Important Notice

This Confidential Discussion Material (this “Material”) outlines certain characteristics of a proposed collateralized debt obligation transaction (“CDO”). This Material is presented solely for purposes of discussion to assist prospective investors in determining whether they have a preliminary interest in investing in a transaction with the general characteristics described herein. This transaction is in a structuring phase and there may be material changes to the structure, terms and assets prior to the offering of any securities (the “Securities”).

This Material is not an offer to sell, or a solicitation to buy, the Securities or any other investment. Any such offering of the Securities will only be made pursuant to a final Offering Circular relating to the Securities (the “Offering Circular”), which will contain material information not contained herein and to which the prospective purchasers are directed. In the event of any such offering, this Material will be superseded, amended and supplemented in its entirety by the Offering Circular (including any preliminary version thereof). None of the Issuer, the Co-Issuer, Strategos Capital Management, LLC (the “Collateral Manager”) and Merrill Lynch or any of their respective affiliates makes any representation or warranty, express or implied, as to the accuracy or completeness of the information contained herein and nothing contained herein shall be relied upon as a promise or representation as to past or future performance of the Issuer, the Co-Issuer or any other entity. The information contained herein does not purport to contain all of the information that may be required to evaluate the Securities and any recipient is urged to read the Offering Circular relating to the Securities and should conduct its own independent analysis of the data referred to herein. The Collateral Manager and Merrill Lynch disclaim any and all liability relating to this information, including, without limitation, any express or implied representation or warranty for statements contained in and omissions from this information. None of the Issuer, the Co-Issuer, the Collateral Manager or Merrill Lynch expects to update or otherwise revise the information contained herein except by means of the Offering Circular. The securities and obligations of the Issuer and the Co-Issuer are not issued by, obligations of, or guaranteed by the Collateral Manager, Merrill Lynch, their respective affiliates, or other organizations or its investment professionals.

This Material is confidential and proprietary to Merrill Lynch, Pierce, Fenner & Smith, Incorporated and its affiliates (collectively, “Merrill Lynch”) and, accordingly, except as described below, this Material is to be treated as strictly confidential and not disclosed directly or indirectly to any party other than the recipient and its advisers or used for any purpose other than to make a preliminary analysis of the Securities. Notwithstanding the foregoing, recipients of this Material and each employee, representative or other agent of any such recipient may disclose to and any and all persons, without limitation of any kind, the U.S. federal income tax treatment and tax structure of the Issuer and all materials of any kind, including opinions or other tax analyses, that are provided to the recipients relating to such tax treatment and tax structure. This authorization to disclose such tax treatment and tax structure does not permit disclosure of information identifying the Issuer, the investment adviser, the Collateral Manager or any other party or the pricing (except to the extent pricing is relevant to tax structure or tax treatment) of the CDO.

No person has been authorized to give any information or make any representations other than the information contained herein, as amended and superseded by the information contained in the Offering Circular relating to the eventual offering, if any, of the Securities. The Securities described herein, if offered, will not be registered with the U.S. Securities and Exchange Commission. This document may not be disseminated other than (i) within the United States of America, to investors that are (A)(i) “qualified institutional buyers” (as defined in Rule 144A under the U.S. Securities Act of 1933, as amended) (the “Securities Act”) or (ii) “accredited investors” (as defined in Rule 501(a) under the Securities Act) and, in each case, who are also (B)(i) “qualified purchasers” within the meaning of Section 3(c)(7) of the U.S. Investment Company Act of 1940, as amended ("Investment Company Act") or (ii) “knowledgeable employees” with respect to the issuer of the Securities within the meaning of Rule 3-13 promulgated under the Investment Company Act and (2) outside the United States of America, to non-U.S. persons in offshore transactions in reliance on Regulation S under the Securities Act. The offer or sale of the Securities may be further restricted by law and the restrictions set forth in the Offering Circular. Potential investors are required to inform themselves of and to observe any legal restrictions on their involvement in the transaction. Additional net worth and/or sophistication requirements may be required of individual non-U.S. persons. Application will be made to list the Notes on the Irish Stock Exchange Limited ("Irish Stock Exchange"). There can be no assurance that listing on the Irish Stock Exchange will be granted.

Prospective investors should not construe this Material, the Offering Circular or any prior or subsequent communication as legal, accounting or tax advice. Certain information herein is presented in summary form and is not complete. In addition, certain information contained herein has been provided by third parties and has not been independently verified by Merrill Lynch, and Merrill Lynch makes no representation or warranty, express or implied, as to the accuracy or the completeness of such information. An investment in the Securities presents substantial risks and investors should be prepared to suffer a loss of their entire investment. Prior to making an investment decision, an investor should conduct such investigations as such investor deems necessary in order to determine if an investment in the Securities is appropriate and suitable for such investor and should consult such investor's own legal, accounting and tax advisers in order to determine the consequences of an investment in the Securities and to make an independent evaluation of such investment. With respect to institutional clients, Merrill Lynch is acting in the capacity of an arm's length contractual counterparty and not in the capacity of a financial advisor or fiduciary.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS AND TAX CONSIDERATIONS WHICH WILL BE DESCRIBED MORE FULLY IN THE OFFERING CIRCULAR TO BE PROVIDED
Important Notice

Forward Looking Statements: Any projections, forecasts and estimates contained in this Material are forward looking statements and are based upon assumptions. Projections are necessarily speculative in nature, and it can be expected that some or all of the assumptions underlying the projections will not materialize or will vary significantly from actual results. No representation is made that any returns indicated will be achieved or that all assumptions have been considered or stated. Further, there is no assurance that the actual portfolio will be purchased and sold in a manner consistent with the assumptions. Accordingly, the projections are only an estimate. Actual results will differ and may vary substantially from the projections shown. In addition, certain analyses are based on mathematical models that use hypothetical inputs to calculate results. As with all models, results may vary significantly depending upon the values of the inputs used. Models used in any analysis may be proprietary, making the results difficult for any third party to reproduce. Moreover, hypothetical performance analyses will address only certain aspects of the characteristics of the Securities and will not provide a complete assessment of the results that may follow from all possible contingencies (including default, interest rate and other scenarios and certain economic features of the Securities, including call features and cash flow diversion events). Prospective investors should understand the assumptions used in any analysis and evaluate whether they are appropriate for their purposes. Prospective investors should further consider whether the behavior of these Securities should be tested based on assumptions different from those used to prepare the analyses. Neither the Collateral Manager or Merrill Lynch assume any duty to update any forward looking statement.

Note to Historical Data: Any historical investment results of any person or entity described in this Material are not indicative of the Issuer's future investment results. Such results are intended only to give potential investors information concerning the general experience of the relevant person or entity as an asset manager or adviser and is not intended as a representation or warranty by Merrill Lynch or any other person or entity as to the actual composition or performance of any future investments that would be made by the Issuer. The nature of, and risks associated with, the Issuer's future investments may differ substantially from (and will be subject to constraints that were not applicable to) those investments and strategies undertaken historically by such persons and entities. There can be no assurance that the Issuer's investments will perform as well as, or in a manner similar to, the past investments of any such persons or entities. For these reasons, there are limitations on the value of the hypothetical illustrations contained herein. This Material is provided to you on the understanding that as a sophisticated investor, you will understand and accept its inherent limitations, will not rely on it in making any investment decision with respect to any Securities that may be issued, and will use it only for the purpose of discussing with Merrill Lynch your preliminary interest in investing in a transaction of the type described.

Potential investors are urged to conduct their own investigation regarding the underlying asset classes, including reviewing any sources cited herein and obtaining additional information regarding the underlying collateral.

