Available Information

We file annual, quarterly and current reports, proxy statements and other information with the Securities and Exchange Commission (“SEC”). You may read and copy any document we file with the SEC at the SEC’s Public Reference Room at 100 F Street, NE, Room 1580, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for information on the Public Reference Room. The SEC maintains an internet site that contains annual, quarterly and current reports, proxy and information statements and other information that we file electronically with the SEC. The SEC’s internet site is www.sec.gov.

Our internet address is www.ml.com, and the investor relations section of our website can be accessed directly at www.ir.ml.com. We make available, free of charge, our proxy statements, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934.

These reports are available through our website as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the SEC. We have also posted on our website corporate governance materials including our Guidelines for Business Conduct, Code of Ethics for Financial Professionals, Director Independence Standards, Corporate Governance Guidelines, Related Party Transactions Policy and charters for the committees of our Board of Directors. In addition, our website includes information on purchases and sales of our equity securities by our executive officers and directors, as well as disclosures relating to certain non-GAAP financial measures (as defined in the SEC’s Regulation G) that we may make public orally, telephonically, by webcast, by broadcast or by similar means from time to time.

We will post on our website amendments to our Guidelines for Business Conduct and Code of Ethics for Financial Professionals and any waivers that are required to be disclosed by the rules of either the SEC or the New York Stock Exchange. You can obtain printed copies of these documents, free of charge, upon written request to Judith A. Witterschein, Corporate Secretary, Merrill Lynch & Co., Inc., 222 Broadway, 17th Floor, New York, NY 10038 or by email at corporatesecretary@ml.com. The information on websites referenced herein is not incorporated by reference into this Report.

Merrill Lynch & Co., Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements (Unaudited)
June 29, 2007

Note 1. Summary of Significant Accounting Policies

For a complete discussion of Merrill Lynch's accounting policies, refer to the Annual Report on Form 10-K for the year ended December 29, 2006 ("2006 Annual Report").

Basis of Presentation

The Condensed Consolidated Financial Statements include the accounts of Merrill Lynch & Co., Inc. ("ML & Co.") and subsidiaries (collectively, "Merrill Lynch"). The Condensed Consolidated Financial Statements are presented in accordance with U.S. Generally Accepted Accounting Principles, which include industry practices. Intercompany transactions and balances have been eliminated. The interim Condensed Consolidated Financial Statements for the three- and six-month periods are unaudited; however, in the opinion of Merrill Lynch management, all adjustments (consisting of normal recurring accruals) necessary for a fair statement of the Condensed Consolidated Financial Statements have been included.

These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements included in the 2006 Annual Report. The nature of Merrill Lynch's business is such that the results of any interim period are not necessarily indicative of results for a full year. In presenting the Condensed Consolidated Financial Statements, management makes estimates that affect the reported amounts and disclosures in the financial statements. Estimates, by their nature, are based on judgment and available information. Therefore, actual results could differ from those estimates and could have a material impact on the Condensed Consolidated Financial Statements, and it is possible that such changes could occur in the near term. Certain reclassifications have been made to the prior period financial statements to conform to the current period presentation.

Merrill Lynch offers a broad array of products and services to its diverse client base of individuals, small to mid-size businesses, employee benefit plans, corporations, financial institutions, and governments around the world. These products and services are offered from a number of locations globally. In some cases, the same or similar products and services may be offered to both individual and institutional clients, utilizing the same infrastructure. In other cases, a single infrastructure may be used to support multiple products and services offered to clients. When Merrill Lynch analyzes its profitability, it does not focus on the profitability of a single product or service. Instead, Merrill Lynch looks at the profitability of businesses offering an array of products and services to various types of clients. The profitability of the products and services offered to individuals, small to mid-size businesses, and employee benefit plans is analyzed separately from the profitability of products and services offered to corporations, financial institutions, and governments, regardless of whether there is commonality in products and services infrastructure. As such, Merrill Lynch does not separately disclose the costs associated with the products and services sold or general and administrative costs either in total or by product.

When determining the prices for products and services, Merrill Lynch considers multiple factors, including prices being offered in the market for similar products and services, the competitiveness of its pricing compared to competitors, the profitability of its businesses and its overall profitability, as well as the profitability, creditworthiness, and importance of the overall client relationships.

Table of Contents

Shared expenses that are incurred to support products and services and infrastructures are allocated to the businesses based on various methodologies, which may include headcount, square footage, and certain other criteria. Similarly, certain revenues may be shared based upon agreed methodologies. When looking at the profitability of various businesses, Merrill Lynch considers all expenses incurred, including overhead and the costs of shared services, as all are considered integral to the operation of the businesses.

Consolidation Accounting Policies

The Condensed Consolidated Financial Statements include the accounts of Merrill Lynch, whose subsidiaries are generally controlled through a majority voting interest. In certain cases, Merrill Lynch subsidiaries may also be consolidated based on a risks and rewards approach. Merrill Lynch does not consolidate those special purpose entities that meet the criteria of a qualified special purpose entity (“QSPE”).

Merrill Lynch determines whether it is required to consolidate an entity by first evaluating whether the entity qualifies as a voting rights entity (“VRE”), a variable interest entity (“VIE”), or a QSPE.

VREs — In accordance with the guidance in Financial Accounting Standards Board (“FASB”) Interpretation No. 46, *Consolidation of Variable Interest Entities — an interpretation of ARB No. 51*

(“FIN 46R”), VREs consolidated by Merrill Lynch have both equity at risk that is sufficient to fund future operations and have equity investors with decision making ability that absorb the majority of the expected losses and expected returns of the entity. In accordance with Statement of Financial Accounting Standards (“SFAS”) No. 94, *Consolidation of All Majority-Owned Subsidiaries* (“SFAS No. 94”), Merrill Lynch generally consolidates those VREs where it holds a controlling financial interest. For investments in limited partnerships and certain limited liability corporations that Merrill Lynch does not control, Merrill Lynch applies Emerging Issues Task Force (“EITF”) Topic D-46, *Accounting for Limited Partnership Investments*, which requires use of the equity method of accounting for investors that have more than a minor influence, which is typically defined as an investment of greater than 3% of the outstanding equity in the entity. For more traditional corporate structures, in accordance with Accounting Principles Board Opinion No. 18, *The Equity Method of Accounting for Investments in Common Stock*, Merrill Lynch applies the equity method of accounting, where it has significant influence over the investee. Significant influence can be evidenced by a significant ownership interest (which is generally defined as voting interest of 20% to 50%), significant board of director representation, or other contracts and arrangements.

VIEs — Those entities that do not meet the VRE criteria as defined in FIN 46R are generally analyzed for consolidation as either VIEs or QSPEs. Merrill Lynch consolidates those VIEs in which it absorbs the majority of the variability in expected losses and/or the variability in expected returns of the entity as required by FIN 46R. Merrill Lynch relies on a quantitative and/or qualitative analysis, including an analysis of the design of the entity, to determine if it is the primary beneficiary of the VIE and therefore must consolidate the entity.

QSPEs — QSPEs are passive entities with significantly limited permitted activities. QSPEs are generally used as securitization vehicles and are limited in the type of assets they may hold, the derivatives that they can enter into and the level of discretion they may exercise through servicing activities. In accordance with SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities* (“SFAS No. 140”), and FIN 46R, Merrill Lynch does not consolidate QSPEs.

Table of Contents

Revenue Recognition

Principal transactions revenues include both realized and unrealized gains and losses on trading assets and trading liabilities and investment securities classified as trading investments. Gains and losses are recognized on a trade date basis.

Commissions revenues includes commissions, mutual fund distribution fees and contingent deferred sales charge revenue, which are all accrued as earned. Commissions revenues also includes mutual fund redemption fees, which are recognized at the time of redemption. Commissions revenues earned from certain customer equity transactions are recorded net of related brokerage, clearing and exchange fees.

Investment banking revenues include underwriting revenues and fees for merger and acquisition advisory services, which are accrued when services for the transactions are substantially completed. Transaction-related expenses are deferred to match revenue recognition. Investment banking and advisory services revenues are presented net of transaction-related expenses.

Managed accounts and other fee-based revenues primarily consist of asset-priced portfolio service fees earned from the administration of separately managed accounts and other investment accounts for retail investors, annual account fees, and certain other account-related fees. In addition, until the merger of our Merrill Lynch Investment Management (“MLIM”) business with BlackRock, Inc. (“BlackRock”) at the end of the third quarter of 2006 (“BlackRock merger”), managed accounts and other fee-based revenues also included fees earned from the management and administration of retail mutual funds and institutional funds such as pension assets, and performance fees earned on certain separately managed accounts and institutional money management arrangements. For additional information regarding the BlackRock merger, refer to Note 2 of the 2006 Annual Report.

Revenues from consolidated investments and expenses of consolidated investments are related to investments that are consolidated under SFAS No. 94 and FIN 46R.

Other revenues include revenues associated with Merrill Lynch’s private equity investments, earnings from investments accounted for using the equity method and other miscellaneous revenues.

Financial Instruments

Fair value is used to measure many of our financial instruments. The fair value of a financial instrument is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

Merrill Lynch early adopted the provisions of SFAS No. 157, *Fair Value Measurements* (“SFAS No. 157”) in the first quarter of 2007. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. SFAS No. 157 nullifies the guidance provided by EITF Issue No. 02-3, *Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities* (“EITF 02-3”), which prohibited recognition of day one gains or losses on derivative transactions where model inputs that significantly impact valuation are not observable.

Merrill Lynch also early adopted SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (“SFAS No. 159”) in the first quarter of 2007 for certain financial instruments. Such instruments include certain structured debt, repurchase and resale agreements, loans, available-for-sale securities and non-qualifying investments. The changes in fair value of these instruments are

Table of Contents

recorded in either principal transactions revenues or other revenues in the Condensed Consolidated Statement of Earnings. See Note 3 to the Condensed Consolidated Financial Statements for further information.

In presenting the Condensed Consolidated Financial Statements, management makes estimates regarding valuations of assets and liabilities requiring fair value measurements. These assets and liabilities include:

- Trading inventory and investment securities;
- Private equity and principal investments;
- Certain receivables under resale agreements and payables under repurchase agreements;
- Loans and allowance for loan losses; and
- Certain long-term borrowings, primarily structured debt.

A discussion of certain areas in which estimates are a significant component of the amounts reported in the Condensed Consolidated Financial Statements follows:

Trading Assets and Liabilities

Trading assets and liabilities are accounted for at fair value with realized and unrealized gains and losses reported in earnings. Fair values of trading securities are based on quoted market prices, pricing models (utilizing a variety of inputs including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates, and correlations of such inputs), or management's estimates of amounts to be realized on settlement. Estimating the fair value of certain illiquid securities requires significant management judgment. Merrill Lynch values trading security assets at the institutional bid price and recognizes bid-offer revenues when the assets are sold. Trading security liabilities are valued at the institutional offer price and bid-offer revenues are recognized when the positions are closed.

Fair values for over-the-counter ("OTC") derivative financial instruments, principally forwards, options, and swaps, represent the present value of amounts estimated to be received from or paid to a marketplace participant in settlement of these instruments (i.e., the amount Merrill Lynch would expect to receive in a derivative asset assignment or would expect to pay to have a derivative liability assumed). These derivatives are valued using pricing models based on the net present value of estimated future cash flows and directly observed prices from exchange-traded derivatives, other OTC trades, or external pricing services, while taking into account the counterparty's credit ratings, or Merrill Lynch's own credit ratings, as appropriate. Determining the fair value for OTC derivative contracts can require a significant level of estimation and management judgment.

New and/or complex instruments may have immature or limited markets. As a result, the pricing models used for valuation often incorporate significant estimates and assumptions that market participants would use in pricing the instrument, which may impact the results of operations reported in the Condensed Consolidated Financial Statements. For long-dated and illiquid contracts, extrapolation methods are applied to observed market data in order to estimate inputs and assumptions that are not directly observable. This enables Merrill Lynch to mark to fair value all positions consistently when only a subset of prices are directly observable. Values for OTC derivatives are verified using observed information about the costs of hedging the risk and other trades in the market. As the markets for these products develop, Merrill Lynch continually refines its pricing models to correlate more closely to the market risk of these instruments. Prior to adoption of SFAS No. 157, Merrill Lynch followed the provisions of EITF 02-3. Under EITF 02-3, recognition of day one gains and losses on derivative transactions where model inputs that significantly impact valuation are not observable were prohibited. Day one gains and losses deferred at inception under EITF 02-3 were

Table of Contents

recognized at the earlier of when the valuation of such derivative became observable or at the termination of the contract. SFAS No. 157 nullifies this guidance in EITF 02-3.

Valuation adjustments are an integral component of the valuation process for financial instruments that are carried at fair value, but not traded in active markets (i.e., those transactions that are categorized in Levels 2 and 3 of the SFAS No. 157 fair value hierarchy. See Note 3 to the Condensed Consolidated Financial Statements for further information relating to the SFAS No. 157 fair value hierarchy.) These adjustments may be taken when either the sheer size of the trade or other specific features of the trade or particular market (such as counterparty credit quality or concentration or market liquidity) requires the valuation to be based on more than simple application of the pricing models, and other market participants would also consider such an adjustment in pricing the financial instrument. For financial instruments that may have quoted market prices but are subject to sales restrictions, Merrill Lynch estimates the fair value by taking into account such restrictions, which may result in a fair value that is less than the quoted market price.

Investment Securities

Marketable Investments

ML & Co. and certain of its non-broker-dealer subsidiaries follow the guidance prescribed by SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (“SFAS No. 115”) when accounting for investments in debt and publicly traded equity securities. Merrill Lynch classifies those debt securities that it has the intent and ability to hold to maturity as held-to-maturity securities. Held-to-maturity securities are carried at cost unless a decline in value is deemed other-than-temporary, in which case the carrying value is reduced. For Merrill Lynch, the trading classification under SFAS No. 115 generally includes those securities that are bought and held principally for the purpose of selling them in the near term, or securities that are economically hedged, or contain an embedded derivative under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (“SFAS No. 133”). Securities classified as trading are marked to fair value through earnings. All other qualifying securities are classified as available-for-sale with unrealized gains and losses reported in accumulated other comprehensive loss. Any unrealized losses deemed other-than-temporary are included in current period earnings and removed from accumulated other comprehensive loss.

Investment securities are reviewed for other-than-temporary impairment on a quarterly basis. The determination of other-than-temporary impairment requires judgment and will depend on several factors, including but not limited to the severity and duration of the decline in value of the investment securities and the financial condition of the issuer. To the extent that Merrill Lynch has the ability and intent to hold the investments for a period of time sufficient for a forecasted market price recovery up to or beyond the cost of the investment, no impairment charge will be recognized.

Private Equity Investments

Private equity investments that are not strategic, have defined exit strategies and are held for capital appreciation and/or current income are accounted for under the AICPA Accounting and Auditing Guide, *Investment Companies* (“the Guide”) and carried at fair value. Additionally, certain private equity investments that are not accounted for under the the Guide may be carried at fair value under the fair value option election in SFAS No. 159. Investments are adjusted to fair value when changes in the underlying fair values are readily ascertainable, generally based on specific events (for example recapitalizations and initial public offerings), or by using other valuation methodologies including expected cash flows and market comparables of similar companies.

Table of Contents

Securities Financing Transactions

Merrill Lynch enters into repurchase and resale agreements and securities borrowed and loaned transactions to accommodate customers and earn residual interest rate spreads (also referred to as “matched-book transactions”), obtain securities for settlement and finance inventory positions.

Resale and repurchase agreements are accounted for as collateralized financing transactions and may be recorded at their contractual amounts plus accrued interest or at fair value under the fair value option election in SFAS No. 159. Resale and repurchase agreements recorded at fair value are generally valued based on pricing models that use inputs with observable levels of price transparency. Changes in the fair value of resale and repurchase agreements are reflected in principal transactions revenues and the stated interest coupon is recorded as interest revenue or interest expense, respectively. For further information refer to Note 3 to the Condensed Consolidated Financial Statements.

Merrill Lynch’s policy is to obtain possession of collateral with a market value equal to or in excess of the principal amount loaned under resale agreements. To ensure that the market value of the underlying collateral remains sufficient, collateral is valued daily and Merrill Lynch may require counterparties to deposit additional collateral or may return collateral pledged when appropriate.

Substantially all repurchase and resale activities are transacted under master netting agreements that give Merrill Lynch the right, in the event of default, to liquidate collateral held and to offset receivables and payables with the same counterparty. Merrill Lynch offsets certain repurchase and resale agreement balances with the same counterparty on the Condensed Consolidated Balance Sheets.

Merrill Lynch may use securities received as collateral for resale agreements to satisfy regulatory requirements such as Rule 15c3-3 of the SEC.

Securities borrowed and loaned transactions are recorded at the amount of cash collateral advanced or received. Securities borrowed transactions require Merrill Lynch to provide the counterparty with collateral in the form of cash, letters of credit, or other securities. Merrill Lynch receives collateral in the form of cash or other securities for securities loaned transactions. For these transactions, the fees received or paid by Merrill Lynch are recorded as interest revenue or expense. On a daily basis, Merrill Lynch monitors the market value of securities borrowed or loaned against the collateral value, and Merrill Lynch may require counterparties to deposit additional collateral or may return collateral pledged, when appropriate.

All firm-owned securities pledged to counterparties where the counterparty has the right, by contract or custom, to sell or repledge the securities are disclosed parenthetically in trading assets or, if applicable, in investment securities on the Condensed Consolidated Balance Sheets.

In transactions where Merrill Lynch acts as the lender in a securities lending agreement and receives securities that can be pledged or sold as collateral, it recognizes an asset on the Condensed Consolidated Balance Sheets, representing the securities received (securities received as collateral), and a liability for the same amount, representing the obligation to return those securities (obligation to return securities received as collateral). The amounts on the Condensed Consolidated Balance Sheets result from non-cash transactions.

Loans and Allowance for Loan Losses

Certain loans held by Merrill Lynch are carried at fair value or lower of cost or fair value, and estimation is required in determining these fair values. The fair value of loans made in connection with commercial lending activity, consisting primarily of senior debt, is primarily estimated using discounted

Table of Contents

cash flows or the market value of publicly issued debt instruments. Merrill Lynch's estimate of fair value for other loans, notes, and mortgages is determined based on the individual loan characteristics. For certain homogeneous categories of loans, including residential mortgages, automobile loans, and home equity loans, fair value is estimated using market price quotations or previously executed transactions for securities backed by similar loans, adjusted for credit risk and other individual loan characteristics.

Loans held for investment are carried at cost, less a provision for loan losses. This provision for loan losses is based on management's estimate of the amount necessary to maintain the allowance at a level adequate to absorb probable incurred loan losses. Management's estimate of loan losses is influenced by many factors, including adverse situations that may affect the borrower's ability to repay, current economic conditions, prior loan loss experience, and the estimated fair value of any underlying collateral. The fair value of collateral is generally determined by third-party appraisals in the case of residential mortgages, quoted market prices for securities, or other types of estimates for other assets. Management's estimate of loan losses includes judgment about collectibility based on available information at the balance sheet date, and the uncertainties inherent in those underlying assumptions. While management based its estimates on the best information available, future adjustments to the allowance may be necessary as a result of changes in the economic environment or variances between actual results and the original assumptions.

Derivatives

A derivative is an instrument whose value is derived from an underlying instrument or index such as a future, forward, swap, or option contract, or other financial instrument with similar characteristics.

Derivative contracts often involve future commitments to exchange interest payment streams or currencies based on a notional or contractual amount (e.g., interest rate swaps or currency forwards) or to purchase or sell other financial instruments at specified terms on a specified date (e.g., options to buy or sell securities or currencies). Derivative activity is subject to Merrill Lynch's overall risk management policies and procedures.

SFAS No. 133, as amended, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts ("embedded derivatives") and for hedging activities. SFAS No. 133 requires that an entity recognize all derivatives as either assets or liabilities in the Condensed Consolidated Balance Sheets and measure those instruments at fair value. The fair value of all derivatives is recorded on a net-by-counterparty basis on the Condensed Consolidated Balance Sheets where management believes a legal right of setoff exists under an enforceable netting agreement.

The accounting for changes in fair value of a derivative instrument depends on its intended use and if it is designated and qualifies as an accounting hedging instrument.

Merrill Lynch enters into derivatives to facilitate client transactions, for proprietary trading and financing purposes, and to manage risk exposures arising from trading assets and liabilities. Derivatives entered into for these purposes are recognized at fair value on the Condensed Consolidated Balance Sheets as trading assets and liabilities in contractual agreements, and changes in fair value are reported in current period earnings as principal transactions revenues.

