eligible for (i) the dividends received deduction allowed to corporations or (ii) the preferential rate allowed to individuals for dividends from US and certain foreign corporations.

- A tax-exempt investor generally should not be subject to unrelated business income tax ("UBIT") unless the investor either (i) holds more than 50% of the Preference Shares and also holds Notes or (ii) holds Notes or Preference Shares that are debt-financed property.

- The investor expects to conduct its affairs so that it will not be treated as engaged in a trade or business within the United States and so that its income therefore will not be subject to US net income tax. The issuer also expects that interest income from collateral debt securities generally will not be subject to withholding tax imposed by the United States or other countries.

- A US investor (including a US tax-exempt entity) that acquires Preference Shares as issuer will be required to file Form 941 or a similar form with the IRS. In the event that a US Preference Shareholder fails to file any such required form, such US shareholder could be subject to a penalty (generally up to a maximum of $100,000), computed in the amount of 10% of the fair market value of the Preference Shares purchased by such US shareholder. Such US shareholder may in some cases be subject to additional reporting requirements under tax shelter regulations.

- [Payments on the Notes and Preference Shares will not be subject to Cayman Islands tax. The issuer's income will not be subject to Cayman Islands tax.]

- The foregoing outline summarizes some points relevant to prospective investors in general. Some types of investors (e.g., banks, insurance companies, securities dealers and traders, tax-exempt organizations, investors holding Securities as part of a hedge, straddle, conversion or constructive sale transaction) are subject to special US federal income tax regimes not considered here.

Prospective investors should read the discussion of US tax considerations in the offering circular to be provided, which will include more detailed information. Neither this outline nor the discussion of tax considerations in the offering circular considers the circumstances of particular prospective investors. Thus, they are not substitutes for tax advice and prospective investors should consult their tax advisors.