AN INVESTMENT IN THE SECURITIES WILL NOT BE APPROPRIATE FOR ALL INVESTORS. STRUCTURED INVESTMENT PRODUCTS, LIKE THE SECURITIES, ARE COMPLEX INSTRUMENTS, AND TYPICALLY INVOLVE A HIGH DEGREE OF RISK AND ARE INTENDED FOR SALE ONLY TO SOPHISTICATED INVESTORS WHO ARE CAPABLE OF UNDERSTANDING AND ASSUMING THE RISKS INVOLVED. ANY INVESTOR INTERESTED IN PURCHASING THE SECURITIES SHOULD CONDUCT ITS OWN INVESTIGATION AND ANALYSIS OF THE PRODUCT AND CONSULT ITS OWN PROFESSIONAL ADVISERS AS TO THE RISKS INVOLVED IN MAKING SUCH A PURCHASE.

AN INVESTMENT IN THE SECURITIES IS EXPECTED TO HAVE LIMITED LIQUIDITY. NO SECONDARY MARKET EXISTS FOR THE SECURITIES AND NONE MAY DEVELOP.

A SIGNIFICANT OR TOTAL LOSS OF INVESTMENT COULD OCCUR UNDER CERTAIN SCENARIOS. PAST PERFORMANCE DOES NOT GUARANTEE FUTURE RESULTS.

For UK investors only: This document has been approved for distribution in the UK by Merrill Lynch International, which is regulated by the Securities and Futures Association. The securities described herein are not available in the UK to private investors as defined by the Securities and Futures Association. This document is only communicated to, and is directed at, (a) persons who have professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (the “Order”), (b) high net worth entities, and other persons to whom it may otherwise lawfully be communicated, falling within Article 49(2)(a)-(d) of the Order or (c) any client of Merrill Lynch International Bank Limited (or any UK affiliate) who are either an “intermediate customer” or “market counterparty” for the purposes of the FSA Handbook, all such persons together being referred to as “relevant persons”. In addition to being an intermediate customer, an investor must also have at least US$5 million (or equivalent) in net investments. This document must not be acted on or relied on by persons who are not relevant persons”. Any investment or investment activity to which this document relates is only available to relevant persons.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS AND TAX CONSIDERATIONS WHICH WILL BE DESCRIBED MORE FULLY IN THE OFFERING CIRCULAR TO BE PROVIDED

Appendix B: Additional Definitions
**Transaction Summary**

- Kleros Preferred Funding, Ltd. ("Kleros") plans to issue $[1007.0] MM ABS CDO securities (the "Offered Securities"). Kleros is a newly formed collateralized debt obligation ("CDO") that will be managed by Strategos Capital Management, LLC ("Strategos" or the "Collateral Manager").

- Residential Mortgage Backed Securities ("RMBS"), Commercial Mortgage Backed Securities ("CMBS"), Asset Backed Securities ("ABS" and, together with RMBS and CMBS, "Structured Finance Securities"), and Collateralized Debt Obligations ("CDOs")\(^{(1)}\) have historically exhibited lower loss rates, higher recovery rates upon default and better stability when compared to corporate bonds with similar ratings.\(^{(2)}\)

- Kleros will issue the following classes of Offered Securities to be backed by investments primarily in [AAA], [AA], and [A]-rated ABS, RMBS, and CDOs:

---

**Assets held by CDO**

- ABS, RMBS, & CDOs

**Securities issued by CDO**

- $[60.0]MM Class A:
  - [AAA/AAA/AAA]
  - (Moody's/S&P/Fitch)

- $[40.0]MM Class B:
  - [A2/A1/A1]
  - (Moody's/S&P/Fitch)

- $[13.0]MM Class C:
  - [A3/A2/A3]
  - (Moody's/S&P/Fitch)

- $[8.5]MM Class D:
  - [Baa2/BBB+/BBB]
  - (Moody's/S&P/Fitch)

- $[15.5]MM Preferred Shares

---

\(^{(1)}\) These CDOs already exist as investment vehicles. They should not be confused with the Offered Securities.

2. Asset Class Selection
A. Structured Finance Market Overview
Structured Finance Market Overview

Historical Defaults

S&P and Moody's data shows that, historically, very few Aaa/AAA, Aa/AA, and A/A-rated Structured Finance CDOs and RMBS securities have defaulted.

For Aaa/AAA, Aa/AA, A/A:

- Hypothetical Portfolio one-year historical average default rate: <0.01%
- Hypothetical Portfolio one-year average default rate: <0.01%

---

1. Certain of the information contained has been obtained from third-party sources and neither Merrill Lynch nor any of its affiliates nor Strategos nor any of its affiliates makes any representation or warranty, express or implied as to the accuracy or the completeness of such information. Certain of the information is presented in summary form. Potential Investors are urged to conduct their own investigation regarding the underlying asset class including reviewing any sources cited herein and obtaining additional information regarding the underlying collateral. The data discussed in this Overview relates only to historical investment performance. Future investment performance may vary. See "Important Notice".

4. Assumes hypothetical portfolio consisting of the following allocation: 20% "Aaa/AAA" RMBS, 35% "Aa/AA" RMBS, 25% "Aa/AA" SF CDOs, and 20% "A/A" RMBS.

A Moody's study on recovery rates of RMBS and HEL collateral ("Structured Finance Securities") has concluded the following: (3)

- A rated RMBS/HEL Securities have historically had an average recovery rate of 83% for bonds that have not matured. (4)
- Aa rated RMBS/HEL Securities have historically had an average recovery rate of 93% for bonds that have not matured. (4)
- Aaa rated RMBS/HEL Securities have historically had an average recovery rate of 98% for bonds that have not matured. (4)
- RMBS/HEL Securities may receive more substantial cashflow than corporate bonds with respect to interest and principal after a default.

(2) Certain of the information contained herein has been obtained from third party sources and neither Merrill Lynch nor any of its affiliates nor Strategies Capital Management, LLC nor any of its affiliates make any representation or warranty, express or implied, as to the accuracy or the completeness of such information. Certain of the information is presented in summary form. Potential Investors are urged to conduct their own investigation regarding the underlying asset class including reviewing any sources cited herein and obtaining additional information regarding the underlying collateral. The data discussed in this Overview relates only to historical investment performance. Future investment performance may vary. See "Important Notice".
(3) Data in all three cases is based on a limited number of defaults. Moody's records the number of defaulted RMBS/HEL Securities that originated as Aaa, Aa, and A as 12, 29, and 16, respectively.
(4) Data for recovery rates are updated through April, 2004, with defaults identified as of December 31, 2003. Only defaulted and uncured securities were included in the study. Loss severity rates for all defaulted securities, including cured ones, would lead to lower estimates.
Structured Finance Market Overview
Rating Stability (1) (2)

According to a recent Moody’s study, the long-term historical average (1991-2004) of unchanged ratings of Structured Finance Securities (3) was 92.3%.

Kleros Preferred Funding Portfolio
Portfolio Assumptions

Representative Portfolio (1)(2)

(1) This is an indicative portfolio. All information shown on this page is for illustrative purposes only. The actual structure of the final transaction, including the composition of the collateral to be acquired, will be determined at or around the time of pricing of the Notes based upon market conditions and other factors applicable at that time. The actual portfolio on the effective date may be materially different from the one presented above and the portfolio may change over time. In addition, certain of the assumptions contained herein have been made for modeling purposes and it is unlikely that such assumptions will be fact realized.

(2) The assets held by Kleros Preferred Funding, Ltd. ("Kleros") which back the Offered Securities consist of (i) [Aaa], [A] and [A1] rated (i) Asset Backed Securities including RMBS and (ii) ABS CDOs. It is anticipated that up to 83% of the assets held by Kleros may consist of such CDO securities, provided that the securities issued by any one CDO may not exceed [1.5]% of Kleros' portfolio. As a result, potential investors in the Offered Securities must understand that if they hold debt or equity issued by other CDOs, their credit exposure to such CDOs will increase to the extent securities issued by those CDOs are also included in the assets of Kleros. It is expected that [18]% of the assets held by Kleros will consist of [Aaa] rated CDO securities and [20]% of the assets held by Kleros will consist of [Aa1], [Aa2], or [Aa3] rated CDO securities.