Merrill Lynch also enters into derivatives in order to manage risk exposures arising from assets and liabilities not carried at fair value as follows:

1. Merrill Lynch routinely issues debt in a variety of maturities and currencies to achieve the lowest cost financing possible. In addition, Merrill Lynch's regulated bank entities accept time deposits of

Table of Contents

varying rates and maturities. Merrill Lynch enters into derivative transactions to hedge these liabilities. Derivatives used most frequently include swap agreements that:

- Convert fixed-rate interest payments into variable payments;
 - Change the underlying interest rate basis or reset frequency; and
 - Change the settlement currency of a debt instrument.
2. Merrill Lynch enters into hedges on marketable investment securities to manage the interest rate risk, currency risk, and net duration of its investment portfolios.
 3. Merrill Lynch enters into fair value hedges of long-term fixed rate resale and repurchase agreements to manage the interest rate risk of these assets and liabilities.
 4. Merrill Lynch uses foreign-exchange forward contracts, foreign-exchange options, currency swaps, and foreign-currency-denominated debt to hedge its net investments in foreign operations. These derivatives and cash instruments are used to mitigate the impact of changes in exchange rates.
 5. Merrill Lynch enters into futures, swaps, options and forwards to manage the price risk of certain commodity inventory.

Derivatives entered into by Merrill Lynch to hedge its funding, marketable investment securities and net investments in foreign subsidiaries are reported at fair value in other assets or interest and other payables on the Condensed Consolidated Balance Sheets. Derivatives used to hedge commodity inventory are included in trading assets and trading liabilities on the Condensed Consolidated Balance Sheets.

Derivatives that qualify as accounting hedges under the guidance in SFAS No. 133 are designated on the date they are entered into as one of the following:

1. A hedge of the fair value of a recognized asset or liability (“fair value” hedge). Changes in the fair value of derivatives that are designated and qualify as fair value hedges of interest rate risk, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk, are recorded in current period earnings as interest revenue or expense. Changes in the fair value of derivatives that are designated and qualify as fair value hedges of commodity price risk, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk, are recorded in current period earnings in principal transactions.
2. A hedge of the variability of cash flows to be received or paid related to a recognized asset or liability (“cash flow” hedge). Changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recorded in accumulated other comprehensive loss until earnings are affected by the variability of cash flows of the hedged asset or liability (e.g., when periodic interest accruals on a variable-rate asset or liability are recorded in earnings).
3. A hedge of a net investment in a foreign operation. Changes in the fair value of derivatives that are designated and qualify as hedges of a net investment in a foreign operation are recorded in the foreign currency translation adjustment account within accumulated other comprehensive loss. Changes in the fair value of the hedge instruments that are associated with the difference between the spot translation rate and the forward translation rate are recorded in current period earnings in other revenues.

Merrill Lynch formally assesses, both at the inception of the hedge and on an ongoing basis, whether the hedging derivatives are highly effective in offsetting changes in fair value or cash flows of hedged items. When it is determined that a derivative is not highly effective as a hedge, Merrill Lynch

Table of Contents

discontinues hedge accounting. Under the provisions of SFAS No. 133, 100% hedge effectiveness is assumed for those derivatives whose terms meet the conditions of SFAS No. 133 “short-cut method.” As noted above, Merrill Lynch enters into fair value hedges of interest rate exposure associated with certain investment securities and debt issuances. Merrill Lynch uses interest rate swaps to hedge this exposure. Hedge effectiveness testing is required for certain of these hedging relationships on a quarterly basis. Merrill Lynch assesses effectiveness on a prospective basis by comparing the expected change in the price of the hedge instrument to the expected change in the value of the hedged item under various interest rate shock scenarios. In addition, Merrill Lynch assesses effectiveness on a retrospective basis using the dollar-offset ratio approach. When assessing hedge effectiveness, there are no attributes of the derivatives used to hedge the fair value exposure that are excluded from the assessment. Merrill Lynch also enters into fair value hedges of commodity price risk associated with certain commodity inventory. For these hedges, Merrill Lynch assesses effectiveness on a prospective and retrospective basis using regression techniques. The difference between the spot rate and the contracted forward rate which represents the time value of money is excluded from the assessment of hedge effectiveness and is recorded in principal transactions.

Changes in the fair value of derivatives that are economically used to hedge non-trading assets and liabilities but that do not meet the criteria in SFAS No. 133 to qualify as an accounting hedge are reported in current period earnings as either principal transactions revenues, other revenues or expenses, or interest revenues or expenses, depending on the nature of the transaction.

Hybrid Financial Instruments

Merrill Lynch issues structured debt instruments that have coupons or repayment terms linked to the performance of debt or equity securities, indices, currencies, or commodities, generally referred to as hybrid debt instruments. The contingent payment components of these obligations may meet the definition in SFAS No. 133 of an “embedded derivative.” Historically, these hybrid debt instruments were assessed to determine if the embedded derivative required separate reporting and accounting, and if so, the embedded derivative was accounted for at fair value and reported in long-term borrowings on the Condensed Consolidated Balance Sheets along with the debt obligation. Changes in the fair value of the embedded derivative and related economic hedges were reported in principal transactions revenues. Separating an embedded derivative from its host contract required careful analysis, judgment, and an understanding of the terms and conditions of the instrument. Beginning in the first quarter of 2007, Merrill Lynch elected the fair value option in SFAS No. 159 for all hybrid debt instruments issued subsequent to December 29, 2006. Changes in fair value of the entire hybrid debt instrument are reflected in principal transactions revenues and the stated interest coupon is recorded as interest expense. For further information refer to Note 3 to the Condensed Consolidated Financial Statements.

Merrill Lynch may also purchase financial instruments that contain embedded derivatives. These instruments may be part of either trading inventory or trading marketable investment securities. These instruments are generally accounted for at fair value in their entirety; the embedded derivative is not separately accounted for, and all changes in fair value are reported in principal transactions revenues.

Securitization Activities

In the normal course of business, Merrill Lynch securitizes: commercial and residential mortgage loans and home equity loans; municipal, government, and corporate bonds; and other types of financial assets. Merrill Lynch may retain interests in the securitized financial assets through holding tranches of the securitization. In accordance with SFAS No. 140, Merrill Lynch recognizes transfers of financial

Table of Contents

assets as sales, provided control has been relinquished. Control is considered to be relinquished when all of the following conditions have been met:

- a. The transferred assets have been legally isolated from the transferor even in bankruptcy or other receivership;
- b. The transferee has the right to pledge or exchange the assets it received or, if the entity is a QSPE, the beneficial interest holders have that right; and
- c. The transferor does not maintain effective control over the transferred assets (e.g. the ability to unilaterally cause the holder to return specific transferred assets).

Stock Based Compensation

Merrill Lynch adopted the provisions of Statement No. 123 (revised 2004), *Share-Based Payment*, a revision of SFAS No. 123, *Accounting for Stock-Based Compensation* (“SFAS No. 123R”) beginning in the first quarter of 2006. Under SFAS No. 123R, compensation expenses for share-based awards that do not require future service are recorded immediately, and share-based awards that require future service continue to be amortized into expense over the relevant service period. Merrill Lynch adopted SFAS No. 123R under the modified prospective method whereby the provisions of SFAS No. 123R are generally applied only to share-based awards granted or modified subsequent to adoption. Thus, for Merrill Lynch, SFAS No. 123R required the immediate expensing of share-based awards granted or modified in 2006 to retirement-eligible employees, including awards that are subject to non-compete provisions.

Prior to the adoption of SFAS No. 123R, Merrill Lynch had recognized expense for share-based compensation over the vesting period stipulated in the grant for all employees. This included those who had satisfied retirement eligibility criteria but were subject to a non-compete agreement that applied from the date of retirement through each applicable vesting period. Previously, Merrill Lynch had accelerated any unrecognized compensation cost for such awards if a retirement-eligible employee left Merrill Lynch. However, because SFAS No. 123R applies only to awards granted or modified in 2006, expenses for share-based awards granted prior to 2006 to employees who were retirement-eligible with respect to those awards must continue to be amortized over the stated vesting period.

New Accounting Pronouncements

In June 2007, the Accounting Standards Executive Committee of the AICPA issued Statement of Position 07-1, *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* (“SOP 07-1”). The intent of SOP 07-1 is to clarify which entities are within the scope of the AICPA Audit and Accounting Guide, *Investment Companies* (the “Guide”). For those entities that are investment companies under SOP 07-1, the SOP also addresses whether the specialized industry accounting principles of the Guide (referred to as “investment company accounting”) should be retained by the parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity. Under SOP 07-1, an investment company is generally defined as a separate legal entity whose business purpose and activity are investing in multiple substantive investments for current income, capital appreciation, or both, with investment plans that include exit strategies. The provisions of SOP 07-1 are effective for fiscal years beginning on or after December 15, 2007, with earlier application permitted. Entities that previously applied the provisions of the Guide, but that do not meet the provisions of SOP 07-1 to be an investment company within the scope of the Guide, must report the effects of adopting SOP 07-1 prospectively by accounting for their investments in conformity

Table of Contents

with applicable generally accepted accounting principles, other than investment company accounting, as of the date of adoption. Entities that are investment companies within the scope of the Guide, but that previously had not followed the provisions of the Guide, should report the cumulative effect of adopting SOP 07-1 as an adjustment to beginning retained earnings as of the beginning of the year in which SOP 07-1 is adopted. Merrill Lynch is currently evaluating the provisions of SOP 07-1 and is assessing its potential impact on the Condensed Consolidated Financial Statements.

In February 2007, the FASB issued SFAS No. 159, which provides a fair value option election that allows companies to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and liabilities. Changes in fair value for assets and liabilities for which the election is made will be recognized in earnings as they occur. SFAS No. 159 permits the fair value option election on an instrument-by-instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007 provided that the entity makes that choice in the first 120 days of that fiscal year, has not yet issued financial statements for any interim period of the fiscal year of adoption, and also elects to apply the provisions of SFAS No. 157 (described below). We early adopted SFAS No. 159 in the first quarter of 2007. In connection with this adoption management reviewed its treasury liquidity portfolio and determined that we should decrease our economic exposure to interest rate risk by eliminating long-term fixed rate assets from the portfolio and replacing them with floating rate assets. The fixed rate assets had been classified as available-for-sale and the unrealized losses related to such assets had been recorded in accumulated other comprehensive loss. As a result of the adoption of SFAS No. 159, the loss related to these assets was removed from accumulated other comprehensive loss and a loss of approximately \$185 million, net of tax, primarily related to these assets, was recorded as a cumulative-effect adjustment to beginning retained earnings, with no material impact to total stockholders' equity. Refer to Note 3 to the Condensed Consolidated Financial Statements for additional information.

In September 2006, the FASB issued SFAS No. 157. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure about fair value measurements. SFAS No. 157 nullifies the guidance provided by EITF 02-3 that prohibits recognition of day one gains or losses on derivative transactions where model inputs that significantly impact valuation are not observable. In addition, SFAS No. 157 prohibits the use of block discounts for large positions of unrestricted financial instruments that trade in an active market and requires an issuer to incorporate changes in its own credit spreads when determining the fair value of its liabilities. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 with early adoption permitted provided that the entity has not yet issued financial statements for that fiscal year, including any interim periods. The provisions of SFAS No. 157 are to be applied prospectively, except that the provisions related to block discounts and existing derivative financial instruments measured under EITF 02-3 are to be applied as a one-time cumulative effect adjustment to opening retained earnings in the year of adoption. We early adopted SFAS No. 157 in the first quarter of 2007. The cumulative-effect adjustment to beginning retained earnings was an increase of approximately \$53 million, net of tax, primarily representing the difference between the carrying amounts and fair value of derivative contracts valued using the guidance in EITF 02-3. The impact of adopting SFAS No. 157 was not material to our Condensed Consolidated Statement of Earnings. Refer to Note 3 to the Condensed Consolidated Financial Statements for additional information.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132R*

("SFAS No. 158"). SFAS No. 158 requires an employer to recognize the overfunded or underfunded status of its defined benefit pension and other postretirement plans, measured as the difference between the fair value of plan assets and the benefit obligation as an asset or liability in its statement

Table of Contents

of financial condition. Upon adoption, SFAS No. 158 requires an entity to recognize previously unrecognized actuarial gains and losses and prior service costs within accumulated other comprehensive income (loss), net of tax. In accordance with the guidance in SFAS No. 158, we adopted this provision of the standard for year-end 2006. The adoption of SFAS No. 158 resulted in a net increase of \$65 million to accumulated other comprehensive loss recorded on the Consolidated Financial Statements at December 29, 2006. SFAS No. 158 also requires defined benefit plan assets and benefit obligations to be measured as of the date of the company's fiscal year-end. We have historically used a September 30 measurement date. Under the provisions of SFAS No. 158, we will be required to change our measurement date to coincide with our fiscal year-end. This provision of SFAS No. 158 will be effective for us in fiscal 2008. We are currently assessing the impact of adoption of this provision of SFAS No. 158 on the Condensed Consolidated Financial Statements.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109* ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. We adopted FIN 48 in the first quarter of 2007. The impact of the adoption of FIN 48 resulted in a decrease to beginning retained earnings and an increase to the liability for unrecognized tax benefits of approximately \$66 million. See Note 14 to the Condensed Consolidated Financial Statements for further information.

In March 2006, the FASB issued Statement No. 156, *Accounting for Servicing of Financial Assets* ("SFAS No. 156"). SFAS No. 156 amends Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, to require all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. SFAS No. 156 also permits servicers to subsequently measure each separate class of servicing assets and liabilities at fair value rather than at the lower of amortized cost or market. For those companies that elect to measure their servicing assets and liabilities at fair value, SFAS No. 156 requires the difference between the carrying value and fair value at the date of adoption to be recognized as a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the election is made. Prior to adoption of SFAS No. 156 we accounted for servicing assets and servicing liabilities at the lower of amortized cost or market. We adopted SFAS No. 156 on December 30, 2006. We have not elected to subsequently fair value those mortgage servicing rights ("MSR") held as of the date of adoption or those MSRs acquired or retained after December 30, 2006. The adoption of SFAS No. 156 did not have a material impact on the Condensed Consolidated Financial Statements.

In February 2006, the FASB issued Statement No. 155, *Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140* ("SFAS No. 155"). SFAS No. 155 clarifies the bifurcation requirements for certain financial instruments and permits hybrid financial instruments that contain a bifurcable embedded derivative to be accounted for as a single financial instrument at fair value with changes in fair value recognized in earnings. This election is permitted on an instrument-by-instrument basis for all hybrid financial instruments held, obtained, or issued as of the adoption date. At adoption, any difference between the total carrying amount of the individual components of the existing bifurcated hybrid financial instruments and the fair value of the combined hybrid financial instruments is recognized as a cumulative-effect adjustment to beginning retained earnings. We adopted SFAS No. 155 on a prospective basis beginning in the first quarter of 2007. Since SFAS No. 159 incorporates accounting and disclosure requirements that are similar to SFAS No. 155, we apply SFAS No. 159, rather than SFAS No. 155, to our fair value elections for hybrid financial instruments.

Table of Contents

Merrill Lynch adopted the provisions of Statement No. 123 (revised 2004), *Share-Based Payment*, a revision of SFAS No. 123, *Accounting for Stock-Based Compensation* ("SFAS No. 123R") as of the beginning of the first quarter of 2006. Under SFAS No. 123R, compensation expenses for share-based awards that do not require future service are recorded immediately, and share-based awards that require future service continue to be amortized into expense over the relevant service period. We adopted SFAS No. 123R under the modified prospective method whereby the provisions of SFAS No. 123R are generally applied only to share-based awards granted or modified subsequent to adoption. Thus, for Merrill Lynch, SFAS No. 123R required the immediate expensing of share-based awards granted or modified in 2006 to retirement-eligible employees, including awards that are subject to non-compete provisions.

Prior to the adoption of SFAS No. 123R, we had recognized expense for share-based compensation over the vesting period stipulated in the grant for all employees. This included those who had satisfied retirement eligibility criteria but were subject to a non-compete agreement that applied from the date of retirement through each applicable vesting period. Previously, we had accelerated any unrecognized compensation cost for such awards if a retirement-eligible employee left Merrill Lynch. However, because SFAS No. 123R applies only to awards granted or modified in 2006, expenses for share-based awards granted prior to 2006 to employees who were retirement-eligible with respect to those awards must continue to be amortized over the stated vesting period.

In addition, beginning with performance year 2006, for which we granted stock awards in January 2007, we accrued the expense for future awards granted to retirement-eligible employees over the award performance year instead of recognizing the entire expense related to the award on the grant date. Compensation expense for 2006 performance year and all future stock awards granted to employees not eligible for retirement with respect to those awards will be recognized over the applicable vesting period. SFAS No. 123R also requires expected forfeitures of share-based compensation awards for non-retirement-eligible employees to be included in determining compensation expense. Prior to the adoption of SFAS No. 123R, any benefits of employee forfeitures of such awards were recorded as a reduction of compensation expense when the employee left Merrill Lynch and forfeited the award. In the first quarter of 2006, we recorded a benefit based on expected forfeitures which was not material to the results of operations for the quarter.

The adoption of SFAS No. 123R resulted in a charge to compensation expense of approximately \$550 million on a pre-tax basis and \$370 million on an after-tax basis in the first quarter of 2006.

The adoption of SFAS No. 123R, combined with other business and competitive considerations, prompted us to undertake a comprehensive review of our stock-based incentive compensation awards, including vesting schedules and retirement eligibility requirements, examining their impact to both Merrill Lynch and its employees. Upon the completion of this review, the Management Development and Compensation Committee of Merrill Lynch's Board of Directors determined that to fulfill the objective of retaining high quality personnel, future stock grants should contain more stringent retirement provisions. These provisions include a combination of increased age and length of service requirements. While the stock awards of employees who retire continue to vest, retired employees are subject to continued compliance with the strict non-compete provisions of those awards. To facilitate transition to the more stringent future requirements, the terms of most outstanding stock awards previously granted to employees, including certain executive officers, were modified, effective March 31, 2006, to permit employees to be immediately eligible for retirement with respect to those earlier awards. While we modified the retirement-related provisions of the previous stock awards, the vesting and non-compete provisions for those awards remain in force.

Table of Contents

Since the provisions of SFAS No. 123R apply to awards modified in 2006, these modifications required us to record additional one-time compensation expense in the first quarter of 2006 for the remaining unamortized amount of all awards to employees who had not previously been retirement-eligible under the original provisions of those awards.

The one-time, non-cash charge associated with the adoption of SFAS No. 123R, and the policy modifications to previous awards resulted in a net charge to compensation expense in the first quarter of 2006 of approximately \$1.8 billion pre-tax, and \$1.2 billion after-tax, or a net impact of \$1.34 and \$1.21 on basic and diluted earnings per share, respectively. Policy modifications to previously granted awards amounted to \$1.2 billion of the pre-tax charge and impacted approximately 6,300 employees.

Prior to the adoption of SFAS No. 123R, we presented the cash flows related to income tax deductions in excess of the compensation expense recognized on share-based compensation as operating cash flows in the Consolidated Statements of Cash Flows. SFAS No. 123R requires cash flows resulting from tax deductions in excess of the grant-date fair value of share-based awards to be included in cash flows from financing activities. The excess tax benefits of \$283 million related to total share-based compensation included in cash flows from financing activities in the first quarter of 2006 would have been included in cash flows from operating activities if we had not adopted SFAS No. 123R.

As a result of adopting SFAS No. 123R, approximately \$600 million of liabilities associated with the Financial Advisor Capital Accumulation Award Plan (“FACAAP”) were reclassified to stockholders’ equity. In addition, as a result of adopting SFAS No. 123R, the unamortized portion of employee stock grants, which was previously reported as a separate component of stockholders’ equity on the Consolidated Balance Sheets, has been reclassified to Paid-in capital.

In June 2005, the FASB ratified the consensus reached by the Emerging Issues Task Force on Issue 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights* (“EITF 04-5”). EITF 04-5 presumes that a general partner controls a limited partnership, and should therefore consolidate a limited partnership, unless the limited partners have the substantive ability to remove the general partner without cause based on a simple majority vote or can otherwise dissolve the limited partnership, or unless the limited partners have substantive participating rights over decision making. The guidance in EITF 04-5 was effective beginning in the third quarter of 2005 for all new limited partnership agreements and any limited partnership agreements that were modified. For those partnership agreements that existed at the date EITF 04-5 was issued, the guidance became effective in the first quarter of 2006. The adoption of this guidance did not have a material impact on the Condensed Consolidated Financial Statements.