(1) These assumptions are general and are not conclusive or exhaustive. None of the assumptions contained herein are meant to be historical descriptions or predictions of future performance. In addition, certain of the assumptions contained herein have been made for modeling purposes and it is unlikely that such assumptions will in fact be realized. No representation or warranty is made by Merrill Lynch or Strategic Capital Management as to the reasonableness of such assumptions or as to any other financial information contained in such models (including the assumptions on which they are based). These assumptions have certain inherent limitations, and will be affected by any changes in the structure or assets for this transaction. As a sophisticated investor, you should review each assumption carefully and make your own determination as to its accuracy or reasonableness. Actual collateral characteristics may be different from these assumed and even if they are the same on a weighted average basis, the use of individual securities in the actual CDO structure may substantially change the results indicated. No representation is made that such assumptions are accurate or complete or do not contain errors, or that alternative modeling techniques or assumptions would not be more appropriate or produce significantly different results. The attached material is provided to you on the understanding that it is only for use by Merrill Lynch and any information that may be used, and will use it only for the purpose of discussing with Merrill Lynch your preliminary interest in investing in a transaction of the type described. Any investor should rely only upon the final offering materials for the definitive terms and conditions of the offering. Neither Merrill Lynch nor Strategic Capital Management assumes any responsibility for the accuracy or validity of the results of such models.

(2) Based on a Ratings Matrix which is described in the Offering Circular.

(3) With a limited number of exceptions.

(4) The expected weighted average coupon is [5.60] [%].

(5) The expected weighted average spread is [0.69] [%].
Structuring Assumptions

- **Distribution Dates** - Distribution Dates occur quarterly.

- **Ramp-Up** - It is assumed that [70]% of the Collateral Debt Securities will be purchased at closing and the deal will be fully ramped within [120] days after closing.

- **Mandatory Auction Call**: [8] years.

- **Default and Recoveries** - Defaults are stated as constant immediate annual rates and are applied on the outstanding collateral balance at the beginning of each quarterly Distribution Date. Defaulted assets are assumed to be sold immediately after default at a price equal to the applicable recovery rate.

- **Interest Rates** - Floating rate collateral accrues interest at the 3M LIBOR curve plus its applicable spreads. The Notes accrue interest at the 3M LIBOR curve plus applicable spreads. The 3M LIBOR curve is the forward curve as of [5]/[6]/[2005].

- **Intraperiod Reinvestment** - Principal and interest proceeds are assumed to be reinvested and accrue interest at the 3M LIBOR curve minus [0.10]%.

- **Reset Frequency** - CDO assets and liabilities are assumed to reset based on the same quarterly LIBOR rates.

- **First Period Interest Calculation** - First period interest is assumed to be [95]% of a full quarterly period’s assumed interest.

- **Yield Calculations** - Preferred Shares (and Preferred Shares combo) yields are calculated using annual compounding.

---

(1) These assumptions are general and are not conclusive or exhaustive. Actual collateral characteristics may be different from those assumed and even if they are the same on a weighted average basis, the use of individual securities in the actual CDO structure may substantially change the results indicated.

(2) Definitions and other terms will be fully described in the Offering Circular.

(3) Please see “Important Notice –Forward Looking Statements” for disclaimers on projections, forecasts, and estimates.

---

(1) Break in yield is the default rate at which the first dollar loss in principal occurs, and 0% yield is the default rate at which total cashflow received does not equal initial investment. Please see Appendix A for a description of Collateral Cashflow Formulas.

(2) Assuming annual constant defaults beginning immediately, [75\%] recovery rate, forward LIBOR. Please see "Transaction Details - Structuring Assumptions" for a description of modeling assumptions. Assumes a weighted average spread of [0.69\%] and a weighted average coupon of [5.66\%].

(3) All the information shown on this page is for illustrative purposes only. The transaction is at a structuring phase, and the actual structure of the transaction and characteristics of the offered securities may differ from those presented herein. Definitions and other terms will be fully described in the Offering Circular. It is contemplated that the "Collateral Profile" would apply on and after the ramp-up completion date.

(4) Defaults are stated as constant immediate annual rates and are applied on the outstanding collateral balance at the beginning of each quarterly Distribution Date. Defaulted assets are assumed to be sold immediately at a price equal to the applicable recovery rate.

- Assuming the transaction experiences 0.01% default rate every year, which is approximately the average one-year default rate for AAA and AA-rated RMBS and ABS Securities, the Preferred Share return would be [10.8]%.[1][2]
- Assuming the transaction experiences 0.10% default rate every year, which is approximately 10 times the average annual default rate for AAA and AA-rated RMBS and ABS Securities, the Preferred Share return would be [9.3]%.[1][2]

Future market and economic conditions are impossible to predict. Future market or economic conditions that materially differ from those on which the assumptions are based may have a negative impact on the performance of Kleros. For these and other reasons, there are limitations on the value of this or any hypothetical illustration.

This information is not intended to be either an express or an implied guaranty of investment performance.

---

[1] This material includes illustrative return information that is based in part on hypothetical assumptions. None of the assumptions contained herein are meant to be historical descriptions nor predictions of future performance. In addition, certain of the assumptions contained herein have been made for modeling purposes and it is unlikely that such assumptions will in fact be realized. Such results are presented for illustrative purposes only and are based on various assumptions, not all of which are described herein. No representation or warranty is made by Cohen & Company, LLC or to the reasonableness of such assumptions or as to any other financial information contained in such materials (including the assumptions on which they are based). These assumptions have certain inherent limitations, and will be affected by any change in the structure or assets for this transaction. As a sophisticated investor, you should review each assumption carefully and make your own determinations as to its accuracy or usefulness. The actual performance of any security could differ and may differ substantially, from that set forth in the attached illustrations. No representation is made that such illustrations are accurate or complete or do not contain errors, or that alternative modeling techniques or assumptions would not be more appropriate or produce significantly different results. The information in the graph above should not be considered a prediction of the performance of the Issuer or the Preferred Shares. The attached material is provided to you on the understanding that as a sophisticated investor, you should understand and accept the inherent limitations, will not rely on or make any investment decision with respect to any securities that may be issued, and will use it only for the purpose of discussing such matters with your professional advisors.

---

[2] Please see Standard & Poor’s Market Commentary for details. Assumptions used are 3-month average spread of 125 basis points and a weighted average coupon of 5.85%.

[3] Forward LIBOR refers to the curve containing the expected rates that borrowers in the market are setting to pay to borrow money for a 3-month period at some given point in the future. For this information, forward LIBOR was set on 5/16/2005.

[4] Cashflow is reported as immediate annual cash flows and are applied on the outstanding collateral balance at the beginning of each quarter. Distribution Data.

[5] These calculations are based on a collateral average life of 9.5 years. If the actual collateral amortization occurs differently than is assumed, actual results could differ materially from these figures.

Risk Factors

An investment in the Securities described in this Information, if such offering is consummated, will involve certain risks. Set forth below is a summary description of certain of the risks to which an investor in the Securities would be subject. A detailed list of risk factors will be included in the Offering Circular (including the preliminary and final versions thereof). An investor should not make any decision to invest in the Securities until after such investor has had an opportunity to read and review carefully the Offering Circular.

Limited Liquidity. There is currently no market for the Offered Securities. Although Merrill Lynch may from time to time make a market in any class of Offered Securities, it is under no obligation to do so. In the event that Merrill Lynch commences any market-making, it may discontinue the same at any time. There can be no assurance that a secondary market for any of the Offered Securities will develop, or if a secondary market does develop, that it will provide the holders of such Offered Securities with liquidity of investment or that it will continue for the life of the Offered Securities. In addition, the Offered Securities are subject to transfer restrictions and can only be transferred to certain transferees. Consequently, an investor in the Offered Securities must be prepared to hold its Offered Securities for an indefinite period of time.