Note 2. Segment and Geographic Information

Segment Information

Merrill Lynch’s operations are organized into two business segments: Global Markets and Investment Banking (“GMI”) and Global Wealth Management (“GWM”). GMI provides full service global markets and origination products and services to corporate, institutional, and government clients around the world. GWM creates and distributes investment products and services for individuals, small- to mid-size businesses, and employee benefit plans. Prior to the fourth quarter of 2006, Merrill Lynch reported its business activities in three business segments: GMI, Global Private Client (“GPC”) and MLIM. Effective with the merger of the MLIM business with BlackRock in September 2006, MLIM ceased to exist as a separate business segment. For information regarding the BlackRock merger refer to Note 2 of the 2006 Annual Report.

Table of Contents

Results for the six months ended June 30, 2006 include one-time compensation expenses incurred in the first quarter of 2006, as follows: \$1.4 billion in GMI, \$281 million in GWM and \$109 million in MLIM; refer to Note 1, New Accounting Pronouncements, to the Condensed Consolidated Financial Statements for further information on one-time compensation expenses.

The following segment results represent the information that is used by management in its decision-making processes. Prior period amounts have been restated to conform to the current period presentation:

(dollars in millions)

	GMI	GWM	MLIM⁽³⁾	Corporate	Total
Six Months Ended June 29, 2007

Pre-tax earnings (loss)	\$ 1,681	\$ 1,090	\$ 353	\$ (182)	\$ 2,942

(1) Management views interest income net of interest expense in evaluating results.

(2) Includes the impact of junior subordinated notes (related to trust preferred securities) and other corporate items.

(3) MLIM ceased to exist in connection with the BlackRock merger in September 2006.

[Table of Contents](#)

Geographic Information

Merrill Lynch conducts its business activities through offices in the following five regions:

- United States;
- Europe, Middle East, and Africa;
- Pacific Rim;
- Latin America; and
- Canada.

The information that follows, in management's judgment, provides a reasonable representation of each region's contribution to the consolidated net revenues and pre-tax earnings:

(dollars in millions)

	For the Three Months Ended		For the Six Months Ended	
	June 29, 2007	June 30, 2006 ⁽¹⁾	June 29, 2007	June 30, 2006 ⁽²⁾

Total net revenues	<u>\$9,728</u>	<u>\$8,173</u>	<u>\$19,582</u>	<u>\$16,145</u>
Pre-tax earnings⁽⁴⁾				
Europe, Middle East, and Africa	\$ 707	\$ 605	\$ 1,477	\$ 696
Pacific Rim	769	426	1,291	522
Latin America	142	104	340	240
Canada	58	50	167	84
U.S. Non-U.S.	1,676	1,185	3,275	1,542
United States ⁽³⁾	<u>1,347</u>	<u>1,164</u>	<u>2,843</u>	<u>1,400</u>
Total pre-tax earnings	<u>\$3,023</u>	<u>\$2,349</u>	<u>\$ 6,118</u>	<u>\$ 2,942</u>

(1) The 2006 second quarter results include net revenues earned by MLIM of \$630 million, which include non-US net revenues of \$348 million.

(2) The 2006 six-month results include net revenues earned by MLIM of \$1.2 billion, which include non-US net revenues of \$636 million.

(3) Corporate revenues and adjustments are reflected in the U.S. region.

(4) For the six months ended June 30, 2006, pre-tax earnings include the impact of the \$1.8 billion of one-time compensation expenses incurred in the first quarter of 2006. These costs have been allocated to each of the regions, accordingly.

Note 3. Fair Value of Financial Instruments

Merrill Lynch early adopted the provisions of SFAS No. 157 and SFAS No. 159 in the first quarter of 2007.

Fair Value Measurements

SFAS No. 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure

Table of Contents

requirements for fair value measurements. SFAS No. 157 nullifies the guidance provided by EITF 02-3 that prohibits recognition of day one gains or losses on derivative transactions where model inputs that significantly impact valuation are not observable. In addition, SFAS No. 157 prohibits the use of block discounts for large positions of unrestricted financial instruments that trade in an active market and requires an issuer to incorporate changes in its own credit spreads when determining the fair value of its liabilities.

Fair Value Hierarchy

In accordance with SFAS No. 157, we have categorized our financial instruments, based on the priority of the inputs to the valuation technique, into a three-level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument.

Financial assets and liabilities recorded on the Condensed Consolidated Balance Sheets are categorized based on the inputs to the valuation techniques as follows:

- Level 1.* Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market (examples include active exchange-traded equity securities, listed derivatives, most U.S. Government and agency securities, and certain other sovereign government obligations).
- Level 2.* Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
- a) Quoted prices for similar assets or liabilities in active markets (for example, restricted stock);
 - b) Quoted prices for identical or similar assets or liabilities in non-active markets (examples include corporate and municipal bonds, which trade infrequently);
 - c) Pricing models whose inputs are observable for substantially the full term of the asset or liability (examples include most over-the-counter derivatives, including interest rate and currency swaps); and
 - d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability (examples include certain residential and commercial mortgage related assets, including loans, securities and derivatives).
- Level 3.* Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability (examples include certain private equity investments, certain residential and commercial mortgage related assets (including loans, securities and derivatives), and long-dated or complex derivatives including certain foreign exchange options and long dated options on gas and power).

Table of Contents

The following table presents Merrill Lynch's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of June 29, 2007.

(dollars in millions)

	Fair Value Measurements on a Recurring Basis as of June 29, 2007				
	Level 1	Level 2	Level 3	Netting Adj ⁽¹⁾	Total
Assets:					
Securities segregated for regulatory purposes or deposited with clearing organizations	\$ 534	\$ 6,102	\$ -	\$ -	\$ 6,636
Receivables under resale agreements	-	99,774	-	-	99,774
Trading assets, excluding contractual agreements	87,681	86,611	3,648	-	177,940
Noncontractual agreements ⁽²⁾	4,572	216,321	6,601	(180,645)	46,849
Investment securities	2,974	58,519	5,784	-	67,277
Bonds, notes and mortgages	-	1,240	4	-	1,244
Other assets ⁽³⁾	14	1,108	-	(262)	860
Liabilities:					
Payables under repurchase agreements	\$ -	\$100,752	\$ -	\$ -	\$100,752
Trading liabilities, excluding contractual agreements	55,760	6,702	-	-	62,462
Noncontractual agreements ⁽²⁾	5,200	236,006	6,372	(189,616)	57,962
Long-term borrowings ⁽⁴⁾	-	38,184	282	-	38,466
Other payables — interest and other ⁽³⁾	-	478	-	-	478

(1) Represents counterparty and cash collateral netting.

(2) Includes \$4.0 billion and \$2.7 billion of derivative assets and liabilities, respectively, that are included in commodities and related contracts on the Condensed Consolidated Balance Sheet.

(3) Primarily represents certain derivatives used for non-trading purposes.

(4) Includes bifurcated embedded derivatives carried at fair value.

The following tables provide a summary of changes in fair value of Merrill Lynch's Level 3 assets and liabilities for the three and six months ended June 29, 2007. As required by SFAS No. 157, when the inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value measurement in its entirety. Thus, a Level 3 fair value measurement may include inputs that are observable (Levels 1 and 2) and unobservable (Level 3). Gains and losses for such assets and liabilities categorized within the Level 3 table below may include changes in fair value that are attributable to both observable inputs (Levels 1 and 2) and unobservable inputs (Level 3). Further, it should be noted that the following tables do not take into consideration the effect of offsetting Level 1 and 2 financial instruments entered into by Merrill Lynch that economically hedge certain exposures to the Level 3 positions.

(dollars in millions)

Level 3 Financial Assets and Liabilities Three Months Ended June 29, 2007

Investment securities	(295)	189	5	(101)	(430)	396	5	(29)
Loans, notes and mortgages	-	1	-	1	-	3	-	3

The following table shows the fair value hierarchy for those assets and liabilities measured at fair value on a non-recurring basis as of June 29, 2007.

(dollars in millions)

	Fair Value Measurements on a Non-Recurring Basis as of June 29, 2007			
	Level 1	Level 2	Level 3	Total
Loans, notes, and mortgages ⁽¹⁾	\$ -	\$943	\$38	\$981
Other assets	-	27	-	27

(1) These loans include Held-for-Sale loans and certain impaired Held-for-Investment loans where the fair value is below cost.

For the assets and liabilities measured at fair value on a non-recurring basis at June 29, 2007, the losses recorded in the Condensed Consolidated Statement of Earnings for the three and six months ended June 29, 2007 were, \$54 million and \$10 million, respectively.

Fair Value Option

SFAS No. 159 provides a fair value option election that allows companies to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and liabilities. Changes in fair value for assets and liabilities for which the election is made will be recognized in earnings as they occur. SFAS No. 159 permits the fair value option election on an instrument by instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument.

Table of Contents

The following table presents a summary of eligible financial assets and financial liabilities for which the fair value option was elected on December 30, 2006 and the cumulative-effect adjustment to retained earnings recorded in connection with the initial adoption of SFAS No. 159.

(dollars in millions)

	Carrying Value Prior to Adoption	Transition Adjustments to Retained Earnings Gain/(Loss)	Carrying Value After Adoption
Assets:			
Investment securities ⁽¹⁾	\$ 8,723	\$(268)	\$ 8,732
Loans, notes, and mortgages ⁽²⁾	1,440	2	1,442
Liabilities:			
Long-term borrowings ⁽³⁾	\$10,308	\$ (29)	\$10,337
Pre-tax cumulative-effect of adoption		\$(295)	
Deferred tax benefit		110	
Cumulative effect of adoption of the fair value option		\$(185)	

- (1) Merrill Lynch adopted the fair value option for certain fixed rate securities in its treasury liquidity portfolio previously classified as available-for-sale securities as management modified its investment strategy and economic exposure to interest rate risk by eliminating long-term fixed rate assets in its liquidity portfolio and replacing them with floating rate assets. These securities were carried at fair value in accordance with SFAS No. 115 prior to the adoption of SFAS No. 159. An unrealized loss of \$172 million, net of tax, related to such securities was reclassified from accumulated other comprehensive loss to retained earnings.
- (2) Merrill Lynch adopted the fair value option for certain automobile and corporate loans because the loans are risk managed on a fair value basis.
- (3) Merrill Lynch adopted the fair value option for certain positions, which are risk managed on a fair value basis and for which the fair value option eliminates the need to apply hedge accounting under SFAS No. 133.

The following table provides information about where in the Condensed Consolidated Statement of Earnings changes in fair values, for which the fair value option has been elected, are included for the three and six month periods ended June 29, 2007.

(dollars in millions)

	Changes in Fair Value for the Three Months Ended June 29, 2007, for Items Measured at Fair Value Pursuant to Fair Value Option			Changes in Fair Value for the Six Months Ended June 29, 2007, for Items Measured at Fair Value Pursuant to Fair Value Option		
	Gains Principal Transactions	Gains Other Revenues	Total Changes in Fair Value	Gains Principal Transactions	Gains Other Revenues	Total Changes in Fair Value
Assets:						
Receivables under resale agreements ⁽¹⁾	\$ 6	\$ -	\$ 6	\$ 5	\$ -	\$ 5
Investment securities	210	8	218	210	21	231
Loans, notes and mortgages ⁽²⁾	-	20	20	2	40	42
Liabilities:						
Receivables under repurchase agreements ⁽¹⁾	\$ 7	\$ -	\$ 7	\$ 17	\$ -	\$ 17
Long-term borrowings	985	-	985	838	-	838

- (1) Merrill Lynch adopted the fair value option on a prospective basis for certain resale and repurchase agreements. The fair value option election was made regionally based on the underlying types of collateral. Open-ended resale and repurchase agreements were excluded from the fair value option election.
- (2) The decrease in the fair value of loans, notes and mortgages for which the fair value option was elected that was attributable to changes in borrower-specific credit risk, was not material for all periods presented.

(3) The changes in the fair value of liabilities for which the fair value option was elected that was attributable to changes in Merrill Lynch credit spreads, was not material for all periods presented.

Table of Contents

The following table presents the difference between fair values and the aggregate contractual principal amounts of loans, notes and mortgages and long-term borrowings, for which the fair value option has been elected.

(dollars in millions)

	Fair Value at June 29, 2007	Principal Amount Due Upon Maturity	Difference
Assets			
Loans, notes and mortgages ⁽¹⁾	\$ 1,244	\$ 1,473	\$ (229)
Liabilities			
Long-term borrowings ⁽²⁾	\$37,473	\$38,872	\$(1,399)

(1) The majority of the difference relates to loans purchased at a substantial discount from the principal amount.

(2) The majority of the difference relates to zero coupon notes issued at a substantial discount from the principal amount.

At June 29, 2007, the difference between fair value and the aggregate contractual principal amount of receivables under resale agreements and payables under repurchase agreements for which the fair value option has been elected was not material to the Condensed Consolidated Financial Statements.

For those loans, notes and mortgages for which the fair value option has been elected, the aggregate fair value of loans that are 90 days or more past due and in non-accrual status are not material to the Condensed Consolidated Financial Statements.

Hybrid Financial Instruments

In February 2006, the FASB issued SFAS No. 155, which clarifies the bifurcation requirements for certain financial instruments and permits hybrid financial instruments that contain a bifurcable embedded derivative to be accounted for as a single financial instrument at fair value with changes in fair value recognized in earnings. This election is permitted on an instrument-by-instrument basis for all hybrid financial instruments held, obtained, or issued as of the adoption date. At adoption, any difference between the total carrying amount of the individual components of the existing bifurcated hybrid financial instruments and the fair value of the combined hybrid financial instruments is recognized as a cumulative-effect adjustment to beginning retained earnings. Merrill Lynch adopted SFAS No. 155 on a prospective basis beginning in the first quarter of 2007. Since SFAS No. 159 incorporates accounting and disclosure requirements that are similar to SFAS No. 155, we apply SFAS No. 159, rather than SFAS No. 155, to our fair value elections for hybrid financial instruments.

Note 4. Securities Financing Transactions

Merrill Lynch enters into secured borrowing and lending transactions in order to meet customers' needs and earn residual interest rate spreads, obtain securities for settlement and finance trading inventory positions.

Under these transactions, Merrill Lynch either receives or provides collateral, including U.S. Government and agencies, asset-backed, corporate debt, equity, and non-U.S. governments and agencies securities. Merrill Lynch receives collateral in connection with resale agreements, securities borrowed transactions, customer margin loans, and other loans. Under many agreements, Merrill Lynch is permitted to sell or repledge the securities received (e.g., use the securities to secure repurchase

Table of Contents

agreements, enter into securities lending transactions, or deliver to counterparties to cover short positions). At June 29, 2007 and December 29, 2006, the fair value of securities received as collateral where Merrill Lynch is permitted to sell or repledge the securities was \$842 billion and \$633 billion, respectively, and the fair value of the portion that has been sold or repledged was \$660 billion and \$498 billion, respectively. Merrill Lynch may use securities received as collateral for resale agreements to satisfy regulatory requirements such as Rule 15c3-3 of the SEC. At June 29, 2007 and December 29, 2006, the fair value of collateral used for this purpose was \$12.2 billion, and \$19.3 billion, respectively. Merrill Lynch pledges firm-owned assets to collateralize repurchase agreements and other secured financings. Pledged securities that can be sold or repledged by the secured party are parenthetically disclosed in trading assets on the Condensed Consolidated Balance Sheets. The carrying value and classification of securities owned by Merrill Lynch that have been pledged to counterparties where those counterparties do not have the right to sell or repledge at June 29, 2007 and December 29, 2006 are as follows:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
Trading asset category		
Mortgages, mortgage-backed, and asset-backed securities	\$24,822	\$34,475
U.S. Government and agencies	12,560	12,068
Corporate debt and preferred stock	8,910	11,454
Non-U.S. governments and agencies	7,232	4,810
Equities and convertible debentures	4,662	4,812
Municipals and money markets	261	975
Total	\$58,447	\$68,594

Note 5. Investment Securities

Investment securities at June 29, 2007 and December 29, 2006 are presented below:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
Investment securities		
Available-for-sale ⁽¹⁾	\$53,754	\$56,292
Trading	7,976	6,512
Held-to-maturity	268	269
Non-qualifying ⁽²⁾		
Equity investments ⁽³⁾	25,664	21,290
Investments of insurance subsidiaries ⁽⁴⁾	1,208	1,360
Deferred compensation hedges ⁽⁵⁾	1,859	1,752
Investments in trust preferred securities and other investments	616	715
Total	\$91,345	\$88,190

(1) At June 29, 2007 and December 29, 2006, includes \$4.9 billion and \$4.8 billion, respectively, of investment securities reported in cash and securities segregated for regulatory purposes or deposited with clearing organizations.

(2) Non-qualifying for SFAS 115 purposes.

(3) Includes Merrill Lynch's investment in BlackRock.

(4) Primarily represents insurance policy loans.

(5) Represents investments that economically hedge deferred compensation liabilities.

[Table of Contents](#)

Note 6. Securitization Transactions and Transactions with Special Purpose Entities (“SPEs”) Securitizations

In the normal course of business, Merrill Lynch securitizes: commercial and residential mortgage loans; municipal, government, and corporate bonds; and other types of financial assets. SPEs, often referred to as Variable Interest Entities, or VIEs, are often used when entering into or facilitating securitization transactions. Merrill Lynch’s involvement with SPEs used to securitize financial assets includes: structuring and/or establishing SPEs; selling assets to SPEs; managing or servicing assets held by SPEs; underwriting, distributing, and making loans to SPEs; making markets in securities issued by SPEs; engaging in derivative transactions with SPEs; owning notes or certificates issued by SPEs; and/or providing liquidity facilities and other guarantees to, or for the benefit of, SPEs.

Merrill Lynch securitized assets of approximately \$126.3 billion and \$62.8 billion for the six months ended June 29, 2007 and June 30, 2006, respectively. For the six months ended June 29, 2007 and June 30, 2006, Merrill Lynch received \$128.1 billion and \$63.2 billion, respectively, of proceeds, and other cash inflows, from securitization transactions, and recognized net securitization gains of \$206.5 million and \$169.5 million, respectively, in Merrill Lynch’s Condensed Consolidated Statements of Earnings.

For the first six months of 2007 and 2006, cash inflows from securitizations related to the following asset types:

(dollars in millions)

	Six Months Ended	
	June 29, 2007	June 30, 2006
Asset category		
Residential mortgage loans	\$ 81,172	\$42,704
Municipal bonds	36,588	9,770
Commercial loans and other	7,002	8,986
Corporate and government bonds	3,341	1,699
Total	\$128,103	\$63,159

Retained interests in securitized assets were approximately \$10.3 billion and \$6.8 billion at June 29, 2007 and December 29, 2006, respectively, which related primarily to residential mortgage loan and municipal bond securitization transactions. The majority of the retained interest balance consists of mortgage-backed securities that have quoted market prices. The majority of these retained interests include mortgage-backed securities that Merrill Lynch expects to sell to investors in the normal course of its underwriting activity and only a small portion of the retained interests represent residual interests from sub-prime mortgage securitizations.

The following table presents information on retained interests, excluding the offsetting benefit of financial instruments used to hedge risks, held by Merrill Lynch as of June 29, 2007 arising from Merrill Lynch’s residential mortgage loan, municipal bond and other securitization transactions. The

Table of Contents

pre-tax sensitivities of the current fair value of the retained interests to immediate 10% and 20% adverse changes in assumptions and parameters are also shown.

(dollars in millions)

	Residential Mortgage Loans	Municipal Bonds	Other
Retained interest amount	\$ 8,629	\$ 1,097	\$ 566
Weighted average credit losses (rate per annum)	1.8%	0.0%	0.7%
Weighted average discount rate	0-8.4%	0.0%	0-3.5%
Impact on fair value of 10% adverse change	\$ (188)	\$ -	\$ (4)
Impact on fair value of 20% adverse change	\$ (372)	\$ -	\$ (7)
Weighted average life (in years)	9.4%	3.9%	7.5%
Weighted average prepayment speed (CPR) ⁽¹⁾	0-76.4%	3.2-8.4%	0-25.1%
Impact on fair value of 10% adverse change	\$ (309)	\$ (87)	\$ (9)
Impact on fair value of 20% adverse change	\$ (582)	\$ (156)	\$ (18)
Weighted average life (in years)	5.0	8.1	2.2
Weighted average prepayment speed (CPR) ⁽¹⁾	0-29.6	0.3-12.5	0-9.7
Impact on fair value of 10% adverse change	\$ (180)	\$ -	\$ (2)
Impact on fair value of 20% adverse change	\$ (300)	\$ -	\$ (4)

CPR=Constant Prepayment Rate

(1) Relates to select securitization transactions where assets are prepayable.

The preceding sensitivity analysis is hypothetical and should be used with caution. In particular, the effect of a variation in a particular assumption on the fair value of the retained interest is calculated independent of changes in any other assumption; in practice, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. Further, changes in fair value based on a 10% or 20% variation in an assumption or parameter generally cannot be extrapolated because the relationship of the change in the assumption to the change in fair value may not be linear. Also, the sensitivity analysis does not include the offsetting benefit of financial instruments that Merrill Lynch utilizes to hedge risks, including credit, interest rate, and prepayment risk, that are inherent in the retained interests. These hedging strategies are structured to take into consideration the hypothetical stress scenarios above such that they would be effective in principally offsetting Merrill Lynch's exposure to loss in the event these scenarios occur.

The weighted average assumptions and parameters used initially to value retained interests relating to securitizations that were still held by Merrill Lynch as of June 29, 2007 are as follows:

	Residential Mortgage Loans	Municipal Bonds	Other
Weighted average credit losses (rate per annum)	1.7%	0.0%	0.7%
Weighted average discount rate	9.1%	4.0%	7.3%
Weighted average life (in years)	5.1	6.7	2.8
Weighted average prepayment speed assumption (CPR) ⁽¹⁾	23.0%	9.0%	17.2%

CPR=Constant Prepayment Rate

(1) Relates to select securitization transactions where assets are prepayable.

For residential mortgage loan and other securitizations, the investors and the securitization trust generally have no recourse to Merrill Lynch's other assets for failure of mortgage holders to pay when

Table of Contents

due. See Note 12 to the Condensed Consolidated Financial Statements for information related to representations and warranties.

For municipal bond securitization SPEs, in the normal course of dealer market-making activities, Merrill Lynch acts as liquidity provider. Specifically, the holders of beneficial interests issued by municipal bond securitization SPEs have the right to tender their interests for purchase by Merrill Lynch on specified dates at a specified price. Beneficial interests that are tendered are then sold by Merrill Lynch to investors through a best efforts remarketing where Merrill Lynch is the remarketing agent. If the beneficial interests are not successfully remarketed, the holders of beneficial interests are paid from funds drawn under a standby liquidity letter of credit issued by Merrill Lynch.

In addition to standby letters of credit, Merrill Lynch also provides default protection or credit enhancement to investors in securities issued by certain municipal bond securitization SPEs. Interest and principal payments on beneficial interests issued by these SPEs are secured by a guarantee issued by Merrill Lynch. In the event that the issuer of the underlying municipal bond defaults on any payment of principal and/or interest when due, the payments on the bonds will be made to beneficial interest holders from an irrevocable guarantee by Merrill Lynch.

The maximum payout under these liquidity and default guarantees totaled \$47.9 billion and \$38.2 billion at June 29, 2007 and December 29, 2006, respectively. The fair value of the guarantees approximated \$57 million and \$16 million at June 29, 2007 and December 29, 2006, respectively, which is reflected in the Condensed Consolidated Balance Sheets. Of these arrangements, \$7.1 billion at June 29, 2007 and \$6.9 billion at December 29, 2006, represent agreements where the guarantees are provided to the SPE by a third-party financial intermediary and Merrill Lynch enters into a reimbursement agreement with the financial intermediary. In these arrangements, if the financial intermediary incurs losses, Merrill Lynch has up to one year to fund those losses. Additional information regarding these commitments is provided in Note 12 to the Condensed Consolidated Financial Statements and in Note 12 of the 2006 Annual Report.

The following table summarizes the total principal amounts outstanding and delinquencies of securitized financial assets held in SPE's, where Merrill Lynch holds retained interests, as of June 29, 2007 and December 29, 2006:

(dollars in millions)

	Residential Mortgage Loans	Municipal Bonds	Other
June 29, 2007			
Principal Amount Outstanding	\$175,161	\$21,304	\$20,023
Delinquencies	6,896	-	16
December 29, 2006			
Principal Amount Outstanding	\$124,795	\$18,986	\$33,024
Delinquencies	3,493	-	10

Net credit losses associated with securitized financial assets for the six months ended June 29, 2007 and June 30, 2006 approximated \$179 million and \$45 million, respectively.

Mortgage Servicing Rights

In connection with its residential mortgage business, Merrill Lynch may retain or acquire servicing rights associated with certain mortgage loans that are sold through its securitization activities. These

Table of Contents

loan sale transactions create assets referred to as mortgage servicing rights, or MSR, which are included within other assets on the Condensed Consolidated Balance Sheets.

In March 2006 the FASB issued SFAS No. 156, which amends SFAS No. 140, and requires all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. SFAS No. 156 also permits servicers to subsequently measure each separate class of servicing assets and liabilities at fair value rather than at the lower of amortized cost or market. Merrill Lynch adopted SFAS No. 156 on December 30, 2006. Merrill Lynch has not elected to subsequently fair value those MSRs held as of the date of adoption or those MSRs acquired or retained after December 30, 2006.

Retained MSRs are initially recorded at fair value and subsequently amortized in proportion to and over the period of estimated future net servicing revenues. MSRs are assessed for impairment, at a minimum, on a quarterly basis. Management's estimates of fair value of MSRs are determined using the net discounted present value of future cash flows, which consists of projecting future servicing cash flows and discounting such cash flows using an appropriate risk-adjusted discount rate. These valuations require various assumptions, including future servicing fees, servicing costs, credit losses, discount rates and mortgage prepayment speeds. Due to subsequent changes in economic and market conditions, these assumptions can, and generally will, change from quarter to quarter.

Changes in Merrill Lynch's MSR balance are summarized below:

(dollars in millions)

	Carrying Value
ortgage servicing rights, December 29, 2006 (fair value is \$164)	\$ 122
ditions ⁽¹⁾	450
ortization	(127)
valuation allowance adjustments	(1)
her-than-temporary impairments	<u>-</u>
ortgage servicing rights, June 29, 2007 (fair value is \$517)	\$ 444

(1) Includes MSRs obtained in connection with the acquisition of First Franklin.

The amount of contractually specified revenues, which are included within managed accounts and other fee-based revenues in the Condensed Consolidated Statements of Earnings include:

(dollars in millions)

	For the Three Months Ended June 29, 2007	For the Six Months Ended June 29, 2007
rvicing fees	\$ 92	\$166
icillary and late fees	<u>16</u>	<u>30</u>
total	\$108	\$196

Table of Contents

The following table presents Merrill Lynch's key assumptions used in measuring the fair value of MSRs at June 29, 2007 and the pre-tax sensitivity of the fair values to an immediate 10% and 20% adverse change in these assumptions:

(dollars in millions)

ir value of capitalized MSRs	\$ 517
eighted average prepayment speed (CPR)	30.9%
pact of fair value of 10% adverse change	\$ (34)
pact of fair value of 20% adverse change	\$ (54)
eighted average discount rate	17.2%
pact of fair value of 10% adverse change	\$ (10)
pact of fair value of 20% adverse change	\$ (20)

The sensitivity analysis above is hypothetical and should be used with caution. In particular, the effect of a variation in a particular assumption on the fair value of MSRs is calculated independent of changes in any other assumption; in practice, changes in one factor may result in changes in another factor, which may magnify or counteract the sensitivities. Further changes in fair value based on a single variation in assumptions generally cannot be extrapolated because the relationship of the change in a single assumption to the change in fair value may not be linear.

Variable Interest Entities

FIN 46R requires an entity to consolidate a VIE if that enterprise has a variable interest that will absorb a majority of the variability of the VIE's expected losses, receive a majority of the variability of the VIE's expected residual returns, or both. QSPEs are a type of VIE that holds financial instruments and distributes cash flows to investors based on preset terms. QSPEs are commonly used in mortgage and other securitization transactions. In accordance with SFAS No. 140 and FIN 46R, Merrill Lynch does not consolidate QSPEs. Information regarding QSPEs can be found in the Securitization section of this Note and the Guarantees section in Note 12 to the Condensed Consolidated Financial Statements.

Where an entity is a significant variable interest holder, FIN 46R requires that entity to disclose its maximum exposure to loss as a result of its interest in the VIE. It should be noted that this measure does not reflect Merrill Lynch's estimate of the actual losses that could result from adverse changes because it does not reflect the economic hedges Merrill Lynch enters into to reduce its exposure.

Table of Contents

The following tables summarize Merrill Lynch's involvement with certain VIEs as of June 29, 2007 and December 29, 2006, respectively. The table below does not include information on QSPEs or those VIEs where Merrill Lynch is the primary beneficiary, and holds a majority of the voting interests in the entity.

(dollars in millions)

	Primary Beneficiary			Significant Variable Interest Holder		Other Involvement with VIEs	
	Total Asset Size ⁽⁴⁾	Net Asset Size ⁽⁵⁾	Recourse to Merrill Lynch ⁽⁶⁾	Total Asset Size ⁽⁴⁾	Maximum Exposure	Total Asset Size ⁽⁴⁾	Maximum Exposure
June 29, 2007							
tax planning VIEs ⁽¹⁾	\$4,997	\$4,997	\$ -	\$ 483	\$ 15	\$ -	\$ -
loan and real estate VIEs	4,547	3,698	-	285	220	-	-
guaranteed and other funds ⁽²⁾	2,460	1,933	540	6,651	6,651	-	-
credit linked note and other VIEs ⁽³⁾	1,056	1,053	-	-	-	35,975	1,390
December 29, 2006							
tax planning VIEs ⁽¹⁾	\$ -	\$ -	\$ -	\$ 483	\$ 15	\$ -	\$ -
loan and real estate VIEs	4,265	3,787	-	278	182	-	-
guaranteed and other funds ⁽²⁾	2,476	1,913	564	6,156	6,142	-	-
credit linked note and other VIEs ⁽³⁾	748	743	302	-	-	13,288	927

(1) The maximum exposure for tax planning VIEs reflects the fair value of investments in the VIEs and derivatives entered into with the VIEs, as well as the maximum exposure to loss associated with indemnifications made by Merrill Lynch to investors in the VIEs.

(2) The maximum exposure for guaranteed and other funds is the fair value of Merrill Lynch's investment, derivatives entered into with the VIEs if they are in an asset position and any recourse beyond the assets of the entity.

(3) The maximum exposure for Credit-linked note and other VIEs is the fair value of the derivatives entered into with the VIEs if they are in an asset position.

(4) This column reflects the total size of the assets held in the VIE.

(5) This column reflects the size of the assets held in the VIE after accounting for intercompany eliminations and any balance sheet netting of assets and liabilities as permitted by FIN 39.

(6) This column reflects the extent, if any, to which investors have recourse to Merrill Lynch beyond the assets held in the VIE.

[Table of Contents](#)

Note 7. Loans, Notes, Mortgages and Related Commitments to Extend Credit

Loans, notes, mortgages and related commitments to extend credit at June 29, 2007 and December 29, 2006, are presented below. This disclosure includes commitments to extend credit that, if drawn upon, will result in loans held for investment or loans held for sale.

(dollars in millions)

	Loans		Commitments⁽¹⁾	
	June 29, 2007	Dec. 29, 2006	June 29, 2007⁽²⁾⁽³⁾	Dec. 29, 2006⁽³⁾
Consumer:				
Mortgages	\$18,865	\$18,346	\$ 8,059	\$ 7,747
Other	5,327	4,224	1,141	547
Commercial and small- and middle-market business:				
Secured	39,698	42,610	80,513	46,307
Unsecured investment grade	4,995	2,870	25,583	30,569
Unsecured non-investment grade	2,017	2,402	2,934	9,015
Small- and middle-market business	2,998	3,055	2,410	2,185
	<u>73,900</u>	<u>73,507</u>	<u>120,640</u>	<u>96,370</u>
Allowance for loan losses	(435)	(478)	-	-
Reserve for lending-related commitments	-	-	(499)	(381)
Total, net	<u>\$73,465</u>	<u>\$73,029</u>	<u>\$120,141</u>	<u>\$95,989</u>

(1) Commitments are outstanding as of the date the commitment letter is issued and are comprised of closed and contingent commitments. Closed commitments represent the unfunded portion of existing commitments available for draw down. Contingent commitments are contingent on the borrower fulfilling certain conditions or upon a particular event, such as an acquisition. A portion of these contingent commitments may be syndicated among other lenders or replaced with capital markets funding.

(2) See Note 12 to the Condensed Consolidated Financial Statements for a maturity profile of these commitments.

(3) In addition to the loan origination commitments included in the table above, at June 29, 2007, Merrill Lynch entered into agreements to purchase \$4.7 billion of loans that, upon settlement of the commitment, will be classified in loans held for investment and loans held for sale. Similar loan purchase commitments totaled \$1.2 billion at December 29, 2006. See Note 12 to the Condensed Consolidated Financial Statements for additional information.

Activity in the allowance for loan losses is presented below:

(dollars in millions)

	Six Months Ended	
	June 29, 2007	June 30, 2006
Allowance for loan losses, at beginning of period	\$478	\$406
Provision for loan losses	11	74
Charge-offs	(43)	(26)
Recoveries	<u>9</u>	<u>7</u>
Net charge-offs	(34)	(19)
Other ⁽¹⁾	<u>(20)</u>	<u>2</u>
Allowance for loan losses, at end of period	<u>\$435</u>	<u>\$463</u>

(1) Other activity for the six months ended June 29, 2007 primarily relates to the deconsolidation of two VIEs during the second quarter of 2007.

Table of Contents

Consumer loans, which are substantially secured, consisted of approximately 226,000 individual loans at June 29, 2007, and included residential mortgages, home equity loans, and other loans to individuals for household, family, or other personal expenditures. Commercial loans, which consisted of approximately 7,000 separate loans, include corporate and institutional loans, commercial mortgages, asset-based loans, small- and middle-market business loans, and other loans to businesses. The principal balance of non-accrual loans was \$258 million at June 29, 2007 and \$209 million at December 29, 2006. The investment grade and non-investment grade categorization is determined using the credit rating agency equivalent of internal credit ratings. Non-investment grade counterparties are those rated lower than BBB. In some cases Merrill Lynch enters into credit default swaps to mitigate credit exposure related to funded and unfunded commercial loans. The notional value of these swaps totaled \$13.1 billion and \$10.3 billion at June 29, 2007 and December 29, 2006, respectively. For information on credit risk management see Note 6 of the 2006 Annual Report.

The above amounts include \$22.9 billion and \$18.6 billion of loans held for sale at June 29, 2007 and December 29, 2006, respectively. Loans held for sale are loans that management expects to sell prior to maturity. At June 29, 2007, such loans consisted of \$9.0 billion of consumer loans, primarily automobile loans and residential mortgages, and \$13.9 billion of commercial loans, approximately 37% of which are to investment grade counterparties. At December 29, 2006, such loans consisted of \$7.4 billion of consumer loans, primarily automobile loans and residential mortgages, and \$11.2 billion of commercial loans, approximately 38% of which are to investment grade counterparties.

For additional information on loans, notes and mortgages, see Notes 1 and 8 of the 2006 Annual Report.

Note 8. Goodwill and Other Intangibles

Goodwill

Goodwill is the cost of an acquired company in excess of the fair value of identifiable net assets at acquisition date. Goodwill is tested annually (or more frequently under certain conditions) for impairment in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*. Merrill Lynch has reviewed the carrying amount of goodwill reported in the Condensed Consolidated Balance Sheets and has determined that there was no impairment related to any period presented.

The following table sets forth the changes in the carrying amount of Merrill Lynch's goodwill by business segment, for the six months ended June 29, 2007:

(dollars in millions)

	GMI	GWM	Total
Goodwill:			
December 29, 2006	\$1,907	\$302	\$2,209
Goodwill acquired ⁽¹⁾	999	-	999
Translation adjustment and other	37	2	39
June 29, 2007	<u>\$2,943</u>	<u>\$304</u>	<u>\$3,247</u>

(1) GMI activity primarily relates to goodwill acquired in connection with the acquisition of First Franklin.

Other Intangible Assets

Other intangible assets consist primarily of customer lists. Other intangible assets are tested annually (or more frequently under certain conditions) for impairment in accordance with SFAS No. 144,

[Table of Contents](#)

Accounting for the Impairment or Disposal of Long-Lived Assets, and are amortized over their respective estimated useful lives.

The gross carrying amounts of other intangible assets were \$513 million and \$321 million as of June 29, 2007 and December 29, 2006, respectively. Accumulated amortization of other intangible assets amounted to \$116 million and \$73 million at June 29, 2007 and December 29, 2006, respectively.

Amortization expense for the three months ended June 29, 2007 and June 30, 2006 was \$22 million and \$11 million, respectively. Amortization expense for the six months ended June 29, 2007 and June 30, 2006 was \$43 million and \$22 million, respectively.

Note 9. Borrowings and Deposits

ML & Co. is the primary issuer of all of Merrill Lynch's debt instruments. For local tax or regulatory reasons, debt is also issued by certain subsidiaries.

Total borrowings at June 29, 2007 and December 29, 2006, which is comprised of short-term borrowings, long-term borrowings and junior subordinated notes (related to trust preferred securities), consisted of the following:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
senior debt issued by ML & Co.	\$142,867	\$115,474
senior debt issued by subsidiaries — guaranteed by ML & Co.	29,388	26,664
subordinated debt issued by ML & Co.	10,466	6,429
structured notes issued by ML & Co.	36,075	25,466
structured notes issued by subsidiaries — guaranteed by ML & Co.	10,612	8,349
senior subordinated notes (related to trust preferred securities)	4,403	3,813
other subsidiary financing — not guaranteed by ML & Co.	2,050	4,316
other subsidiary financing — non-recourse	<u>14,622</u>	<u>12,812</u>
Total	<u>\$250,483</u>	<u>\$203,323</u>

Borrowing activities may create exposure to market risk, most notably interest rate, equity, commodity and currency risk. Refer to Note 1 to the Condensed Consolidated Financial Statements, Derivatives section, for additional information on the use of derivatives to hedge these risks and the accounting for derivatives embedded in these instruments. Other subsidiary financing — non-recourse is primarily attributable to consolidated entities that are VIEs. Additional information regarding VIEs is provided in Note 6 to the Condensed Consolidated Financial Statements.

Table of Contents

Borrowings and Deposits at June 29, 2007 and December 29, 2006, are presented below:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
Short-term borrowings		
Commercial paper	\$ 9,679	\$ 6,357
Commissory notes	3,450	-
Secured short-term borrowings	2,939	9,800
Other unsecured short-term borrowings	3,996	1,953
Total	<u>\$ 20,064</u>	<u>\$ 18,110</u>
Long-term borrowings⁽¹⁾		
Fixed-rate obligations ⁽²⁾⁽⁴⁾	\$ 87,995	\$ 58,366
Variable-rate obligations ⁽³⁾⁽⁴⁾	135,811	120,794
Zero-coupon contingent convertible debt (LYONs [®])	2,210	2,240
Total	<u>\$226,016</u>	<u>\$181,400</u>
Deposits		
U.S.	\$ 59,317	\$ 62,294
Non U.S.	23,484	21,830
Total	<u>\$ 82,801</u>	<u>\$ 84,124</u>

(1) Excludes junior subordinated notes (related to trust preferred securities).

(2) Fixed-rate obligations are generally swapped to floating rates.

(3) Variable interest rates are generally based on rates such as LIBOR, the U.S. Treasury Bill Rate, or the Federal Funds Rate.

(4) Included are various equity-linked or other indexed instruments.

At June 29, 2007, long-term borrowings, including adjustments related to fair value hedges and various equity-linked or other indexed instruments, mature as follows:

(dollars in millions)

Less than 1 year	\$ 45,127	20%
1-2 years	45,771	20
3-5 years	28,634	13
6-10 years	16,140	7
More than 10 years	27,905	12
Total	<u>62,439</u>	<u>28</u>
Total	<u>\$226,016</u>	<u>100%</u>

Certain long-term borrowing agreements contain provisions whereby the borrowings are redeemable at the option of the holder at specified dates prior to maturity. These borrowings are reflected in the above table as maturing at their put dates, rather than their contractual maturities. Management believes, however, that a portion of such borrowings will remain outstanding beyond their earliest redemption date. A limited number of notes whose coupon or repayment terms are linked to the performance of debt and equity securities, indices, currencies or commodities may be accelerated based on the value of a referenced index or security, in which case Merrill Lynch may be required to immediately settle the obligation for cash or other securities. Refer to Note 1 of the 2006 Annual Report, Embedded Derivatives section for additional information.

Table of Contents

Except for the \$2.2 billion of aggregate principal amount of floating rate zero-coupon contingently convertible liquid yield option notes (“LYONs[®]”) that were outstanding at June 29, 2007, senior and subordinated debt obligations issued by ML & Co. and senior debt issued by subsidiaries and guaranteed by ML & Co. do not contain provisions that could, upon an adverse change in ML & Co.’s credit rating, financial ratios, earnings, cash flows, or stock price, trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation. See Note 9 of the 2006 Annual Report for additional information regarding conditions surrounding LYONs[®] conversion.

The fair values of long-term borrowings and related hedges approximated the carrying amounts at June 29, 2007 and December 29, 2006.