Limited-Recourse Obligations. The Notes will be limited-recourse obligations of the co-issuer, payable solely from the collateral pledged by the issuer to secure the Notes. None of the security holders, members, partners, directors, managers or incorporators of the issuer, the co-issuer, the trustee, the administrator of the issuer, the Collateral Manager, Merrill Lynch, any of their respective affiliates and any other person or entity will be obligated to make payments on the Notes. Consequently, the holders of the Notes must rely solely on amounts received in respect of the collateral for the payment of principal thereof and interest thereon. There can be no assurance that the distributions on the collateral pledged by the issuer to secure the Notes will be sufficient to make payments on any class of Notes, in particular after making payments on more senior classes of Notes and certain other required amounts ranking senior to such Notes. The issuer's ability to make payments in respect of any class of Notes will be constrained by the terms of the Notes of classes more senior to such class and the indenture. If distributions on the collateral are insufficient to make payments on the Notes, no other assets will be available for payment of the deficiency and, following liquidation of all the collateral, the obligations of the co-issuer to pay such deficiencies will be extinguished.

Payments in respect of the Preferred Shares. The issuer will pledge substantially all of its assets to secure the Notes and certain other obligations pursuant to the indenture. The proceeds of such assets will only be available to make payments in respect of the Preferred Shares as and when such proceeds are released from the lien of the indenture in accordance with the priority of payments that will be set forth therein. There can be no assurance that, after payment of principal and interest on the Notes and other fees and expenses of the co-issuer in accordance with such priority of payments, the issuer will have funds remaining to make distributions in respect of the Preferred Shares.

Investment in CDO Equity. CDO preferred shares are a first loss, leveraged credit position. An investor in a CDO is exposed to a portfolio of diversified credits, but only a portion of those credits need to default (recovery values adjust this range upward) for clients that invest in CDO preferred shares to lose 100% of their original investment—hence the leveraged credit position. Client loss is limited to original investment. CDO debt tranche investors effectively loan money to CDO preferred share investors. Criteria governing a CDO will divert cashflow intended for equity to start paying down debt in the event that certain coverage ratios (over-collateralization and interest coverage tests) are triggered. Collateral deterioration is the cause for these ratios to be triggered. This may result in a cutoff of cashflow to CDO preferred shares for some time and potential phantom income tax issues. Equity investors are leveraged. Spread movement in the underlying collateral portfolio will have exaggerated mark-to-market effect on client positions. However, only defaults affect the potential cashflow equity investors receive. CDO preferred shares are a purchase of a stream of cashflows. These cashflows are amortizing in nature, i.e., clients do not normally receive their full principal at maturity. CDO preferred share returns are projected in terms of the IRR of this stream of cashflows. The earlier cash is received, the higher the IRR will be.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular. THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS WHICH ARE DESCRIBED IN THE OFFERING CIRCULAR TO BE PROVIDED.
Risk Factors

Subordination of Each Class of Subordinate Notes. No payment of interest on any class of Notes will be made until all accrued and unpaid interest on the notes of each class that is senior to such class and that remain outstanding has been paid in full. If an event of default occurs, so long as any Notes are outstanding, the holders of the most senior class of Notes then outstanding (or until the Commitment Period Termination Date (as defined in the Offering Circular)) will be entitled to determine the remedies to be exercised under the indenture. It is anticipated that so long as any Class A Notes or Class B Notes are outstanding, the failure on any payment date to make payment in respect of interest on the Class C or Class D Notes will not constitute an event of default under the indenture and such interest will be deferred and capitalized. Remedies pursued by the holders of the class or classes of Notes entitled to determine the exercise of such remedies could be adverse to the interest of the holders of the other classes of Notes. It is anticipated that, to the extent that any losses are suffered by any of the holders of any Offered Securities, such losses will be borne, first, by the holders of the Preferred Shares, second, by the holders of the Class D Notes, third by the holders of the Class C Notes, fourth by the holders of the Class B Notes, and fifth, by the holders of the Class A Notes.

Volatility of the Preferred Shares. The Preferred Shares represent a leveraged investment in the underlying collateral. Therefore, it is expected that changes in the value of the Preferred Shares will be greater than the change in the value of the underlying collateral, which will be subject to credit, liquidity, interest rate and other risks. Utilization of leverage is a speculative investment technique and involves certain risks to investors. The indebtedness of the issuer under the Notes will result in interest expense and other costs incurred in connection with such indebtedness that may not be covered by proceeds received from the Collateral. The use of leverage generally magnifies the issuer’s opportunities for gain and risk of loss.

Ongoing Commitments – the Class A-1 Notes. The Class A-1 Notes may not be fully drawn at closing. If this is the case, it is anticipated that holders of the Class A-1 Notes will be obligated during a commitment period expected to run from the closing date to [4] months following the closing date, subject to compliance by the issuer with certain borrowing conditions, to advance funds to the issuer until the aggregate principal amount advanced under the Class A-1 Notes equals the aggregate amount of commitments to make such advances.

Nature of Collateral. The collateral will be subject to credit, liquidity, interest rate, market, fraud, operations and structural risk. The amount and nature of the collateral securing the Notes will be established with a view to withstanding certain assumed deficiencies in payment occasioned by defaults in respect of the securities included in the collateral. If any deficiencies exceed such assumed levels, however, payments on the Notes and distributions on the Preferred Shares could be adversely affected. To the extent that a default occurs with respect to any security included in the collateral, it is not likely that the issuer will receive the full amount of principal and interest owed to the issuer in respect of such security. The market value of the collateral generally will fluctuate with, among other things, the financial condition of the obligors or issuers of the securities included in the collateral, the remaining term thereof to maturity, general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates.

It is currently anticipated that [70]% of the collateral will have been purchased by the closing date. The issuer expects that it will have purchased 100% of the collateral by the ramp-up completion date, and that the collateral will satisfy the coverage tests. However, there can be no assurance that this will occur. Failure to satisfy the coverage tests may result in repayment or redemption of all or a portion of the Notes (in accordance with the priority of payments to be specified in the Offering Circular).

Average Life of the Offered Securities. The average life of each class of Offered Securities is expected to be shorter than the number of years until their stated maturity. Such average lives will be affected by numerous factors described in the Offering Circular.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS WHICH ARE DESCRIBED IN THE OFFERING CIRCULAR TO BE PROVIDED.
Risk Factors

Early Redemption of the Notes. In addition to the risk of early redemption of the Notes discussed in the immediately preceding paragraph, the notes may be subject to early redemption [8] years after the closing date at the election of a majority in interest of the holders of the preferred shares. It is anticipated that if a coverage test is breached, interest proceeds and then principal proceeds will be applied to pay principal on the Notes until the applicable coverage test is met. In the case of a breach of the interest coverage test, it is anticipated that principal on the Notes will be paid in order of seniority, beginning with the Class A1 Notes. In addition, it is anticipated that if the Notes have not been paid in full prior to [July 6, 2013] an auction of the collateral will be conducted and subject to satisfaction of certain conditions, will be sold and used to redeem the Notes. The Notes may also be subject to early redemption on the occurrence of certain adverse tax events to be described in the Offering Circular.

Certain Conflicts of Interest. The activities of the Collateral Manager, Merrill Lynch and their respective affiliates may result in certain conflicts of interest.

Conflicts of Interest Involving the Collateral Manager. Various potential and actual conflicts of interest may arise from the overall investment activities of the Collateral Manager and its affiliates for their own accounts or for the accounts of others. The Collateral Manager and its affiliates may invest for their own accounts or for the accounts of others in debt obligations that would be appropriate investments for the issuer and they have no duty, in making such investments, to act in a way that is favorable to the issuer or the holders of the Offered Securities. Such investments may be different from those made on behalf of the issuer. The Collateral Manager and its affiliates may have economic interests in or other relationships with issuers in whose obligations or securities the issuer may invest. In particular, such persons may make and/or hold an investment in an securities that may be pari passu, senior or junior in ranking to an investment in securities of the same issuer that are held by the issuer or in which partners, security holders, officers, directors, agents or employees of such persons serve on boards of directors or otherwise have ongoing relationships. Each of such ownership and other relationships may result in securities laws restrictions on transactions in such securities by the issuer and otherwise create conflicts of interest for the Issuer. In such instances, the Collateral Manager and its affiliates may in their discretion, subject to certain restrictions, make investment recommendations and decisions that may be the same as or different from those made with respect to the issuer's investments.

Although the officers and employees of the Collateral Manager will devote as much time to the issuer as the Collateral Manager deems appropriate, the principals and employees may have conflicts in allocating their time and services among the issuer and other accounts advised by the Collateral Manager and/or its affiliates. In addition, the Collateral Manager and its affiliates, in connection with their other business activities, may acquire material non-public confidential information that may restrict the Collateral Manager from purchasing securities or selling securities for itself or its clients (including the Issuer) or otherwise using such information for the benefit of its clients or itself.

The Collateral Manager and any of its affiliates may engage in any other business and furnish investment management and advisory services to others, which may include, without limitation, serving as collateral manager or investment manager for, investing in, lending to, or being affiliated with, other entities organized to issue collateralized bond obligations secured by securities such as those included in the collateral and other trusts and pooled investment vehicles that acquire interests in, provide financing to, or otherwise deal with securities issued by issuers that would be suitable for inclusion in the collateral. The Collateral Manager will be free, in its sole discretion, to make recommendations to others, or effect transactions on behalf of itself or for others, that may be the same as or different from those effected on behalf of the issuer, and the Collateral Manager may furnish investment management and advisory services to others who may have investment policies similar to those followed by the Collateral Manager with respect to the issuer and who own or may own securities of the same class, or which are the same type as, the securities included in the collateral.

Although the Collateral Manager or one of its affiliates may at times be a holder of the Offered Securities, its interests and incentives will not necessarily be completely aligned with those of the other holders of the Offered Securities (or of the holders of any particular class of the Notes or of the Preferred Shares). Furthermore, although the Collateral Manager is expected to purchase preferred shares, it is not required to maintain minimum holdings in the preferred shares.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS WHICH ARE DESCRIBED IN THE OFFERING CIRCULAR TO BE PROVIDED
Risk Factors

Conflicts of Interest Involving Merrill Lynch. Certain of the Collateral Debt Securities acquired or to be acquired by the Issuer will consist of obligations of issuers or obligors, or obligations sponsored or serviced by companies, for which Merrill Lynch or an affiliate thereof has acted as underwriter, agent, placement agent or dealer, or for which Merrill Lynch or an affiliate thereof has acted as lender or provided other commercial or investment banking services. Merrill Lynch or an affiliate thereof may structure issuers of Collateral Debt Securities and arrange to place such Collateral Debt Securities with the Issuer. Merrill Lynch or an affiliate thereof may also act as counterparty with respect to one or more Synthetic Securities. In its role as counterparty with respect to Synthetic Securities, Merrill Lynch or one or more of its affiliates may manage a pool of Reference Obligations with respect to the Synthetic Securities and make determinations regarding those Reference Obligations. In addition, an affiliate of Merrill Lynch may act as Hedge Counterparty under one or more Hedge Agreements with the Issuer. Moreover, Merrill Lynch or its affiliates may from time to time enter into derivative transactions with third parties with respect to the Offered Securities or with respect to Collateral Debt Securities acquired by the Issuer, and Merrill Lynch or its affiliates may, in connection therewith, acquire (or establish long, short or derivative financial positions with respect to) Offered Securities, Collateral Debt Securities or one or more portfolios of financial assets similar to the portfolio of Collateral Debt Securities acquired by (or intended to be acquired by) the Issuer. Merrill Lynch, its employees, affiliates and employees of affiliates will receive compensation in connection with the structuring of the CDO and/or distribution of the Securities. These activities may create certain conflicts of interest, and there can be no assurance that the terms on which the Issuer entered into (or enters into) any of the foregoing transactions with Merrill Lynch (or an affiliate thereof) were or are the most favorable terms available in the market at the time from other potential counterparties.

It is anticipated that, in the event that the transaction will include an administrative agency agreement, an affiliate of Merrill Lynch, as administrative agent, would become successor collateral manager, if the Collateral Manager were removed pursuant to the collateral management agreement. If this occurs, such affiliate could experience conflicts of interest similar to those described above with respect to the collateral manager.

Significant Fees Reduce Proceeds Available for Purchase of Collateral Debt Securities. On the Closing Date, the Co-Issuers will use a portion of the gross proceeds from the offering to pay various fees and expenses, including expenses, fees and commissions incurred in connection with the acquisition of the Collateral, structuring and placement agency fees payable to Merrill Lynch and legal, accounting, rating agency and other fees. Closing fees and expenses reduce the amount of the gross proceeds of the offering available to purchase Collateral and, therefore, the return to purchasers of the Securities. Rating agencies will consider the amount of net proceeds available to purchase Collateral in determining any ratings assigned by them to the Securities. For information about the amount of such fees and expenses, please review the final Offering Circular before investing.

Purchase of Collateral Debt Securities. It is anticipated that many of the securities that will be purchased by the Issuer on the date on which the Offered Securities are issued will be purchased from one or more portfolios of securities held by affiliates of Merrill Lynch pursuant to separate warehouse agreements between such affiliates of Merrill Lynch and the Collateral Manager. Some of the securities subject to such warehouse agreements may have been originally acquired by Merrill Lynch from the Collateral Manager or one of its Affiliates. The Issuer will purchase securities included in such warehouse portfolios only to the extent that such purchases are consistent with the investment guidelines of the Issuer, the restrictions contained in the indenture and the Collateral management agreement and applicable law. The purchase price payable by the Issuer for such securities will be based on the purchase price paid when such securities were acquired under the warehouse agreements, accrued and unpaid interest on such securities as of the date they are acquired by the Issuer and gains or losses incurred in connection with hedging arrangements entered into with respect to such securities. Accordingly, it is likely that the Issuer will bear the risk of market changes subsequent to the acquisition of such securities and related hedging arrangements pursuant to the warehouse agreements as if it had acquired such securities directly.

Redemption and Diversion of Interest Proceeds. The Securities will be subject to redemption under certain circumstances described in the Offering Circular (including, under certain circumstances, upon the failure of certain financial coverage tests to be satisfied). Any such redemption may cause the economic return from an investment in the Securities to vary from the economic returns that may be modeled in this Information. In addition, the failure to satisfy certain financial coverage tests could result in an elimination, deferral or reduction in the payments to be made to holders of one or more classes of notes or equity securities, which could adversely impact the economic return realized by such holders.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS WHICH ARE DESCRIBED IN THE OFFERING CIRCULAR TO BE PROVIDED
Risk Factors

Auction Call Redemption. If the Notes have not been redeemed in full prior to the Payment Date occurring in [July 6, 2013], then an auction of the Collateral Debt Securities will be conducted and, provided that certain conditions are satisfied, in particular with respect to the sufficiency of anticipated proceeds from the proposed sale of the Collateral Debt Securities, the Collateral Debt Securities will be sold and the Notes will be redeemed on such Payment Date. If such conditions are not satisfied and the auction is not successfully conducted on such Payment Date, the Collateral Manager will conduct auctions on each Payment Date thereafter, however the Notes will not be redeemed until the conditions are satisfied.

Application of Principal Proceeds. Principal Proceeds from the Collateral Debt Securities, except for sales proceeds that are reinvested in substitute Collateral Debt Securities, will be used to pay principal on the Notes beginning with the first Payment Date. The timing of receipts of principal on the Collateral Debt Securities with respect to such substitute Collateral Debt Securities will depend on, among other factors, the rate of prepayments on Collateral Debt Securities which may be influenced by the level of interest rates and economic conditions. The Issuers cannot predict the actual rate of principal payments that will be experienced on the Collateral Debt Securities. After the ramp-up completion date, there will be no further purchases made in the portfolio.