The effective weighted-average interest rates for borrowings at June 29, 2007 and December 29, 2006 were:

	June 29, 2007	Dec. 29, 2006
ort-term borrowings	4.66%	5.15%
ng-term borrowings, contractual rate	4.53	4.23
nior subordinated notes (related to trust preferred securities)	6.83	7.03

See Note 9 of the 2006 Annual Report for additional information on Borrowings.

Merrill Lynch also obtains standby letters of credit from issuing banks to satisfy various counterparty collateral requirements, in lieu of depositing cash or securities collateral. Such standby letters of credit aggregated \$1.4 billion and \$2.5 billion at June 29, 2007 and December 29, 2006, respectively.

Note 10. Comprehensive Income

The components of comprehensive income are as follows:

(dollars in millions)

	Three Months Ended		Six Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006

Basic EPS	\$ 2.48	\$ 1.79	\$ 4.98	\$ 2.28
Diluted EPS	2.24	1.63	4.50	2.07

(1) See Note 9 of the 2006 Annual Report for additional information on LYONs[®].

(2) Includes shares exchangeable into common stock.

(3) See Note 14 of the 2006 Annual Report for a description of these instruments.

(4) Excludes 243 thousand for the three month period ended June 29, 2007, 281 thousand for the six month period ended June 29, 2007, and 33 million of instruments for the three and six months periods ended June 30, 2006, that were considered antidilutive and thus were not included in the above calculations.

During the second quarter of 2007, Merrill Lynch repurchased 19.8 million common shares at an average repurchase price of \$90.90 per share. The Board of Directors authorized the repurchase of an additional \$6 billion of Merrill Lynch's outstanding common shares under a program announced on April 30, 2007. On March 20, 2007, Merrill Lynch issued \$1.5 billion in aggregate principal amount of floating rate, non-cumulative, perpetual preferred stock.

Note 12. Commitments, Contingencies and Guarantees

Litigation

Merrill Lynch has been named as a defendant in various legal actions, including arbitrations, class actions, and other litigation arising in connection with its activities as a global diversified financial services institution.

Table of Contents

Some of the legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or otherwise in financial distress. Merrill Lynch is also involved in investigations and/or proceedings by governmental and self-regulatory agencies.

Merrill Lynch believes it has strong defenses to, and where appropriate, will vigorously contest, many of these matters. Given the number of these matters, some are likely to result in adverse judgments, penalties, injunctions, fines, or other relief. Merrill Lynch may explore potential settlements before a case is taken through trial because of the uncertainty, risks, and costs inherent in the litigation process. In accordance with SFAS No. 5, *Accounting for Contingencies*, Merrill Lynch will accrue a liability when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. In many lawsuits and arbitrations, including almost all of the class action lawsuits, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case no accrual is made until that time. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek substantial or indeterminate damages, Merrill Lynch cannot predict what the eventual loss or range of loss related to such matters will be. Merrill Lynch continues to assess these cases and believes, based on information available to it, that the resolution of these matters will not have a material adverse effect on the financial condition of Merrill Lynch as set forth in the Condensed Consolidated Financial Statements, but may be material to Merrill Lynch's operating results or cash flows for any particular period and may impact ML & Co.'s credit ratings.

Commitments

At June 29, 2007, Merrill Lynch's commitments had the following expirations:

(dollars in millions)

	Total	Commitment expiration			
		Less than 1 year	1 - 3 years	3+ - 5 years	Over 5 years
Commitments to extend credit ⁽¹⁾	\$120,640	\$72,251	\$12,287	\$25,027	\$11,075
Purchasing and other commitments	13,690	10,304	900	681	1,805
Operating leases	3,973	607	1,155	948	1,263
Commitments to enter into resale agreements	10,469	10,469	-	-	-
Total	\$148,772	\$93,631	\$14,342	\$26,656	\$14,143

(1) See Note 7 to the Condensed Consolidated Financial Statements.

Lending Commitments

Merrill Lynch primarily enters into commitments to extend credit, predominantly at variable interest rates, in connection with corporate finance, corporate and institutional transactions and asset-based lending transactions. Clients may also be extended loans or lines of credit collateralized by first and second mortgages on real estate, certain liquid assets of small businesses, or securities. These commitments usually have a fixed expiration date and are contingent on certain contractual conditions that may require payment of a fee by the counterparty. Once commitments are drawn upon, Merrill Lynch may require the counterparty to post collateral depending upon creditworthiness and general market conditions. See Note 7 to the Condensed Consolidated Financial Statements for additional information.

Table of Contents

The contractual amounts of these commitments represent the amounts at risk should the contract be fully drawn upon, the client defaults, and the value of the existing collateral becomes worthless. The total amount of outstanding commitments may not represent future cash requirements, as commitments may expire without being drawn upon.

Purchasing and Other Commitments

In the normal course of business, Merrill Lynch enters into institutional and margin-lending transactions, some of which are on a committed basis, but most of which are not. Margin lending on a committed basis only includes amounts where Merrill Lynch has a binding commitment. These binding margin lending commitments totaled \$452 million at June 29, 2007 and \$782 million at December 29, 2006.

Merrill Lynch had commitments to purchase partnership interests, primarily related to private equity and principal investing activities, of \$1.4 billion and \$928 million at June 29, 2007 and December 29, 2006, respectively. Merrill Lynch also has entered into agreements with providers of market data, communications, systems consulting, and other office-related services. At June 29, 2007 and December 29, 2006, minimum fee commitments over the remaining life of these agreements aggregated \$272 million and \$357 million, respectively. Merrill Lynch entered into commitments to purchase loans of \$8.1 billion (which upon settlement of the commitment will be included in trading assets, loans held for investment and loans held for sale) at June 29, 2007. Such commitments totaled \$10.3 billion at December 29, 2006. Other purchasing commitments amounted to \$3.4 billion and \$2.1 billion at June 29, 2007 and December 29, 2006, respectively. Included in other purchasing commitments at June 29, 2007 was \$1.8 billion related to the definitive agreement with First Republic Bank to acquire all of its outstanding common shares.

Leases

As disclosed in Note 12 of the 2006 Annual Report, Merrill Lynch has entered into various noncancellable long-term lease agreements for premises that expire through 2024. Merrill Lynch has also entered into various noncancellable short-term lease agreements, which are primarily commitments of less than one year under equipment leases.

On June 19, 2007, Merrill Lynch sold its ownership interest in Chapterhouse Holdings Limited, whose primary asset is Merrill Lynch's London Headquarters, for approximately \$950 million. Merrill Lynch leased the premises back for an initial term of 15 years under an agreement which is classified as an operating lease. The leaseback also includes renewal rights extending significantly beyond the initial term. The sale resulted in a pre-tax gain of approximately \$370 million which was deferred and is being recognized over the lease term as a reduction of occupancy expense.

Guarantees

The derivatives in the following table meet the accounting definition of a guarantee under *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indebtedness of Others* ("FIN 45") and include certain written options and credit default swaps that contingently require Merrill Lynch to make payments based on changes in an underlying. Because the maximum exposure to loss could be unlimited for certain derivatives (e.g., interest rate caps) and the maximum exposure to loss is not considered when assessing the risk of contracts, the notional value of these contracts has been included to provide information about the magnitude of Merrill Lynch's involvement with these types of

Table of Contents

transactions. Merrill Lynch records all derivative instruments at fair value on its Condensed Consolidated Balance Sheets.

The liquidity facilities and default facilities in the following table relate primarily to municipal bond securitization SPEs and Merrill Lynch-sponsored asset-backed commercial paper conduits (“Conduits”). Merrill Lynch acts as liquidity provider to municipal bond securitization SPEs. As of June 29, 2007, the value of the assets held by the SPE plus any additional collateral pledged to Merrill Lynch exceeds the amount of beneficial interests issued, which provides additional support to Merrill Lynch in the event that the standby facility is drawn. As of June 29, 2007, the maximum payout if the standby facilities are drawn was \$39.7 billion and the value of the municipal bond assets to which Merrill Lynch has recourse in the event of a draw was \$42.6 billion. In certain instances, Merrill Lynch also provides default protection in addition to liquidity facilities. If the default protection is drawn, Merrill Lynch may claim the underlying assets held by the SPEs. As of June 29, 2007, the maximum payout if an issuer defaults was \$8.2 billion, and the value of the assets to which Merrill Lynch has recourse, in the event that an issuer of a municipal bond held by the SPE defaults on any payment of principal and/or interest when due, was \$9.3 billion. In addition, Merrill Lynch has established three Conduits and holds a variable interest in these Conduits. These variable interests represent \$13 billion of liquidity facilities and \$600 million of credit facilities. The maximum exposure to loss for these three facilities combined is \$11.2 billion and assumes a total loss on a portfolio of highly rated assets. For additional information on these facilities, see Note 12 of the 2006 Annual Report and Note 6 to the Condensed Consolidated Balance Sheets.

In addition, Merrill Lynch provides guarantees to counterparties in the form of standby letters of credit. Merrill Lynch holds marketable securities of \$597 million as collateral to secure these guarantees.

Further, in conjunction with certain principal-protected mutual funds, Merrill Lynch guarantees the return of the initial principal investment at the termination date of the fund. At June 29, 2007, Merrill Lynch’s maximum potential exposure to loss with respect to these guarantees is \$634 million assuming that the funds are invested exclusively in other general investments (i.e., the funds hold no risk-free assets), and that those other general investments suffer a total loss. As such, this measure significantly overstates Merrill Lynch’s exposure or expected loss at June 29, 2007. These transactions met the SFAS No. 149 definition of derivatives and, as such, were carried as a liability with a fair value of \$7 million at June 29, 2007.

Merrill Lynch also provides indemnifications related to the U.S. tax treatment of certain foreign tax planning transactions. The maximum exposure to loss associated with these transactions at June 29, 2007 is \$165 million; however, Merrill Lynch believes that the likelihood of loss with respect to these arrangements is remote.

These guarantees and their expiration at June 29, 2007 are summarized as follows:

(dollars in millions)

	Maximum Payout Notional	Less than 1 year	1 - 3 years	3+ - 5 years	Over 5 years	Carrying Value
derivative contracts ⁽¹⁾	\$2,993,613	\$762,368	\$549,635	\$538,701	\$1,142,909	\$66,330
liquidity and default facilities with SPEs ⁽²⁾	62,608	57,818	4,046	137	607	70
residual value guarantees ⁽³⁾	1,009	70	410	123	406	15
standby letters of credit and other guarantees ⁽⁴⁾	5,898	1,865	920	1,265	1,848	24

(1) As noted above, the notional value of derivative contracts is provided rather than the maximum payout amount, although the notional value should not be considered as a reliable indicator of Merrill Lynch’s exposure to these contracts.

Table of Contents

- (2) Amounts relate primarily to facilities provided to municipal bond securitization SPEs and asset-backed commercial paper conduits sponsored by Merrill Lynch. Includes \$7.1 billion of guarantees provided to SPEs by third-party financial institutions where Merrill Lynch has agreed to reimburse the financial institution if losses occur, and has up to one year to fund losses.
- (3) Includes residual value guarantees associated with the Hopewell campus and aircraft leases of \$322 million.
- (4) Includes reimbursement agreements with the Mortgage 100SM program, guarantees related to principal-protected mutual funds, and certain indemnifications related to foreign tax planning strategies.

In connection with certain asset sales and securitization transactions, Merrill Lynch typically makes representations and warranties about the underlying assets conforming to specified guidelines. If the underlying assets do not conform to the specifications, Merrill Lynch may have an obligation to repurchase the assets or indemnify the purchaser against any loss. To the extent these assets were originated by others and purchased by Merrill Lynch, Merrill Lynch seeks to obtain appropriate representations and warranties in connection with its acquisition of the assets. For residential mortgage loan and other securitizations, the maximum potential amount that could be required to be repurchased is the current outstanding asset balance. The liability recorded for losses under these arrangements was approximately \$90 million at June 29, 2007. In all other arrangements, no liability is carried in the Condensed Consolidated Balance Sheets because Merrill Lynch believes the potential for loss is remote. See Note 12 of the 2006 Annual Report for additional information on guarantees.

Note 13. Employee Benefit Plans

Merrill Lynch provides pension and other postretirement benefits to its employees worldwide through defined contribution pension, defined benefit pension, and other postretirement plans. These plans vary based on the country and local practices. Merrill Lynch reserves the right to amend or terminate these plans at any time. Refer to Note 13 of the 2006 Annual Report for a complete discussion of employee benefit plans.

Defined Benefit Pension Plans

Pension cost for the three and six months ended June 29, 2007 and June 30, 2006, for Merrill Lynch's defined benefit pension plans, included the following components:

(dollars in millions)

	Three Months Ended					
	June 29, 2007			June 30, 2006		
	U.S. Plans	Non-U.S. Plans	Total	U.S. Plans	Non-U.S. Plans	Total
Service cost	\$ -	\$ 7	\$ 7	\$ -	\$ 7	\$ 7
Interest cost	24	20	44	24	15	39
Expected return on plan assets	(29)	(20)	(49)	(28)	(15)	(43)
Amortization of net (gains)/losses, prior service costs and other	(1)	8	7	-	5	5
Total defined benefit pension cost	\$ (6)	\$ 15	\$ 9	\$ (4)	\$ 12	\$ 8

[Table of Contents](#)

(dollars in millions)

	Six Months Ended					
	June 29, 2007			June 30, 2006		
	U.S. Plans	Non-U.S. Plans	Total	U.S. Plans	Non-U.S. Plans	Total
ervice cost	\$ -	\$ 14	\$ 14	\$ -	\$ 14	\$ 14
erest cost	48	40	88	48	31	79
pected return on plan assets	(58)	(39)	(97)	(56)	(30)	(86)
nortization of net (gains)/losses, prior service costs and other	(2)	15	13	-	9	9
total defined benefit pension cost	\$(12)	\$ 30	\$ 18	\$ (8)	\$ 24	\$ 16

Merrill Lynch disclosed in its 2006 Annual Report that it expected to pay \$23 million of benefit payments to participants in the U.S. non-qualified pension plan and Merrill Lynch expected to contribute \$70 million to its non-U.S. defined benefit pension plans in 2007. Merrill Lynch does not expect contributions to differ significantly from amounts previously disclosed.

Postretirement Benefits Other Than Pensions

Other postretirement benefit cost for the three and six months ended June 29, 2007 and June 30, 2006, included the following components:

(dollars in millions)

	Three Months Ended		Six Months Ended	
	June 29, 2007	June 30, 2006	June 29, 2007	June 30, 2006
ervice cost	\$ 1	\$ 2	\$ 3	\$ 4
erest cost	4	4	8	8
nortization of net (gains)/losses, prior service costs and other	(1)	(2)	(3)	(3)
total other postretirement benefits cost	\$ 4	\$ 4	\$ 8	\$ 9

Approximately 90% of the postretirement benefit cost components for the period relate to the U.S. postretirement plan.

Note 14. Income Taxes

Merrill Lynch adopted FIN 48 effective the beginning of the first quarter of 2007 and recognized a decrease to beginning retained earnings and an increase to the liability for unrecognized tax benefits of approximately \$66 million.

The total amount of unrecognized tax benefits as of the date of adoption of FIN 48 was approximately \$1.5 billion. Of this total, approximately \$1.0 billion (net of federal benefit of state issues, competent authority and foreign tax credit offsets) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate in future periods.

Merrill Lynch paid an assessment to Japan in 2005 for the fiscal years April 1, 1998 through March 31, 2003, in relation to the taxation of income that was originally reported in other jurisdictions. During

Table of Contents

the third quarter of 2005, Merrill Lynch started the process of obtaining clarification from international tax authorities on the appropriate allocation of income among multiple jurisdictions to prevent double taxation. In addition, Merrill Lynch filed briefs with the U.S. Tax Court in 2005 with respect to a tax case, which had been remanded for further proceedings in accordance with a 2004 opinion of the U.S. Court of Appeals for the Second Circuit. The U.S. Court of Appeals affirmed the initial adverse conclusion of the U.S. Tax Court rendered in 2003 against Merrill Lynch, with respect to a 1987 transaction. The U.S. Tax Court has yet to issue a decision on this remanded matter, and it is uncertain as to when a decision will be rendered. The unrecognized tax benefits with respect to this case and the Japanese assessment, while paid, have been included in the \$1.5 billion and the \$1.0 billion amounts above.

Merrill Lynch recognizes the accrual of interest and penalties related to unrecognized tax benefits in income tax expense. Interest and penalties accrued as of the beginning of the year were approximately \$107 million.

Merrill Lynch is under examination by the Internal Revenue Service (“IRS”) and other tax authorities in countries including Japan and the United Kingdom, and states in which Merrill Lynch has significant business operations, such as New York. The tax years under examination vary by jurisdiction. The IRS audits are in progress for the tax years 2004-2006. The IRS audits for the 2004 and 2005 tax years are expected to be completed in 2008. Japan tax authorities have completed audits through the tax year ended March 31, 2003. In the United Kingdom, Her Majesty’s Revenue and Customs has begun the audit for 2005. New York State and New York City audits have commenced for the years 2002-2006.

Merrill Lynch does not anticipate that unrecognized tax benefits will significantly change within 12 months of the reporting date.

Note 15. Regulatory Requirements

Effective January 1, 2005, Merrill Lynch became a consolidated supervised entity (“CSE”) as defined by the SEC. As a CSE, Merrill Lynch is subject to group-wide supervision, which requires Merrill Lynch to compute allowable capital and risk allowances on a consolidated basis. Merrill Lynch is in compliance with applicable CSE standards.

Certain U.S. and non-U.S. subsidiaries are subject to various securities, banking, and insurance regulations and capital adequacy requirements promulgated by the regulatory and exchange authorities of the countries in which they operate. These regulatory restrictions may impose regulatory capital requirements and limit the amounts that these subsidiaries can pay in dividends or advance to Merrill Lynch. Merrill Lynch’s principal regulated subsidiaries are discussed below.

Securities Regulation

As a registered broker-dealer, Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) is subject to the net capital requirements of Rule 15c3-1 under the Securities Exchange Act of 1934 (“the Rule”). Under the alternative method permitted by the Rule, the minimum required net capital, as defined, shall be the greater of 2% of aggregate debit items (“ADI”) arising from customer transactions or \$500 million. At June 29, 2007, MLPF&S’s regulatory net capital of \$4,090 million was approximately 15.1% of ADI, and its regulatory net capital in excess of the minimum required was \$3,474 million.

Table of Contents

As a futures commission merchant, MLPF&S is also subject to the capital requirements of the Commodity Futures Trading Commission (“CFTC”), which requires that minimum net capital should not be less than 8% of the total customer risk margin requirement plus 4% of the total non-customer risk margin requirement. MLPF&S substantially exceeds both standards.

Merrill Lynch International (“MLI”), a U.K. regulated investment firm, is subject to capital requirements of the Financial Services Authority (“FSA”). Financial resources, as defined, must exceed the total financial resources requirement set by the FSA. At June 29, 2007, MLI’s financial resources were \$17,275 million, exceeding the minimum requirement by \$1,895 million.

Merrill Lynch Government Securities Inc. (“MLGSI”), a primary dealer in U.S. Government securities, is subject to the capital adequacy requirements of the Government Securities Act of 1986. This rule requires dealers to maintain liquid capital in excess of market and credit risk, as defined, by 20% (a 1.2-to-1 capital-to-risk standard). At June 29, 2007, MLGSI’s liquid capital of \$2,396 million was 275.0% of its total market and credit risk, and liquid capital in excess of the minimum required was \$1,349 million.

Merrill Lynch Japan Securities Co. Ltd. (“MLJS”), a Japan-based regulated broker-dealer, is subject to capital requirements of the Japanese Financial Services Agency (“JFSA”). Net capital, as defined, must exceed 120% of the total risk equivalents requirement of the JFSA. At June 29, 2007, MLJS’s net capital was \$1,476 million, exceeding the minimum requirement by \$780 million.

Banking Regulation

Merrill Lynch Bank USA (“MLBUSA”) is a Utah-chartered industrial bank, regulated by the Federal Deposit Insurance Corporation (“FDIC”) and the State of Utah Department of Financial Institutions (“UTDFI”). Merrill Lynch Bank & Trust Co., FSB (“MLBT-FSB”) is a full service thrift institution regulated by the Office of Thrift Supervision (“OTS”), whose deposits are insured by the FDIC. Both MLBUSA and MLBT-FSB are required to maintain capital levels that at least equal minimum capital levels specified in federal banking laws and regulations. Failure to meet the minimum levels will result in certain mandatory, and possibly additional discretionary, actions by the regulators that, if undertaken, could have a direct material effect on the banks. The following table illustrates the actual capital ratios and capital amounts for MLBUSA and MLBT-FSB as of June 29, 2007.