CDO of CDOs. The assets held by Kleros Preferred Funding, Ltd. ("Kleros") which back the offered Securities consist of [Aaa], [Aa] and [A] rated (i) Asset Backed Securities including RMBS and (ii) ARS CDOs. It is anticipated that up to [35]% of the assets held by Kleros may consist of such CDO securities provided that the securities issued by any one CDO may not exceed [1.5]% of Kleros's portfolio. As a result, purchasers of the offered Securities must understand that if they hold debt or equity issued by other CDOs, their credit exposure to such CDOs will increase to the extent securities issued by those CDOs are also included in the assets of Kleros. It is expected that [10]% of the assets held by Kleros will consist of [Aa1], [Aa2], or [Aa3] rated CDO securities.

Relation to Prior Investment Results. Any prior investment results of any person or entity described herein will not be indicative of the CDO issuer's future investment results. Such results are intended only to give potential investors information concerning the general experience of the relevant person or entity as an asset manager or adviser and is not intended as a representation or warranty by Merrill Lynch or any other person or entity as to the actual composition of or performance of any future investments that would be made by the CDO issuer. The nature of, and risks associated with, the CDO issuer's future investments may differ substantially from (and will be subject to constraints that were not applicable to) those investments and strategies undertaken historically by such persons and entities. There can be no assurance that the CDO issuer's investments will perform as well as, or in a manner similar to, the past investments of any such persons or entities.

Projections, Forecasts and Estimates. Any projections, forecasts and estimates contained herein are forward looking statements and are based upon assumptions that are disclosed herein. Projections are necessarily speculative in nature, and it can be expected that some or all of the assumptions underlying the projections will not materialize or will vary significantly from actual results. Accordingly, the projections are only an estimate. Actual results may vary from the projections, and the variations may be material.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.

THE ATTENTION OF POTENTIAL INVESTORS IS DRAWN TO THE RISK FACTORS WHICH ARE DESCRIBED IN THE OFFERING CIRCULAR TO BE PROVIDED
Risk Factors

Certain hypothetical performance analyses are based on assumptions that may prove to be incorrect. Prospective investors should understand those assumptions and evaluate whether they are appropriate for their purposes. Certain analyses are based on mathematical models that use hypothetical inputs to calculate results. As with all models, results may vary significantly depending upon the values of the inputs used. Models used in any analysis may be proprietary, making the results difficult for any third party to reproduce. Moreover, hypothetical performance analyses will address only certain aspects of the characteristics of the Offered Securities and will not provide a complete assessment of the results that may follow from all possible contingencies (including default, interest rate and other scenarios and certain economic features of the Offered Securities, including call features and cash flow diversion events). Prospective investors should consider whether the behavior of these securities should be tested based on assumptions different from those used to prepare these analyses.

Mandatory Repayment of the Notes. If any coverage test applicable to a class of notes is not met, first, interest proceeds, then, to the extent that the application of interest proceeds is insufficient, principal proceeds, then, to the extent that the application of interest proceeds and principal proceeds is insufficient, uninvested proceeds, will be used to the extent that funds are available in accordance with the priority of payments and to the extent necessary to restore the relevant coverage tests to certain minimum required levels, will be used to repay principal of one or more classes of notes.

In addition, if the CDO issuer is unable to obtain confirmation of the ratings of the notes from each of the rating agencies rating the notes by the 30th day following the ramp-up completion date, first uninvested proceeds, then, to the extent that the application of uninvested proceeds is insufficient, interest proceeds, then, to the extent that the application of uninvested proceeds and interest proceeds is insufficient, principal proceeds, will be applied on the first distribution date following such 30th day to redeem first, the Class A-1 Notes, then the Class A-2 Notes, then the Class B Notes, then, the Class C Notes, then, the Class D Notes, in each case to the extent necessary to obtain such rating confirmation from each of the rating agencies.

Either of the foregoing could result in an elimination, deferral or reduction in the payments in respect of interest or commitment fee or the principal repayments made to the holders of one or more classes of notes that are subordinate to any other outstanding class of notes, which could adversely impact the returns of such holders.

The Collateral Manager may, on any distribution date occurring prior to the last day of the reinvestment period, in its sole discretion elect to apply all or a portion of the principal proceeds available for reinvestment to the payment of principal of the notes in accordance with the priority of payments, which application may result in additional payments of principal on the notes.

Currency Risk. The notes will be denominated in U.S. dollars. The eligibility criteria will permit collateral debt securities (and, with respect to synthetic securities, reference obligations) to be denominated in U.S. dollars, in sterling or in euros which, in each case, are not convertible into or payable in any other currency. Notwithstanding the fact each such collateral debt security will be required, upon acquisition thereof by the CDO issuer, to have an associated hedge agreement and will include currency protection provisions with respect to scheduled payments thereunder, losses may be incurred due to fluctuations in the U.S. dollar/sterling or U.S. dollar/euro exchange rates in the event of (i) a default under any such hedge agreement, (ii) certain termination events under any such hedge agreement or (iii) any increase in the scheduled coupon or interest payment in respect of such security related to such hedge agreement.

Interest Rate Risk. The notes will bear interest at a rate based on three-month LIBOR. Certain of the collateral debt securities included in the collateral will include obligations that bear interest at fixed rates. Accordingly, the notes are subject to interest rate risk to the extent that there is an interest rate mismatch between the floating rate at which interest accrues on the notes and the rates at which interest accrues on fixed rate securities included in the collateral. A portion of such interest rate mismatch will be mitigated by one or more hedge agreements which the CDO issuer will enter into in connection with the transaction. There can be no assurance that the collateral debt securities and eligible investments, together with such hedge agreements, will, in all circumstances, generate sufficient interest proceeds to make timely payments of interest on the notes.

The summary risk factors presented above are generic to the investment category, do not present all of the risks specific to this transaction or the collateral and are subject in their entirety to the complete presentation of risk factors in the final Offering Circular.

Strategos Overview

Summary

- Cohen Bros. and Co. has grown to become one of the leading research houses and investment banks dedicated to the small and medium size financial services market. The firm currently employs over 45 professionals, with offices in Philadelphia, New York, and Paris.

- Cohen Bros. draws on the many years of success of its employees and principals in the financial services and real estate sectors to provide specialized research and investment opportunities to institutions and sophisticated individuals.

- The award winning research analysts and credit underwriters at Cohen Bros. are experienced in the bank, insurance, real estate, and specialty finance industries from both an evaluation and management perspective.

- **Strategos Capital Management LLC**, a Delaware limited liability company 100% owned by Cohen Bros. and its principals, will serve as Collateral Manager for ABS CDOs\(^{(1)}\).

- Strategos was established as the cornerstone of Cohen’s ABS and MBS business.

\(^{(1)}\) Elron will be the first ABS CDO managed by Strategos Capital Management.
Cohen Bros. is a focused and disciplined manager specializing in the bank, thrift, insurance, real estate and specialty finance sectors.
Introduction to Strategos CDO Management

\(^{(1)}\) As of January, 2005. There is no guarantee that specific individuals or employees will continue to be employed by Strategos Capital Management, LLC.
Investment Process

Strategos Management Investment Philosophy

Focus on optimal security selection
Emphasize the credit sectors
Minimize interest rate risk
Construct portfolios with attractive risk/reward characteristics

The fixed income markets are efficient with respect to interest rate risk, but regularly misprice securities that are exposed to credit, structural, and liquidity risks. To exploit these inefficiencies and provide our clients with consistent excess returns, etc.
Investment Process
Strategos Management Investment Process

- Extensive Street Relationships
- ABS and CDO Product Sales Coverage
- Interaction with Traders, Structurers, and Syndicate Personnel
- New Issue and Secondary Activity
- Reverse Inquiry

- Watchlist
TRADING

- Strategos' professionals have extensive relationships with sell side groups, both in the ABS and CDO product areas.