(dollars in millions)

	Well Capitalized Minimum	MLBUSA		MLBT-FSB	
		Actual Ratio	Actual Amount	Actual Ratio	Actual Amount
er 1 leverage	5%	9.04%	\$5,364	8.87%	\$1,089
er 1 capital	6%	9.18%	5,364	10.39%	1,089
ital capital	10%	10.72%	6,262	14.74%	1,545

As a result of its ownership of MLBT-FSB, ML & Co. is registered with the OTS as a savings and loan holding company (“SLHC”) and subject to regulation and examination by the OTS as a SLHC. ML & Co. is classified as a unitary SLHC, and will continue to be so classified as long as it and MLBT-FSB continue to comply with certain conditions. Unitary SLHCs are exempt from the material restrictions imposed upon the activities of SLHCs that are not unitary SLHCs. SLHCs other than unitary SLHCs are generally prohibited from engaging in activities other than conducting business as a savings association, managing or controlling savings associations, providing services to subsidiaries or engaging in activities permissible for bank holding companies. Should ML & Co. fail to continue to

[Table of Contents](#)

qualify as a unitary SLHC, in order to continue its present businesses that would not be permissible for a SLHC, ML & Co. could be required to divest control of MLBT-FSB.

Merrill Lynch International Bank Limited (“MLIB”), an Ireland-based regulated bank, is subject to the capital requirements of the Financial Regulator of Ireland. MLIB is required to meet minimum regulatory capital requirements under the European Union (“EU”) banking law as implemented in Ireland by the Financial Regulator. At June 29, 2007, MLIB’s capital ratio was above the minimum requirement at 11.4% and its financial resources were \$8,613 million, exceeding the minimum requirement by \$1,047 million.

Note 16. Acquisitions

During the third quarter of 2006, Merrill Lynch announced an agreement to acquire the First Franklin mortgage origination franchise and related servicing platform from National City Corporation for \$1.3 billion. First Franklin originates non-prime residential mortgage loans through a wholesale network. The First Franklin acquisition was completed at the beginning of the fiscal first quarter of 2007 and the results of operations for the three and six-months ended June 29, 2007 are included in GMI.

On January 29, 2007, Merrill Lynch announced that it had entered into a definitive agreement with First Republic Bank (“First Republic”) to acquire all of the outstanding common shares of First Republic in exchange for a combination of cash and stock for a total transaction value of \$1.8 billion. First Republic is a private banking and wealth management firm focused on high-net-worth individuals and their businesses. The transaction is expected to close in the third quarter of 2007, pending necessary regulatory approval. The shareholders of First Republic approved this transaction on July 26, 2007. The results of operations of First Republic will be included in GWM.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Merrill Lynch & Co., Inc.:

We have reviewed the accompanying condensed consolidated balance sheet of Merrill Lynch & Co., Inc. and subsidiaries (“Merrill Lynch”) as of June 29, 2007, and the related condensed consolidated statements of earnings for the three-month and six-month periods ended June 29, 2007 and June 30, 2006, and of cash flows for the six-month periods ended June 29, 2007 and June 30, 2006. These interim financial statements are the responsibility of Merrill Lynch’s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 1, 3 and 14 to the condensed consolidated interim financial statements, in 2007 Merrill Lynch adopted Statement of Financial Accounting Standards No. 157, “*Fair Value Measurement*,” Statement of Financial Accounting Standards No. 159, “*The Fair Value Option for Financial Assets and Financial Liabilities — Including an amendment of FASB Statement No. 115*,” and FASB Interpretation No. 48, “*Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109*.”

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Merrill Lynch as of December 29, 2006, and the related consolidated statements of earnings, changes in stockholders’ equity, comprehensive income and cash flows for the year then ended (not presented herein); and in our report dated February 26, 2007, we expressed an unqualified opinion on those financial statements and included an explanatory paragraph regarding the change in accounting method in 2006 for share-based payments to conform to Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 29, 2006 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements and Non-GAAP Financial Measures

Certain statements in this report may be considered forward-looking, including those about management expectations, strategic objectives, growth opportunities, business prospects, anticipated financial results, the impact of off-balance sheet arrangements, significant contractual obligations, anticipated results of litigation and regulatory investigations and proceedings, and other similar matters. These forward-looking statements represent only Merrill Lynch & Co., Inc.'s ("ML & Co." and, together with its subsidiaries, "Merrill Lynch", "we", "our" or "us") beliefs regarding future performance, which is inherently uncertain. There are a variety of factors, many of which are beyond our control, which affect our operations, performance, business strategy and results and could cause our actual results and experience to differ materially from the expectations and objectives expressed in any forward-looking statements. These factors include, but are not limited to, actions and initiatives taken by both current and potential competitors, general economic conditions, the effects of current, pending and future legislation, regulation and regulatory actions, and the other risks and uncertainties detailed in this report. See Risk Factors that Could Affect Our Business in the Annual Report on Form 10-K for the year ended December 29, 2006 ("2006 Annual Report"). Accordingly, readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the dates on which they are made. We do not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the dates they are made. The reader should, however, consult further disclosures we may make in future filings of our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

From time to time, we may also disclose financial information on a non-GAAP basis where management uses this information and believes this information will be valuable to investors in gauging the quality of our financial performance, identifying trends in our results and providing more meaningful period-to-period comparisons. For a reconciliation of non-GAAP measures presented throughout this report see Exhibit 99.1.

OVERVIEW

Introduction

Merrill Lynch was formed in 1914 and became a publicly traded company on June 23, 1971. In 1973, we created the holding company, ML & Co., a Delaware corporation that, through its subsidiaries, is one of the world's leading capital markets, advisory and wealth management companies with offices in 38 countries and territories and total client assets of approximately \$1.7 trillion at June 29, 2007. As an investment bank, we are a leading global trader and underwriter of securities and derivatives across a broad range of asset classes, and we serve as a strategic advisor to corporations, governments, institutions and individuals worldwide. In addition, we own a 45% voting interest and approximately half of the economic interest of BlackRock, Inc. ("BlackRock"), one of the world's largest publicly traded investment management companies with over \$1 trillion in assets under management at June 29, 2007. Since the fourth quarter of 2006, our business segment reporting reflects the management reporting lines established after the merger of our Merrill Lynch Investment Managers ("MLIM") business with BlackRock on September 29, 2006 (the "BlackRock merger"), as well as the economic and long-term financial performance characteristics of the underlying businesses.

Table of Contents

Prior to the fourth quarter of 2006, we reported our business activities in three business segments: Global Markets and Investment Banking (“GMI”), Global Private Client (“GPC”), and MLIM. Effective with the BlackRock merger, MLIM ceased to exist as a separate business segment. Accordingly, a new business segment, Global Wealth Management (“GWM”), was created, consisting of GPC and Global Investment Management (“GIM”). GWM along with GMI are now our business segments. We have restated prior period segment information to conform to the current period presentation and, as a result, are presenting GWM as if it had existed for these prior periods. See Note 2 to the Condensed Consolidated Financial Statements for further information on segments.

The BlackRock merger closed on the last day of our third fiscal quarter of 2006. For more information on the BlackRock merger, refer to Note 2 of the 2006 Annual Report.

The following is a description of our business segments, including MLIM, which ceased to exist as a separate business segment effective with the BlackRock merger:

- *GMI*, our institutional business segment, provides trading, capital markets services, investment banking and advisory services to corporations, financial institutions, institutional investors, and governments around the world. GMI’s Global Markets division facilitates client transactions and is a market maker in securities, derivatives, currencies, commodities and other financial instruments used to satisfy client demands. In addition, GMI also engages in certain proprietary trading activities. Global Markets also provides clients with financing, securities clearing, settlement, and custody services and also engages in principal and private equity investing. GMI’s Investment Banking division provides a wide range of securities origination and strategic advisory services for issuer clients, including underwriting and placement of public and private equity, debt and related securities, as well as lending and other financing activities for clients globally. These services also include advising clients on strategic issues, valuation, mergers, acquisitions and restructurings. GMI’s growth strategy entails a program of investments in personnel and technology to gain further scale in certain asset classes and geographies.
- *GWM*, our full-service retail wealth management segment, provides brokerage, investment advisory and financial planning services, offering a broad range of both proprietary and third-party wealth management products and services globally to individuals, small- to mid-size businesses, and employee benefit plans. Within the GPC division, most of our services are delivered by our Financial Advisors (“FAs”) through a global network of branch offices. GPC’s offerings include commission and fee-based investment accounts; banking, cash management, and credit services, including consumer and small business lending and Visa® cards; trust and generational planning; retirement services; and insurance products. GWM’s GIM division includes a business that creates and manages hedge fund and other alternative investment products for GPC clients, and Merrill Lynch’s share of net earnings from its ownership positions in other investment management companies, including our investment in BlackRock. GWM’s growth priorities include continued growth in client assets, the hiring of additional FAs, client segmentation, annuitization of revenues through fee-based products, diversification of revenues through adding products and services, investments in technology to enhance productivity and efficiency, and disciplined expansion into additional geographic areas globally.
- *MLIM*, our asset management segment prior to the BlackRock merger, offered a wide range of investment management capabilities to retail and institutional investors through proprietary and third-party distribution channels globally. Asset management capabilities included equity, fixed income, money market, index, enhanced index and alternative investments, which were offered through vehicles such as mutual funds, privately managed accounts, and retail and institutional separate accounts.

[Table of Contents](#)

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The following is a summary of our critical accounting policies. For a full description of these and other accounting policies see Note 1 of the 2006 Annual Report and Note 1 to the Condensed Consolidated Financial Statements.

Use of Estimates

In presenting the Condensed Consolidated Financial Statements, management makes estimates regarding:

- Valuations of assets and liabilities requiring fair value estimates including:
 - Trading inventory and investment securities;
 - Private equity and principal investments;
 - Loans and allowance for loan losses;
 - Certain receivables under resale agreements and payables under repurchase agreements;
 - Certain long-term borrowings, primarily structured debt;
- The outcome of litigation;
- The realization of deferred taxes and the recognition and measurement of uncertain tax positions;
- Assumptions and cash flow projections used in determining whether VIEs should be consolidated and the determination of the qualifying status of special purpose entities;
- The carrying amount of goodwill and other intangible assets;
- The amortization period of intangible assets with definite lives;
- Valuation of share-based payment compensation arrangements;
- Insurance reserves and recovery of insurance deferred acquisition costs; and
- Other matters that affect the reported amounts and disclosure of contingencies in the financial statements.

Estimates, by their nature, are based on judgment and available information. Therefore, actual results could differ from those estimates and could have a material impact on the Condensed Consolidated Financial Statements, and it is possible that such changes could occur in the near term. For more information regarding the specific methodologies used in determining estimates, refer to Use of Estimates in Note 1 of the 2006 Annual Report.

Valuation of Financial Instruments

Proper valuation of financial instruments is a critical component of our financial statement preparation. We early adopted the provisions of SFAS No. 157 *Fair Value Measurements* ("SFAS No. 157") in the first quarter of 2007. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure requirements for fair value measurements. SFAS No. 157 nullifies the guidance provided by the Emerging Issues Task Force ("EITF") Issue No. 02-3 *Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities* ("EITF 02-3") that prohibits recognition of day one gains or losses on derivative transactions where model inputs that significantly impact valuation are not observable. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between marketplace participants at the measurement date (i.e., the exit price).

We also early adopted SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities* ("SFAS No. 159") in the first quarter of 2007 and we have applied this option to value

Table of Contents

certain financial instruments. Such instruments include certain structured debt, repurchase and resale agreements, loans, available-for-sale securities and non-qualifying investments. The change in fair value of these instruments is recorded in principal transactions revenues and other revenues in the Condensed Consolidated Statement of Earnings. See Note 3 to the Condensed Consolidated Financial Statements for further information.

Fair values for exchange-traded securities and certain exchange-traded derivatives, principally certain options contracts, are based on quoted market prices. Fair values for over-the-counter (“OTC”) derivatives, principally forwards, options, and swaps, represent amounts estimated to be received from or paid to a market participant in settlement of these instruments. These derivatives are valued using pricing models based on the net present value of estimated future cash flows and directly observed prices from exchange-traded derivatives, other OTC trades, or external pricing services and other inputs such as quoted interest and currency indices, while taking into account the counterparty’s credit rating, or our own credit rating as appropriate.

New and/or complex instruments may have immature or limited markets. As a result, the pricing models used for valuation often incorporate significant estimates and assumptions that market participants would use in pricing the instrument, which may impact the results of operations reported in the Condensed Consolidated Financial Statements. For long-dated and illiquid contracts, we apply extrapolation methods to observed market data in order to estimate inputs and assumptions that are not directly observable. This enables us to mark to fair value all positions consistently when only a subset of prices is directly observable. Values for OTC derivatives are verified using observed information about the costs of hedging the risk and other trades in the market. As the markets for these products develop, we continually refine our pricing models to correlate more closely to the market risk of these instruments. Obtaining the fair value for OTC derivative contracts requires the use of management judgment and estimates. Prior to adoption of SFAS No. 157, we followed the provisions of EITF 02-3. Under EITF 02-3, recognition of unrealized gains or losses at inception of a derivative transaction was prohibited in the absence of observable market prices or parameters in an active market, observable prices or parameters of other comparable current market transactions, or other observable data supporting a fair value based on a pricing model at inception of the contract. Gains and losses deferred at inception under EITF 02-3 were previously recognized at the earlier of valuation observability or termination of the contract. SFAS No. 157 nullifies this guidance in EITF 02-3.

Valuation adjustments are an integral component of the valuation process for financial instruments that are carried at fair value but not traded in active markets (i.e. those transactions that are categorized in Levels 2 and 3 of the SFAS No. 157 fair value hierarchy. See Note 3 to the Condensed Consolidated Financial Statements for further information related to the SFAS No. 157 fair value hierarchy). These adjustments may be taken when either the sheer size of the trade or other specific features of the trade or particular market (such as counterparty credit quality, concentration or market liquidity) requires adjustment to the values derived from the pricing models, and other market participants would also consider such an adjustment in pricing the financial instrument. For trades that may have quoted market prices but are subject to sales restrictions, we estimate the fair value of these securities taking into account such restrictions, which may result in a fair value that is less than the quoted market price.

In accordance with SFAS No. 157, we have categorized our financial instruments, based on the priority of the inputs to the valuation technique, into a three level fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the financial instruments fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the instrument.

Table of Contents

Financial assets and liabilities recorded on the Condensed Consolidated Balance Sheets are categorized based on the inputs to the valuation techniques as follows:

- Level 1.* Financial assets and liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market (examples include active exchange-traded equity securities, listed derivatives, most U.S. Government and agency securities, and certain other sovereign government obligations).
- Level 2.* Financial assets and liabilities whose values are based on quoted prices in markets that are not active or model inputs that are observable either directly or indirectly for substantially the full term of the asset or liability. Level 2 inputs include the following:
- a) Quoted prices for similar assets or liabilities in active markets (for example, restricted stock);
 - b) Quoted prices for identical or similar assets or liabilities in non-active markets (examples include corporate and municipal bonds, which trade infrequently);
 - c) Pricing models whose inputs are observable for substantially the full term of the asset or liability (examples include most over-the-counter derivatives including interest rate and currency swaps); and
 - d) Pricing models whose inputs are derived principally from or corroborated by observable market data through correlation or other means for substantially the full term of the asset or liability (examples include certain residential and commercial mortgage related assets, including loans, securities and derivatives).
- Level 3.* Financial assets and liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset or liability (examples include certain private equity investments, certain residential and commercial mortgage related assets (including loans, securities and derivatives), and long-dated or complex derivatives including certain foreign exchange options and long-dated options on gas and power). See Note 3 to the Condensed Consolidated Financial Statements for additional information.

Litigation

We have been named as a defendant in various legal actions, including arbitrations, class actions, and other litigation arising in connection with our activities as a global diversified financial services institution. We are also involved in investigations and/or proceedings by governmental and self-regulatory agencies. In accordance with SFAS No. 5, *Accounting for Contingencies*, we will accrue a liability when it is probable that a liability has been incurred, and the amount of the loss can be reasonably estimated. In many lawsuits and arbitrations, including class action lawsuits, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case no accrual is made until that time. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek substantial or indeterminate damages, we cannot predict what the eventual loss or range of loss related to such matters will be. See Note 12 to the Condensed Consolidated Financial Statements and Other Information — Legal Proceedings for further information.

Table of Contents

Variable Interest Entities (VIEs)

In the normal course of business, we enter into a variety of transactions with VIEs. The applicable accounting guidance requires us to perform a qualitative and/or quantitative analysis of each new VIE at inception to determine whether we must consolidate the VIE. In performing this analysis, we make assumptions regarding future performance of assets held by the VIE, taking into account estimates of credit risk, estimates of the fair value of assets, timing of cash flows, and other significant factors. Although a VIE's actual results may differ from projected outcomes, a revised consolidation analysis is generally not required subsequent to the initial assessment. If a VIE meets the conditions to be considered a QSPE, it is typically not required to be consolidated by us. A QSPE's activities must be significantly limited. A servicer of the assets held by a QSPE may have discretion in restructuring or working out assets held by the QSPE, as long as the discretion is significantly limited and the parameters of that discretion are fully described in the legal documents that established the QSPE. Determining whether the activities of a QSPE and its servicer meet these conditions requires the use of judgment by management.

Income Taxes

Tax laws are complex and subject to different interpretations by Merrill Lynch and the various taxing authorities. Merrill Lynch regularly assesses the likelihood of assessments in each of the taxing jurisdictions by making judgments and interpretations about the application of these complex tax laws and estimating the impact to our financial statements.

Merrill Lynch is under examination by the Internal Revenue Service ("IRS") and other tax authorities in countries including Japan and the United Kingdom, and states in which we have significant business operations, such as New York. The tax years under examination vary by jurisdiction. The IRS audits are in progress for the tax years 2004-2006. The IRS audits for the 2004 and 2005 tax years are expected to be completed in 2008. Japan tax authorities have completed audits through the tax year ended March 31, 2003. In the United Kingdom, Her Majesty's Revenue and Customs has begun the audit for 2005. New York State and New York City audits have commenced for the years 2002-2006. Also, Merrill Lynch paid an assessment to Japan in 2005 for the fiscal years April 1, 1998 through March 31, 2003, in relation to the taxation of income that was originally reported in other jurisdictions. During the third quarter of 2005, we started the process of obtaining clarification from international tax authorities on the appropriate allocation of income among multiple jurisdictions to prevent double taxation. Merrill Lynch believes that the estimate of the level of unrecognized tax benefits is appropriate in relation to the potential for additional assessments. Merrill Lynch adjusts the level of unrecognized tax benefits when there is more information available, or when an event occurs requiring a change. The reassessment of unrecognized tax benefits could have a material impact on Merrill Lynch's effective tax rate in the period in which it occurs.

Table of Contents

BUSINESS ENVIRONMENT⁽¹⁾

Global financial markets continued to rise during the second quarter of 2007. Major U.S. and European equity markets reached record highs in mid-June, before declining throughout the remainder of the quarter due to continued concern regarding the U.S. housing market, higher U.S. Treasury yields and increases in interest rates around the world. Emerging markets soared in the second quarter driven by healthy economies, strong corporate earnings and a declining U.S. dollar. The U.S. Federal Reserve System's Federal Open Market Committee left benchmark interest rates unchanged at 5.25%, where they have been since mid-2006. Long-term interest rates, as measured by the 10-year U.S. Treasury bond, ended the second quarter at 5.03%, up from 4.65% at the end of the first quarter of 2007.

Major U.S. equity indices ended the second quarter of 2007 in positive territory with the Dow Jones Industrial Average, the Nasdaq Composite and the Standard & Poor's 500 Index up by 9%, 8% and 6%, respectively.

International equity indices generally ended the quarter with positive results fueled primarily by emerging markets. In Europe, the Dow Jones Stoxx Index, the FTSE 100 Index and Frankfurt's DAX Index rose 7%, 5% and 16%, respectively. Asian equity markets were also up as Japan's Nikkei Stock Average, Hong Kong's Hang Seng and China's Shanghai Composite Index rose 5%, 10% and 20%, respectively, while India's Sensex rose 12%. In Latin America, Brazil's Bovespa Index was up 19%.

Equity trading dollar volumes on the New York Stock Exchange and on the Nasdaq increased sequentially in the second quarter. However, the number of shares traded on these exchanges was flat compared to the first quarter of 2007. Equity market volatility was mixed for the quarter. The S&P 500 volatility was up, as indicated by higher average levels for the Chicago Board Options Exchange SPX Volatility Index, while the Nasdaq 100 volatility was down, as indicated by lower average levels for the American Stock Exchange QQQ Volatility Index.

Second quarter global debt and equity underwriting volumes of \$2.2 trillion were up 2% sequentially and up 20% from the year-ago quarter. Global debt underwriting volumes of \$1.9 trillion were down 3% sequentially, but up 16% compared to the year-ago quarter, while global equity underwriting volumes of \$287 billion were up 62% sequentially and 50% compared to the year-ago quarter.

Merger and acquisition ("M&A") activity increased sharply during the quarter as the value of global announced deals was \$1.7 trillion, an increase of 48% sequentially and 82% from the year-ago quarter. However, global completed M&A activity was flat sequentially at \$937 billion, but up 28% from the year-ago quarter.

While the outlook for growth in most global businesses in which we operate remains strong, the challenging market conditions in certain credit markets that existed during the first half of 2007 have intensified in the beginning of the third quarter. Characteristics of this environment include increased volatility, wider credit spreads, reduced price transparency, lower levels of liquidity, and rating agency downgrades. These factors have impacted and may continue to impact the sub-prime mortgage market, including certain collateralized debt obligations (CDOs), as well as other structured credit products and components of the leveraged finance origination market. Merrill Lynch continues to be a major participant in these markets with risk exposures through cash positions, loans, derivatives and commitments. Given current market conditions, significant risk remains that could adversely impact these exposures and results of operations. We continue our disciplined risk management efforts to proactively execute market strategies to manage our overall portfolio of positions and exposures with respect to market, credit and liquidity risks.

(1) Debt and equity underwriting and merger and acquisition volumes were obtained from Dealogic.

Quarterly Results of Operations

Our net earnings were \$2.1 billion for the 2007 second quarter, driven by a 19% increase in net revenues from the 2006 second quarter to \$9.7 billion. Earnings per common share were \$2.48 basic and \$2.24 diluted for the 2007 second quarter, up 39% and 37%, respectively, from the year-ago

Table of Contents

quarter. Pre-tax earnings of \$3.0 billion increased 29% from the prior-year period, and the annualized return on average common equity increased 3.8 percentage points to 22.4%.

Principal transactions revenues include realized gains and losses from the purchase and sale of equity and fixed income securities, including government bonds and municipal securities in which we act as principal, as well as unrealized gains and losses on trading assets and liabilities, including commodities, derivatives, and loans. Principal transactions revenues were \$3.5 billion, an increase of 201% from the year-ago quarter driven primarily by our trading businesses with the strongest increases coming from credit, equity-linked, interest rate, commodity and cash equity trading activities. The increase was partially offset by a decline in net revenues from our structured finance and investments business, which includes mortgage-related activities. Revenues from mortgage-related activities for the second quarter of 2007 declined from the prior-year period resulting from a difficult environment for the origination, securitization and trading of sub-prime mortgage loans and securities in the United States.

Net interest profit is a function of (i) the level and mix of total assets and liabilities, including trading assets owned, deposits, financing and lending transactions, and trading strategies associated with the institutional securities business, and (ii) the prevailing level, term structure and volatility of interest rates. Net interest profit is an integral component of trading activity. In assessing the profitability of our client facilitation and trading activities, we view principal transactions and net interest profit in the aggregate as net trading revenues. Changes in the composition of trading inventories and hedge positions can cause the mix of principal transactions and net interest profit to fluctuate. Net interest profit was \$593 million, down 49% from the 2006 second quarter due primarily to higher interest expenses, partially offset by higher interest revenue from deposit spreads earned.

Commissions revenues primarily arise from agency transactions in listed and OTC equity securities and commodities, insurance products and options. Commission revenues also include distribution fees for promoting and distributing mutual funds and hedge funds. Commission revenues were \$1.8 billion, up 16% from the 2006 second quarter, due primarily to an increase in global transaction volumes, particularly in listed equities and mutual funds.

Investment banking revenues include (i) origination revenues representing fees earned from the underwriting of debt, equity and equity-linked securities, as well as loan syndication and commitment fees and (ii) strategic advisory services revenues including merger and acquisition and other investment banking advisory fees. Investment banking revenues were \$1.5 billion, up 26% from the 2006 second quarter, driven by increased revenues in both equity and debt originations, as well as increased strategic advisory services.

Managed accounts and other fee-based revenues primarily consist of asset-priced portfolio service fees earned from the administration of separately managed and other investment accounts for retail investors, annual account fees, and certain other account-related fees. In addition, until the BlackRock merger at the end of the third quarter of 2006, managed accounts and other fee-based revenues also included fees earned from the management and administration of retail mutual funds and institutional funds such as pension assets, and performance fees earned on certain separately managed accounts and institutional money management arrangements. Managed accounts and other fee-based revenues were \$1.4 billion, down 20% from the second quarter of 2006, driven primarily by the absence of the asset management revenues earned by MLIM as a result of the BlackRock merger at the end of the third quarter of 2006. This decrease was partially offset by higher asset-based fees reflecting the impact of net inflows into annuitized-revenue accounts and higher average equity market values.

Revenues from consolidated investments include revenues from investments that are consolidated under SFAS No. 94, *Consolidation of All Majority-owned Subsidiaries* and FASB Interpretation No. 46, *Consolidation of Variable Interest Entities — an interpretation of ARB No. 51* (“FIN 46R”). Revenues

Table of Contents

from consolidated investments were \$133 million, down from \$186 million in the 2006 second quarter reflecting lower investment gains.

Other revenues include realized investment gains and losses, dividends on cost method investments, unrealized gains on equity method investments, fair value adjustments on private equity investments that are held for capital appreciation and/or current income, gains related to the sale of mortgages, unrealized losses on certain available-for-sale securities, and translation gains and losses on foreign denominated assets and liabilities. Other revenues were \$719 million, 35% lower than the 2006 second quarter. The overall decrease primarily reflects lower revenues from private equity investments, which were a record in the prior year period, partially offset by earnings from our investment in BlackRock.

Non-compensation expenses were \$1.9 billion in the second quarter of 2007, up 6% from the year-ago quarter. The ratio of total non-compensation expenses to total net revenues was 20.0% during the second quarter of 2007, down from 22.6% in the year-ago quarter. Communication and technology costs were \$484 million, up 13% from the year-ago quarter primarily due to technology investments for growth. Brokerage, clearing and exchange fees were \$346 million, up 30% from the second quarter of 2006, primarily due to higher transaction volumes. Occupancy costs and related depreciation were \$277 million, up 11% from the year-ago quarter principally due to higher office rental expenses and office space added via acquisitions. Professional fees were \$245 million, up 25% from the year-ago quarter due to higher employment service fees and other professional fees associated with an increase in business activity. Expenses of consolidated investments totaled \$43 million, down from \$145 million due principally to decreased expenses associated with the related decrease in revenues from consolidated investments.

Our second quarter 2007 effective tax rate was 29.2% down from 30.5% in the second quarter of 2006 as we recognized a small discrete net benefit, relating to settlements and changes in estimates for prior years.

Year-to-date Results of Operations

For the first six months of 2007, net earnings were \$4.3 billion, on record net revenues of \$19.6 billion that grew 21% from the first half of 2006. Earnings per common share through the first half of 2007 were \$4.98 basic and \$4.50 diluted. Net earnings for the first six months of 2006 included \$1.2 billion after-tax (\$1.8 billion pre-tax) or \$1.21 per diluted share, of one-time non-cash compensation expenses arising from modifications to the retirement eligibility requirements for existing stock-based employee compensation awards and the adoption of SFAS No. 123 as revised in 2004 ("SFAS No. 123R").

Excluding the one-time compensation expenses incurred in the first quarter of 2006, net earnings of \$4.3 billion for the first six months of 2007 were up 31% from the prior-year period, and pre-tax earnings of \$6.1 billion were up 30% from the first six months of 2006. On the same basis, the pre-tax profit margin of 31.2% was up 2.1 percentage points from the first half of 2006, and the annualized return on average common equity of 22.8% was up 3.8 percentage points from 19.0% in the first six months of 2006. Also on the same basis, earnings per common share of \$4.98 basic and \$4.50 diluted were both up 37% from the prior-year period. See Exhibit 99.1 for a reconciliation of non-GAAP measures.

Merrill Lynch's year-to-date effective tax rate was 29.8%, compared with 28.3% in the prior-year period, or 30.1% excluding the one-time compensation expenses.

BUSINESS SEGMENTS

Our operations are currently organized into two business segments: GMI and GWM. GMI provides full service global markets and origination products and services to corporate, institutional, and government clients around the world. GWM creates and distributes investment products and services for individuals, small- and mid-size businesses, and employee benefit plans. For information on the principal methodologies used in preparing the segment results, refer to Note 3 of the 2006 Annual Report. For information regarding the BlackRock merger in September 2006, refer to Note 2 of the 2006 Annual Report.

Results for the six months ended June 30, 2006 include one-time compensation expenses, as follows: \$1.4 billion in GMI, \$281 million in GWM and \$109 million in MLIM; refer to Note 1 of the 2006 Annual Report for further information on one-time compensation expenses.

Revenues and expenses associated with inter-segment activities are recognized in each segment. In addition, revenue and expense sharing agreements for joint activities between segments are in place, and the results of each segment reflect their agreed-upon apportionment of revenues and expenses associated with these activities. See Note 3 of the 2006 Annual Report for further information.

The following segment results represent the information that is used by our management in its decision-making processes. Prior period amounts have been reclassified to conform to the current period presentation.

Table of Contents

During the second quarter of 2007, each of GMI's major business lines — Fixed Income, Currencies and Commodities ("FICC"); Equity Markets; and Investment Banking — generated very strong net revenues compared with the second quarter of 2006. GMI's net revenues increased 36% from the 2006 second quarter, to \$6.2 billion. Pre-tax earnings were \$2.1 billion, 43% higher than the prior-year period, driven by strong revenue growth and continued focus on expenses. The pre-tax profit margin was 34.0%, up from 32.1% in the year-ago quarter.

For the first six months of 2007, GMI's net revenues were a record at \$12.7 billion, an increase of 39% from the first half of 2006, driven by strong revenues in nearly every major line of business. Pre-tax earnings were a record \$4.4 billion, 164% higher from the prior-year period. Pre-tax profit margin was 34.9%, compared with 18.4% in the first half of 2006. Excluding the impact of the \$1.4 billion of one-time compensation expenses recognized by GMI in the first quarter of 2006, GMI's pre-tax earnings for the first six months of 2006 were \$3.1 billion, and the pre-tax profit margin was 33.4%. See Exhibit 99.1 for a reconciliation of non-GAAP measures.

A detailed discussion of GMI's net revenues follows:

Fixed Income, Currencies and Commodities (FICC)

FICC net revenues include principal transactions and net interest profit (which we believe should be viewed in aggregate to assess trading results), commissions, revenues from principal investments, fair value adjustments on investments that are held for capital appreciation and/or current income, and other revenues.

In the second quarter of 2007, FICC net revenues were \$2.6 billion, up 55% from the second quarter of 2006. For the first six months of 2007, FICC generated a record \$5.4 billion in net revenues, up 45% from the first six months of 2006, reflecting increased diversity and depth across asset classes and regions. These increases were driven primarily by strong growth in net revenues from trading credit products, interest rate products and commodities. These increases were partially offset by a revenue decline in the structured finance and investments business, which includes mortgage-related activities.

Revenues from mortgage-related activities for both the second quarter of 2007 and the first six months of 2007 declined from the prior year periods resulting primarily from a difficult environment for the origination, securitization and trading of sub-prime mortgage loans and securities in the United States.

Equity Markets

Equity Markets net revenues include commissions, principal transactions and net interest profit (which we believe should be viewed in aggregate to assess trading results), revenues from equity method investments, fair value adjustments on private equity investments that are held for capital appreciation and/or current income, and other revenues.

In the second quarter of 2007, Equity Markets net revenues were \$2.1 billion, up 15% over the year-ago quarter with strong performances in nearly every major revenue category. The increase was driven by record net revenues in equity-linked trading and financing and services, as well as significant growth in revenues from our cash and proprietary trading businesses. These increases were partially offset by a revenue decline in our private equity business.

For the first six months of 2007, Equity Markets net revenues were a record \$4.5 billion, up 31% from the year-ago period. The increase in net revenues was primarily driven by equity-linked trading and our cash trading business, partially offset by a decline in our private equity business.

[Table of Contents](#)

Investment Banking

Investment Banking net revenues for the second quarter of 2007 were \$1.4 billion, up 41% from the year-ago quarter. The substantial increase was driven by strong revenue growth in equity origination, debt origination and merger and acquisition advisory services.

For the first half of 2007, Investment Banking net revenues were a record \$2.8 billion, up 44% from the prior-year period, primarily due to strong growth in equity origination revenues.

Origination

Origination revenues represent fees earned from the underwriting of debt, equity and equity-linked securities as well as loan syndication fees.

Origination revenues in the second quarter of 2007 were \$1.0 billion, up 43% from the year-ago quarter. Equity origination set a new revenue record at \$547 million, up 74% from the 2006 second quarter. Debt origination revenues were also strong at \$479 million, up 19% from the year-ago quarter. The increase in revenues for debt and equity origination compared to the prior year quarter was primarily related to an increase in deal volume.

For the first six months of 2007, origination revenues were \$2.0 billion, up 43% from the year-ago period. Equity and debt origination revenues were up 65% and 29%, respectively, compared with the first six months of 2006. The increase in revenues for debt and equity origination compared to the prior-year period was primarily related to an increase in deal volume.

On April 25, 2007, we agreed to purchase approximately \$3 billion of perpetual convertible preferred shares from a key client, in a non-strategic capital markets transaction that enabled the client to raise funds to retire a previously issued series of preferred stock. We intend to hold this investment for a substantial period of time and to utilize appropriate risk management techniques to limit the impact of the change in value of the securities on our financial position and results of operations. The revenues associated with this transaction have been included in GMI's equity origination and equity markets businesses and recorded in principal transactions in the accompanying Condensed Consolidated Statements of Earnings for the three- and six-month periods ended June 29, 2007.

Strategic Advisory Services

Strategic advisory services revenues, which include merger and acquisition and other advisory fees, were \$397 million in the second quarter of 2007, an increase of 34% over the year-ago quarter as overall deal volume increased.

Year-to-date strategic advisory services revenues increased 44% from the year-ago period, to \$796 million, on higher activity and an increase in our share of completed merger and acquisition volume. For additional information on GMI's segment results, refer to Note 2 to the Condensed Consolidated Financial Statements.

N/M = Not Meaningful

(1) Includes interest component of non-qualifying derivatives which are included in other revenues on the Condensed Consolidated Statements of Earnings.

(2) Includes 170 and 140 Financial Advisors associated with the Mitsubishi UFJ joint venture at the end of 2Q07 and 2Q06, respectively.

GWM is comprised of GPC and GIM. Our share of the after-tax earnings of BlackRock are included in the GIM portion of GWM revenues for the three- and six-month periods ended June 29, 2007, but not the three- and six-month periods ended June 30, 2006, when our asset management activities were reported in the former MLIM segment.

GWM generated record net revenues of \$3.6 billion for the second quarter of 2007, up 18% from the year-ago quarter, reflecting strong growth in both GPC and GIM businesses. Pre-tax earnings were \$1.0 billion, up 39% from the year-ago period, and the pre-tax profit margin was a record 27.9%, compared with 23.7% in the second quarter of 2006.

For the first six months of 2007, GWM's net revenues increased 17%, to a record \$7.0 billion, driven by record revenues in both GPC and GIM. Excluding the impact of the \$281 million of one-time compensation expenses recognized by GWM in the first quarter of 2006, GWM's 2007 pre-tax earnings for the first six months of 2007 were up 35% from the year-ago period to a record \$1.9 billion, driven by growth in revenues. On the same basis, the pre-tax profit margin was 26.4%, compared with 22.8% in the year-ago period, driven by the impact of the investment in BlackRock and strong operating leverage across the business. See Exhibit 99.1 for a reconciliation of non-GAAP measures.

GWM's net inflows of client assets into annuitized-revenue products were \$12 billion for the second quarter of 2007 and \$28 billion for the first half of 2007. Assets in annuitized-revenue products ended the quarter at \$668 billion, up 19% from the year-ago quarter. Total client assets in GWM accounts

[Table of Contents](#)

were \$1.7 trillion, up 14% from the year-ago quarter. Total net new money was \$9 billion for the second quarter of 2007 and \$24 billion for the first six months of 2007.

The value of client assets in GWM accounts at June 29, 2007 and June 30, 2006 follows:

(dollars in billions)

	June 29, 2007	June 30, 2006
Assets in client accounts:		
U.S.	\$1,550	\$1,370
Non-U.S.	153	124
Total	\$1,703	\$1,494

On January 29, 2007, we announced that we had entered into a definitive agreement with First Republic Bank (“First Republic”) to acquire all of the outstanding common shares of First Republic in exchange for a combination of cash and stock for a total transaction value of \$1.8 billion. First Republic is a private banking and wealth management firm focused on high-net-worth individuals and their businesses. The transaction is expected to close in the third quarter of 2007, pending necessary regulatory approval. The shareholders of First Republic approved this transaction on July 26, 2007. The results of operations of First Republic will be included in GWM.

Global Private Client (GPC)

GPC’s second quarter 2007 net revenues were \$3.3 billion, up 13% from the year-ago quarter. The increase in GPC’s net revenues was driven by all major revenue categories. For the first six months of 2007, GPC’s net revenues increased 12% over the prior-year period to a record \$6.5 billion.

Financial Advisor headcount reached 16,200 at the end of the second quarter of 2007, a net increase of 680 FAs since the second quarter of 2006, as GPC continued to successfully execute its strategy for recruiting and training high-quality FAs.

A detailed discussion of GPC’s revenues follows:

Fee-based revenues

Fee-based revenues primarily consist of portfolio service fees that are derived from accounts that charge an annual fee based on net asset value (generally billed quarterly in advance based on prior quarter asset values), such as Merrill Lynch Consults® (a separately managed account product) and Unlimited Advantage® (a fee-based brokerage account). Fee-based revenues also include fees from insurance products and taxable and tax-exempt money market funds, as well as fixed annual account fees and other account-related fees, and commissions related to distribution fees on mutual funds.

In March 2007, the U.S. Court of Appeals for the District of Columbia Circuit held that the SEC exceeded its rulemaking authority with respect to Rule 202(a)(11)-1 of the Investment Advisers Act of 1940 (the “Fee-Based Rule”). The Fee-Based Rule generally exempts certain broker-dealers from the requirement to register as investment advisers under the Advisers Act with respect to the offering of fee-based brokerage services. In its decision, the court overturned the Fee-Based Rule in its entirety. While the result of this decision will likely affect certain of our service offerings, we do not expect it to have a material impact on our future financial results.

GPC’s fee-based revenues were \$1.6 billion in the second quarter of 2007, up 11% from the year-ago quarter. On a year-to-date basis, fee-based revenues increased 12% from the year-ago period to

Table of Contents

\$3.1 billion. These increases reflect continued growth in assets in annuitized-revenue products and higher market values.

Transactional and origination revenues

Transactional and origination revenues include certain commission revenues, such as those that arise from agency transactions in listed and OTC equity securities, insurance products, and mutual funds. These revenues also include principal transactions which primarily represent bid-offer revenues on government bonds and municipal securities, as well as new issue revenues which include selling concessions on newly issued debt and equity securities, including shares of closed-end funds.

Transactional and origination revenues were \$1.0 billion in the second quarter of 2007, up 14% from the year-ago quarter, driven primarily by increased origination activity. Year-to-date transactional and origination revenues were \$1.9 billion, up 9% from the year-ago period, also primarily due to increased origination activity.

Net interest profit and related hedges

Net interest profit (interest revenues less interest expenses) and related hedges include GPC's allocation of the interest spread earned in our banking subsidiaries for deposits, as well as interest earned, net of provisions for loan losses, on margin, small- and middle-market business and other loans, corporate funding allocations, and the interest component of non-qualifying derivatives.

GPC's net interest profit and related hedge revenues were \$587 million in the second quarter of 2007, up 10% from the year-ago quarter. On a year-to-date basis, GPC's net interest profit and related hedges revenues were up 12% to \$1.2 billion. These increases reflect higher spreads on deposits due to a year-over-year increase in short-term interest rates.

Other revenues

GPC's other revenues were \$117 million in the second quarter of 2007, up 52% from the year-ago quarter. For the first six months of 2007, other revenues were up 61% to \$214 million. The increases for both period comparisons were primarily due to additional revenues from the distribution of mutual funds and higher foreign exchange gains.

Global Investment Management (GIM)

GIM includes revenues from the creation and management of hedge fund and other alternative investment products for clients, as well as our share of net earnings from our ownership positions in other investment management companies, including BlackRock.