- Sales coverage consists of seasoned product specialists in the ABS and CDO product areas.

- Strategos seeks direct contact with traders, structureurs, and syndicate members.

- Secondary trading forms a significant part of our activity, especially with respect to CDOs.

- Strategos also sources product through our regional bank relationships and direct reverse inquiry with issuers.

E. Biographical Information
Biographical Information
Investment Committee

Daniel G. Cohen
Mr. Cohen has been Chairman of the Board of Directors of The Bancorp, Inc. (a bank holding company) since 2000, and served as Chief Executive Officer for The Bancorp, Inc. from 1999 to 2000. Since 2001, he has also served as Chairman, Chief Executive Officer and President of Cohen Bros. Mr. Cohen serves as Chairman of Strategos Capital Management, LLC. From 1995 to 2000, Mr. Cohen served as an officer of Resource America (NASDAQ "REXI"), serving as its President and Chief Operating Officer from 1998 to 2000. From 1997 to 1999, Mr. Cohen was a director of Jefferson Bank of Pennsylvania, a commercial bank acquired by Hudson United Bancorp in 1999 that grew to $3.5 billion in assets.

James J. McEntee, III
Mr. McEntee is the Chief Operating Officer of Cohen Bros and serves as Vice-Chairman for Strategos Capital Management, LLC. He was previously the co-founding and co-managing Partner of Harron Capital, LP, a $100 million private equity fund. In addition, he was a Partner and Chairman of the Business Department of the law firm of Lamb, Windle & McErlane, with extensive experience representing the firm’s banking clients. He is also a director of The Bancorp, a bank holding company.

Alex P. Cigolle, CFA
Mr. Cigolle serves as Chief Investment Officer of Strategos Capital Management, LLC. From 2000 to 2004 Mr. Cigolle served as Vice President of Delaware Investments in the Structured Products Group. At Delaware Investments Mr. Cigolle directed the trading and structuring of collateralized debt obligations (CDOs). In addition, Mr. Cigolle was responsible for credit analysis of various structured products including ABS, MBS, and CDOs. Prior to that Mr. Cigolle was employed with Banc of America Securities where he was a structurer in the Structured Credit Products Group. Mr. Cigolle is a graduate of the Massachusetts Institute of Technology where he earned a bachelor’s degree in economics.
COHEN BROS.
FINANCIAL, LLC

Biographical Information
Investment Professionals

David Nathaniel
Mr. Nathaniel joined Cohen Brothers in January 2005. Mr. Nathaniel will serve as Chief Operating Officer of Strategos Capital Management. Prior to joining Cohen Brothers Mr. Nathaniel served as Chief Investment Officer of Mivtachim Pension Funds, the largest pension fund in Israel, from 2002 to 2005. Before that Mr. Nathaniel managed a $500 million portfolio of real estate assets for Gmul Investments Ltd. Mr. Nathaniel received a BA in Economics from Hebrew University in 1990 and an MBA from Tel Aviv University in 1995.

Joseph Messineo
Mr. Messineo is Director of Trading for Strategos Capital Management, LLC. He joined Cohen Bros. in 2002 after working at PaineWebber where he was a sales trader of mortgage backed securities. Prior to that he traded natural gas with U.S. and foreign energy companies for Power Merchants Group until 1999. He graduated from Drexel University in Philadelphia, PA with a double major in finance and marketing in 1996.

Matthew C. Nannen
Mr. Nannen joined Strategos Capital Management, LLC in 2005 as the Director of Surveillance with responsibilities in ABS Structuring and Credit Analysis. Mr. Nannen previously worked for Delaware Investments for seven years as an Assistant Vice President in charge of CDO and Structured Products surveillance and administration. He was also an Audit Manager in the Financial Services Industry of Ernst & Young LLP for six years. He received a bachelor's degree from The Pennsylvania State University. He is a Certified Public Accountant and Level II CFA candidate.

Nadia Khayat
Ms. Khayat is responsible for analytics and surveillance at Strategos Capital Management, LLC. Ms. Khayat holds an undergraduate degree in Management and Economics from the University of Damascus and a Masters of Business Administration degree from Villanova University. Before coming to the States she worked for four years with a regional computer peripheral distributor in the capacity of a general Manager Assistant.

Michael Ludlow
Mr. Ludlow is responsible for trading and analysis at Strategos Capital Management, LLC. Mr. Ludlow received his undergraduate degree in Business Administration from Villanova University. After spending time on the floor of the Philadelphia Stock Exchange and First Union Securities while in school, he joined Wachovia Securities soon after graduation. While at Wachovia Securities, Mr. Ludlow supported brokers in both the Investor Services Group and Private Client Group before joining Cohen Brothers in January of this year. Outside of Strategos, he serves as Treasurer for the Greater Philadelphia Villanova Alumni Chapter.
Biographical Information
Cohen Bros. Resources

Raphael Licht
Raphael Licht is a Vice President and counsel to Cohen Bros. & Company. From June 1996 to October 1997, and again from January 2002 to 2003, Mr. Licht practiced corporate, securities and real estate law with the law firm of Ledgewood Law Firm, P.C. From October 1997 to August 2000 Mr. Licht was an associate with the law firm of Morgan, Lewis & Bockius, L.P., where his practice specialized in structured finance and securitization. From August 2000, to January 2002, Mr. Licht was general counsel of iATMglobel.net Corporation, a financial services consulting and software company.

Kenneth R. Smith
Presently Mr. Smith manages the operations and compliance functions for Cohen Bros. & Co. Prior to starting Cohen Bros. & Company he worked in various management roles with JP Morgan and the Vanguard Group of Investment Companies. Mr. Smith also served in the United States Air Force for six years.

Andrew Hohns
Mr. Hohns has been with Cohen Bros and Co. from its inception. He focuses on equity markets for the firm's structured credit vehicles and real estate products. He has extensive experience with financial services collateral and credits, participating in the formation of the Alesco and Dekania transactions. He is a graduate of the Wharton School at the University of Pennsylvania.

Brian James
Brian James is responsible for Institutional Sales at Cohen Bros and Co. Mr. James most recently managed the Western Taxable Fixed Income desk at UBS. Prior to that he worked in a money market group at Bank America that focused on product origination. Mr. James, a graduate of Greensboro College, is a member of both the Association for Investment Management and Research and the New York Society of Securities Analysts.

Alvar Soosaar
Mr. Soosaar joined Cohen Bros. & Co in April 2004 as an Equity Analyst in the Research Department. He is responsible for equity coverage of non-bank financial services companies. Mr. Soosaar comes to Cohen Bros. from Gallatin & Company, LLC, a Scarsdale, NY-based investment adviser, where he worked as an analyst and assistant to the president, in both research and compliance. Prior to Gallatin, he was at SNL Financial first as a reporter covering non-bank financial services companies, then as Editor of two biweekly merger publications. Mr. Soosaar graduated from the University of Virginia.
6. Tax Considerations
Tax Considerations

The following is a general discussion of the US federal income tax consequences of investment in securities issued by CDO issuers. The precise tax consequences of investment in the Offered Securities may vary based on the terms thereof and the circumstances of particular prospective investors.

U.S. Holders Federal Income Tax Considerations

- Noteholders will be required to treat the Notes as debt for U.S. Federal income tax purposes. It is expected that the Class A Notes and the Class B Notes will, and the Class C and Class D Notes should, be treated as debt for U.S. Federal income tax purposes.

- The Class C and Class D Notes may be issued with original issue discount ("OID"). A U.S. holder of a Note issued with OID generally must accrue OID into income on a constant yield to maturity basis without regard to cash payments actually received from the Issuer which could result in such U.S. holder owing tax on "phantom income." U.S. holders of Preference Shares (and Notes that are treated as equity interests for U.S. Federal income tax purposes) will be treated as owning an interest in a "passive foreign investment company" ("PFIC") and are strongly urged to consult their tax advisors on the advisability of electing to treat the Issuer as a "Qualifying Electing Fund" ("QEF").

- Upon such election, a U.S. holder will be required to currently include its pro rata share of the Issuer's ordinary income and net capital gains without regard to the cash distributions actually received from the Issuer which could result in a U.S. holder owing tax on significant amounts of "phantom income." In the absence of such an election, a U.S. holder will be subject to potentially significant tax charges on gains on disposition and certain "excess" distributions (generally, distributions in any year exceeding 125% of the average amount received during the three preceding years or, if shorter, the U.S. holder's holding period). QEF inclusions or distributions from a PFIC are not eligible for either (i) the dividends received deduction or (ii) the preferential rate on dividend income.

- The Issuer could also be a controlled foreign corporation if U.S. persons that each own at least 10% of the Issuer's voting equity (for U.S. Federal income tax purposes) together own more than 50% of the Issuer's equity. If the Issuer were a CFC, a U.S. holder that owned 10% or more of the Issuer's voting equity (for U.S. Federal income tax purposes) (i) would not be subject to the PFIC rules described above and (ii) would recognize each year as ordinary income its pro rata share of the Issuer's "subpart F income" (which in the case of the Issuer would be its net earnings) without regard to the cash distributions actually received from the Issuer which could result in such 10% U.S. holder owing tax on significant amounts of "phantom income." Subpart F inclusions are generally not eligible for either (i) the dividends received deduction or (ii) the preferential rate on dividend income.

- U.S. investors that acquire Preference Shares (and/or Notes that are treated as equity interests for U.S. Federal income tax purposes) at issuance will be required to file a Form 926 or a similar form with the U.S. Internal Revenue Service. In the event that such U.S. holder fails to file any such required form, such U.S. holder could be subject to a penalty (generally up to a maximum of $100,000, computed in the amount of 10% of the fair market value of the securities purchased by such U.S. holder. Certain tax shelter reporting requirements may also apply to such a U.S. holder.

- A U.S. tax-exempt investor should generally not be subject to unrelated business income tax ("UBIT") as a result of an investment in the Notes or the Preferred Shares unless such investor either (i) holds more than 50% of the Preferred Shares and also holds Notes or (ii) holds Notes or Preferred Shares that are debt-financed property.

- The Issuer expects to conduct its affairs so that it will not be treated as engaged in a trade or business within the United States for U.S. Federal income tax purposes, and accordingly, its income will not be subject to U.S. Federal income tax on a net income basis. The Issuer also expects that interest income from Collateral Debt Securities generally will not be subject to withholding tax imposed by the United States or other countries.

- If the assets of the Issuer were insufficient to repay the U.S. holders of the Preference Shares or Notes in full, such holders would generally recognize a capital loss on their investment for U.S. Federal income tax purposes. In addition, a U.S. holder may be limited in its ability to use such capital losses to offset income previously recognized with respect to the Preference Shares or Notes.

PROSPECTIVE INVESTORS SHOULD READ THE DISCUSSION OF U.S. TAX CONSIDERATIONS IN THE OFFERING CIRCULAR TO BE PROVIDED, WHICH WILL INCLUDE MORE DETAILED INFORMATION REGARDING THE MATTERS ABOVE. U.S. HOLDERS OF THE SECURITIES SHOULD ALSO CONSULT THEIR OWN TAX ADVISORS. PROSPECTIVE INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISORS.

(1) This expected treatment is based on transaction numbers as of the date of this document and may be subject to change.
(2) As of the closing date, based on final transaction numbers, it is possible that other Note classes could be issued with OID.
Appendix A: Collateral Cashflow Formulas
Appendix A
Collateral Cashflow Formulas

Calculation of Collateral Defaults in each Period

\[ \text{Defaults} = \frac{B \times D}{PPY} \]

*where:*

- \( B \) = Beginning performing collateral balance (w/o reduction for current amortization or prepayments)
- \( D \) = Annual Default rate (\%)
- \( PPY \) = number of payments per year (e.g. 4 for quarterly)

Calculation of Interest Payments in each Period

\[ \text{Interest} = (B - \text{Defaults}) \times C \times DCF \]

*where:*

- \( B \) = Beginning performing collateral balance (w/o reduction for current amortization or prepayments)
- \( \text{Defaults} \) = defaults in the current period
- \( C \) = collateral interest rate for the period
- \( DCF \) = collateral daycount fraction for the period (expressed in years)
Appendix B: Additional Definitions
Appendix B
Additional Definitions(1)(2)

Interest Coverage Ratio:
The sum with respect to any Due Period, without duplication, of (i) the scheduled interest payments due (in each case regardless of whether the due date for any such interest payment has yet occurred) in the Due Period in which such Measurement Date occurs on (x) the Collateral Debt Securities (other than Interest Only Securities that are not Qualifying Interest Only Securities), (y) any Eligible Investments held in the Collection Accounts (whether such Eligible Investments were purchased with Interest Proceeds or Principal Proceeds) and (z) any investments held in each Synthetic Security Counterparty Account, plus (ii) any fees actually received by the Issuer during such Due Period that constitute Interest Proceeds plus (iii) the amount, if any, scheduled to be paid to the Issuer by the Interest Rate Hedge Counterparty under the Interest Rate Hedge Agreement on the Distribution Date relating to such Due Period and the amount, if any, to be paid by each Synthetic Security Counterparty on each Defeased Synthetic Security on or prior to the Distribution Date relating to such Due Period, minus (iv) the amount, if any, scheduled to be paid to the Interest Rate Hedge Counterparty by the Issuer under the Interest Rate Hedge Agreement on the Distribution Date relating to such Due Period minus (v) the amount, if any, scheduled to be paid pursuant to paragraph (1) under the Interest Proceeds Priority of Payments for accrued and unpaid administrative expenses of the Co-Issuers minus (vi) the amount, if any, scheduled to be paid to the Collateral Manager of accrued and unpaid Senior Collateral Management Fees plus (vii) the amount released from the Interest Equalization Account for deposit into the Interest Collection Account with respect to such Due Period minus (viii) the portion of the scheduled payments of interest on Semi-Annual Pay Securities due in such Due Period required to be deposited into the Interest Equalization Account; divided by
(b) an amount equal to the sum of the scheduled interest on such class of notes and any notes senior to such class. (including any Defaulted Interest thereon and any accrued interest on such Defaulted Interest) payable on the immediately succeeding Distribution Date

Overcollateralization Ratio:
As of any Measurement Date, the number (expressed as a percentage) calculated by dividing (a) the Net Outstanding Portfolio Collateral Balance on such Measurement Date by the sum of (b) the aggregate outstanding principal amount of such class of notes and any notes senior to such class.

(1) Each Class of Notes shall, on any Distribution Date, be subject to mandatory redemption in the event that any Coverage Test applicable to any Class of Notes is not satisfied on the related Determination Date. Any such redemption will be effected, first, from Interest Proceeds and, second (to the extent that the application of Interest Proceeds pursuant to the Priority of Payments would be insufficient to cause such tests to be satisfied), from Principal Proceeds, in each case to the extent necessary to cause each applicable Coverage Test to be satisfied. Any such redemption will be applied to each outstanding Class of Notes in accordance with its relative seniority and will otherwise be effected as described under “Description of the Notes — Priority of Payments,” in the relevant offering circular. In some circumstances in certain transactions, redemption will be applied to each outstanding Class of Notes in reserve order of seniority. Definitions vary from transaction to transaction. For the definition in any given transaction, see the relevant documents for that transaction.
(2) OC and IC test levels are not a definitive indicator of transaction performance. Potential investors are urged to conduct their own investigation regarding the underlying asset classes, including reviewing relevant documents for the transactions noted and obtaining additional information regarding the underlying collateral. A review of the structure of each transaction is necessary in order to fully evaluate that transaction’s performance.