GIM's second quarter 2007 revenues of \$305 million were up 119% from the year-ago quarter. For the first six months of 2007, GIM's revenues were \$566 million, up 133% from 2006. The increase in net revenues for both period comparisons was primarily due to the inclusion of revenues from our ownership position in BlackRock.

For additional information on GWM's segment results, refer to Note 2 to the Condensed Consolidated Financial Statements.

[Table of Contents](#)

Merrill Lynch Investment Managers

On September 29, 2006, Merrill Lynch merged MLIM with BlackRock in exchange for a total of 65 million common and preferred shares in the newly combined BlackRock, representing an economic interest of approximately half. Following the merger, the MLIM business segment ceased to exist, and under the equity method of accounting, an estimate of the net earnings associated with Merrill Lynch's ownership position in BlackRock is recorded in the GIM portion of the GWM segment. For the second quarter of 2006, MLIM's net revenues were \$630 million, and its pre-tax earnings were \$240 million. For the first six months of 2006, MLIM's net revenues were \$1.2 billion, and its pre-tax earnings were \$353 million. Excluding the impact of the \$109 million of one-time compensation expenses recognized by MLIM in the first quarter of 2006, MLIM's pre-tax earnings for the first six months of 2006 were \$462 million.

GEOGRAPHIC INFORMATION

Our operations are organized into five regions which include: the United States; Europe, Middle East, and Africa ("EMEA"); Pacific Rim; Latin America; and Canada. The information that follows, in management's judgment, provides a reasonable representation of each region's contribution to the consolidated net revenues for the three and six months ended June 29, 2007 and June 30, 2006:

(dollars in millions)

	For the Three Months Ended			For the Six Months Ended		
	June 29, 2007	June 30, 2006 ⁽¹⁾	% Inc	June 29, 2007	June 30, 2006 ⁽²⁾	% Inc
Net revenues						
EMEA	\$2,121	\$1,695	25%	\$ 4,217	\$ 3,373	25%
Pacific Rim	1,482	998	48	2,660	1,880	41
Latin America	344	250	38	732	540	36
Canada	118	97	22	287	185	55
Global Non-U.S.	4,065	3,040	34	7,896	5,978	32
United States ⁽³⁾	5,663	5,133	10	11,686	10,167	15
Total	\$9,728	\$8,173	19%	\$19,582	\$16,145	21%

(1) The 2006 second quarter results include net revenues earned by MLIM of \$630 million, which include non-U.S. net revenues of \$348 million.

(2) The 2006 six-month results include net revenues earned by MLIM of \$1.2 billion, which include non-U.S. net revenues of \$636 million.

(3) Corporate revenues and adjustments are reflected in the U.S. region.

Non-U.S. net revenues for the second quarter 2007 increased to \$4.1 billion, up 34% from the 2006 second quarter. Non-U.S. net revenues represented 42% of our second quarter 2007 total net revenues, compared to 37% in the year-ago quarter, which included net revenues earned by MLIM. The second quarter 2007 growth of non-U.S. net revenues was mainly attributable to higher revenues in the Pacific Rim and EMEA regions. While we experienced growth of non-U.S. net revenues across all businesses in the second quarter of 2007, the most significant increases were from GMI. For GMI, non-U.S. net revenues represented 61% of total GMI net revenues in the second quarter of 2007, up from 52% in the year-ago quarter. For GWM, non-U.S. net revenues represented 11% of total GWM net revenues for both the 2007 and 2006 second quarter results.

Net revenues in EMEA were \$2.1 billion in the second quarter of 2007, an increase of 25% from the year-ago quarter. These results were spread across multiple products and businesses mainly within

Table of Contents

GMI. In Global Markets, we had strong growth in our FICC business, mainly reflecting higher revenues from interest rate and credit products as well as commodities. Equity Markets' strong results reflected increases from equity-linked products and higher revenues from our financing and services business, which offset lower revenues from our private equity investments. Investment Banking primarily benefited from higher revenues from our strategic advisory services.

Net revenues in the Pacific Rim were \$1.5 billion in the second quarter of 2007, an increase of 48% from the year-ago quarter. These results reflected increases across multiple businesses and products mainly within GMI. In Global Markets, the growth experienced in Equity Markets was driven by higher revenues from equity-linked products and cash equity trading activity, while FICC primarily benefited from higher revenues from interest rate and credit products. Investment Banking primarily benefited from higher equity origination revenues.

Net revenues in Latin America increased 38% in the second quarter of 2007, primarily reflecting strong results in both our GMI and GWM businesses.

Net revenues in Canada increased 22% in the second quarter of 2007, primarily due to strong results in GMI's Equity Markets and Investment Banking businesses.

For the first six months of 2007, non-U.S net revenues increased to \$7.9 billion, up 32% from the first six months of 2006. Non-U.S. net revenues represented 40% of total net revenues, compared to 37% for the first six months of 2006, which included net revenues earned by MLIM. While we experienced higher revenues across all regions and businesses, the increase was mainly attributable to EMEA and the Pacific Rim regions with the most significant increase attributable to GMI. For the first six months of 2007, non-US net revenues in GMI represented 57% of its total net revenues compared to 51% for the first six months of 2006.

CONSOLIDATED BALANCE SHEETS

Management continually monitors and evaluates the size and composition of the Consolidated Balance Sheet. The following table summarizes the June 29, 2007 and December 29, 2006 period-end, and first six months of 2007 and full-year 2006 average balance sheets:

(dollars in millions)

	June 29, 2007	2007 Six Month Average ⁽¹⁾	Dec. 29, 2006	2006 Full Year Average ⁽¹⁾
Assets

(1) Averages represent our daily balance sheet estimates, which may not fully reflect netting and other adjustments included in period-end balances. Balances for certain assets and liabilities are not revised on a daily basis.

[Table of Contents](#)

OFF BALANCE SHEET ARRANGEMENTS

As a part of our normal operations, we enter into various off balance sheet arrangements that may require future payments. The table below outlines the significant off balance sheet arrangements, as well as the future expirations as of June 29, 2007:

(dollars in millions)

	Expiration				
	Total	Less than 1 Year	1 - 3 Years	3+ - 5 Years	Over 5 Years
liquidity and default facilities with SPEs ⁽¹⁾	\$62,608	\$57,818	\$4,046	\$ 137	\$ 607
residual value guarantees ⁽²⁾	1,009	70	410	123	406
and by letters of credit and other guarantees ⁽³⁾	5,898	1,865	920	1,265	1,848

(1) Amounts relate primarily to liquidity facilities and credit default protection provided to municipal bond securitization SPEs and asset-backed commercial paper conduits that we sponsor.

(2) Includes residual value guarantees associated with the Hopewell campus and aircraft leases of \$322 million.

(3) Includes reimbursement agreements with the Mortgage 100SM program, guarantees related to principal-protected mutual funds, and certain indemnifications related to foreign tax planning strategies.

Refer to Note 12 to the Condensed Consolidated Financial Statements for additional information.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

Contractual Obligations

In the normal course of business, we enter into various contractual obligations that may require future cash payments. The accompanying table summarizes our contractual obligations by remaining maturity at June 29, 2007. Excluded from this table are obligations recorded on the Condensed Consolidated Balance Sheets that are: (i) generally short-term in nature, including securities financing transactions, trading liabilities, contractual agreements, commercial paper and other short-term borrowings and other payables; (ii) deposits; (iii) obligations that are related to our insurance subsidiaries, including liabilities of insurance subsidiaries, which are subject to significant variability; and (iv) separate accounts liabilities, which fund separate accounts assets.

(dollars in millions)

	Expiration				
	Total	Less than 1 Year	1 - 3 Years	3+ - 5 Years	Over 5 Years
long-term borrowings	\$226,016	\$45,127	\$74,405	\$44,045	\$62,439
repurchasing and other commitments	13,690	10,304	900	681	1,805
senior subordinated notes (related to trust preferred securities)	4,403	-	-	-	4,403
operating lease commitments	3,973	607	1,155	948	1,263

As disclosed in Note 14 of the Condensed Consolidated Financial Statements, Merrill Lynch has unrecognized tax benefits as of the date of adoption of FIN 48 of approximately \$1.5 billion. Of this

[Table of Contents](#)

total, approximately \$1.0 billion (net of federal benefit of state issues, competent authority and foreign tax credit offsets) represents the amount of unrecognized tax benefits that, if recognized, would favorably affect the effective tax rate in future periods. As indicated in Note 14, unrecognized tax benefits with respect to the U.S. Tax Court case and the Japanese assessment, while paid, have been included in the \$1.5 billion and the \$1.0 billion amounts above. Due to the uncertainty of the amounts to be ultimately paid as well as the timing of such payments, all FIN 48 liabilities which have not been paid have been excluded from the Contractual Obligations table.

Commitments

At June 29, 2007, our commitments had the following expirations:

(dollars in millions)

	Expiration				
	Total	Less than 1 Year	1 - 3 Years	3+ - 5 Years	Over 5 Years
Commitments to extend credit ⁽¹⁾	\$120,640	\$72,251	\$12,287	\$25,027	\$11,075
Commitments to enter into resale agreements	10,469	10,469	-	-	-

(1) See Note 7 and Note 12 to the Condensed Consolidated Financial Statements.

CAPITAL AND FUNDING

The primary objectives of our capital management and funding strategies are as follows:

- Maintain sufficient long-term capital to support the execution of our business strategies and to achieve our financial performance objectives;
- Ensure liquidity across market cycles and through periods of financial stress; and
- Comply with regulatory capital requirements.

Long-Term Capital

Our long-term capital sources include equity capital, long-term borrowings and certain deposits in bank subsidiaries that we consider to be long-term or stable in nature.

At June 29, 2007 and December 29, 2006 total long-term capital consisted of the following:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
Common equity	\$ 37,567	\$ 35,893
Preferred stock	4,624	3,145
Trust preferred securities ⁽¹⁾	3,976	3,323
Equity capital	46,167	42,361
Subordinated long-term debt obligations	10,466	6,429
Senior long-term debt obligations ⁽²⁾	155,267	120,122
Deposits ⁽³⁾	68,160	71,204
Total long-term capital	\$280,060	\$240,116

Table of Contents

- (1) Represents junior subordinated notes (related to trust preferred securities), net of related investments. The related investments are reported as investment securities and were \$427 million at June 29, 2007 and \$490 million at December 29, 2006.*
- (2) Excludes junior subordinated notes (related to trust preferred securities), the current portion of long-term borrowings and the long-term portion of other subsidiary financing that is non-recourse to or not guaranteed by ML & Co. Borrowings that mature in more than one year, but contain provisions whereby the holder has the option to redeem the obligations within one year, are reflected as the current portion of long-term borrowings and are not included in long-term capital.*
- (3) Includes \$56,600 million and \$11,560 million of deposits in U.S. and non-U.S. banking subsidiaries, respectively, at June 29, 2007, and \$59,341 million and \$11,863 million of deposits in U.S. and non-U.S. banking subsidiaries, respectively, at December 29, 2006 that we consider to be long-term based on our liquidity models.*

At June 29, 2007, our long-term capital sources of \$280.1 billion exceeded our estimated long-term capital requirements. See Liquidity Risk in the Risk Management Section for additional information.

Equity Capital

At June 29, 2007, equity capital, as defined by Merrill Lynch, was \$46.2 billion and comprised of \$37.6 billion of common equity, \$4.6 billion of preferred stock, and \$4.0 billion of trust preferred securities. We define equity capital more broadly than stockholders' equity under U.S. generally accepted accounting principles, as we include other capital instruments with equity-like characteristics such as trust preferred securities. We view trust preferred securities as equity capital because they are either perpetual or have maturities of at least 50 years at issuance. These trust preferred securities represent junior subordinated notes, net of related investments. Junior subordinated notes (related to trust preferred securities) are reported on the Condensed Consolidated Balance Sheets as liabilities for accounting purposes. The related investments are reported as investment securities on the Condensed Consolidated Balance Sheets.

We regularly assess the adequacy of our equity capital base relative to the estimated risks and needs of our businesses, the regulatory and legal capital requirements of our subsidiaries, standards required by the SEC's consolidated supervised entity ("CSE") rules and considerations of rating agencies. Merrill Lynch is in compliance with applicable CSE standards. Refer to Note 15 to the Condensed Consolidated Financial Statements for additional information on regulatory requirements. We also assess the impact of our capital structure on financial performance metrics.

We have developed economic capital models to determine the amount of equity capital we need to cover potential losses arising from market, credit and operational risks. We developed these statistical risk models in conjunction with our risk management practices, and they allow us to attribute an amount of equity to each of our businesses that reflects the risks of that business, both on- and off-balance sheet. We regularly review and periodically refine models and other tools used to estimate risks, as well as the assumptions used in those models and tools to provide a reasonable and conservative assessment of our risks across a stressed market cycle. We also assess the need for equity capital to support risks that may not be adequately measured through these risk models. When we deem prudent, we purchase protection against certain risks.

In addition, we consider how much equity capital we may need to support normal business growth and strategic initiatives. In the event that we generate common equity capital beyond our estimated needs, we seek to return that capital to shareholders through share repurchases and dividends, considering the impact on our financial performance metrics.

Table of Contents

Major components of the changes in our equity capital for the first six months of 2007 are as follows:
(dollars in millions)

Balance at December 29, 2006	\$42,361
Net earnings	4,297
Issuance of preferred stock, net of repurchases and re-issuances	1,479
Issuance of trust preferred securities, net of redemptions and related investments	653
Common and preferred stock dividends	(749)
Common stock repurchases	(3,800)
Net effect of employee stock transactions and other ⁽¹⁾	1,926
Balance at June 29, 2007	\$46,167

(1) Includes effect of accumulated other comprehensive loss and other items.

Our equity capital of \$46.2 billion at June 29, 2007 increased \$3.8 billion, or 9%, from December 29, 2006. Equity capital increased in the first six months of 2007 primarily through net earnings, the net issuance of preferred stock and trust preferred securities and the net effect of employee stock transactions. The equity capital increase was partially offset by common stock repurchases and dividends.

On May 2, 2007, Merrill Lynch Capital Trust II issued \$950 million of 6.45% trust preferred securities and invested the proceeds in junior subordinated notes issued by ML & Co.

On March 30, 2007, Merrill Lynch Preferred Capital Trust II redeemed all of the outstanding \$300 million of 8.00% trust preferred securities.

On March 20, 2007, we issued \$1.5 billion of floating rate, non-cumulative, perpetual preferred stock.

On January 18, 2007, the Board of Directors declared an additional 40% increase in the regular quarterly dividend to 35 cents per common share.

During the first six months of 2007, we repurchased 42.2 million common shares at an average repurchase price of \$90.05 per share. On April 30, 2007 the Board of Directors authorized the repurchase of an additional \$6 billion of Merrill Lynch's outstanding common shares. At June 29, 2007, we had completed the \$5 billion repurchase program authorized in October 2006 and had \$5.4 billion of authorized repurchase capacity remaining.

Balance Sheet Leverage

Assets-to-equity leverage ratios are commonly used to assess a company's capital adequacy. We believe that a leverage ratio adjusted to exclude certain assets considered to have low risk profiles and assets in customer accounts financed primarily by customer liabilities provides a more meaningful measure of balance sheet leverage in the securities industry than an unadjusted ratio. We calculate adjusted assets by reducing total assets by (1) securities financing transactions and securities received as collateral less trading liabilities net of contractual agreements and (2) segregated cash and securities and separate accounts assets.

As leverage ratios are not risk sensitive, we do not rely on them to measure capital adequacy. When we assess our capital adequacy, we consider more sophisticated measures that capture the risk profiles of the assets, the impact of hedging, off-balance sheet exposures, operational risk and other considerations.

Table of Contents

The following table provides calculations of our leverage ratios at June 29, 2007 and December 29, 2006:
(dollars in millions)

	June 29, 2007	Dec. 29, 2006
Total assets	\$1,076,324	\$841,299
Less:		
Receivables under resale agreements	261,266	178,368
Receivables under securities borrowed transactions	187,355	118,610
Securities received as collateral	48,048	24,929
And:		
Trading liabilities, at fair value, excluding contractual agreements	65,135	60,428
Net-total	644,790	579,820
Less:		
Regulated cash and securities balances	18,410	13,449
Separate account assets	12,605	12,314
Adjusted assets	613,775	554,057
Less:		
Goodwill and other intangible assets	3,644	2,457
Tangible adjusted assets	\$ 610,131	\$551,600
Stockholders' equity	\$ 42,191	\$ 39,038
And:		
Trust preferred securities ⁽¹⁾	3,976	3,323
Equity capital	\$ 46,167	\$ 42,361
Tangible equity capital ⁽²⁾	\$ 42,523	\$ 39,904
Leverage ratio ⁽³⁾	23.3x	19.9x
Adjusted leverage ratio ⁽⁴⁾	13.3x	13.1x
Tangible adjusted leverage ratio ⁽⁵⁾	14.3x	13.8x

(1) Represents junior subordinated notes (related to trust preferred securities), net of related investments. The related investments are reported as investment securities and were \$427 million and \$490 million at June 29, 2007 and December 29, 2006, respectively.

(2) Equity capital less goodwill and other intangible assets.

(3) Total assets divided by equity capital.

(4) Adjusted assets divided by equity capital.

(5) Tangible adjusted assets divided by tangible equity capital.

Funding

We fund our assets primarily with a mix of secured and unsecured liabilities through a globally coordinated funding strategy. We fund a portion of our trading assets with secured liabilities, including repurchase agreements, securities loaned and other short-term secured borrowings, which are less sensitive to our credit ratings due to the underlying collateral. A portion of our short-term borrowings are secured under a master note lending program. These notes are similar in nature to other collateralized financing sources such as securities sold under agreements to repurchase. Refer to Note 9 to the Condensed Consolidated Financial Statements for additional information regarding our borrowings.

Table of Contents

We use unsecured liabilities to fund certain trading assets, as well as other long-dated assets not funded with equity. Our unsecured liabilities consist of the following:

(dollars in millions)

	June 29, 2007	December 29, 2006
Commercial paper	\$ 9,679	\$ 6,357
Comissory Notes	3,450	-
Other unsecured short-term borrowings ⁽¹⁾	3,996	1,953
Current portion of long-term borrowings ⁽²⁾	43,611	37,720
Other unsecured short-term borrowings	60,736	46,030
Senior long-term borrowings ⁽³⁾	155,267	120,122
Subordinated long-term borrowings	10,466	6,429
Other unsecured long-term borrowings	165,733	126,551
Deposits	\$ 82,801	\$ 84,124

(1) Excludes \$2.9 billion and \$9.8 billion of secured short-term borrowings at June 29, 2007 and December 29, 2006, respectively; these short-term borrowings are represented under a master note lending program.

(2) Excludes \$1.5 billion and \$460 million of the current portion of other subsidiary financing that is non-recourse or not guaranteed by ML & Co. at June 29, 2007 and December 29, 2006, respectively.

(3) Excludes junior subordinated notes (related to trust preferred securities), current portion of long-term borrowings, and the long-term portion of other subsidiary financing that is non-recourse or not guaranteed by ML & Co.

Our primary funding objectives are maintaining sufficient funding sources to support our existing business activities and future growth while ensuring that we have liquidity across market cycles and through periods of financial stress. To achieve our objectives, we have established a set of funding strategies that are described below:

- Diversify funding sources;
- Maintain sufficient long-term borrowings;
- Concentrate unsecured funding at ML & Co.;
- Use deposits as a source of funding; and
- Adhere to prudent governance principles.

Diversification of Funding Sources

We strive to diversify and expand our funding globally across programs, markets, currencies and investor bases. We issue debt through syndicated U.S. registered offerings, U.S. registered and unregistered medium-term note programs, non-U.S. medium-term note programs, non-U.S. private placements, U.S. and non-U.S. commercial paper and through other methods. We distribute a significant portion of our debt offerings through our retail and institutional sales forces to a large, diversified global investor base. Maintaining relationships with our investors is an important aspect of our funding strategy. We also make markets in our debt instruments to provide liquidity for investors.

Table of Contents

At June 29, 2007 our total short- and long-term borrowings were issued in the following currencies:

(USD equivalent in millions)

SD	\$137,432	55%
JR	62,825	26
Y	15,300	6
BP	11,695	5
JD	5,520	2
AD	5,078	2
IF	1,859	1
R	1,515	1
her ⁽¹⁾	4,856	2
total	\$246,080	100%

Note: excludes junior subordinated notes (related to trust preferred securities).

(1) Includes various other foreign currencies, none of which individually exceed 1% of total issuances.

We also diversify our funding sources by issuing various types of debt instruments, including structured notes and extendible notes. Structured notes are debt obligations with returns that are linked to other debt or equity securities, indices, currencies or commodities. We typically hedge these notes with positions in derivatives and/or in the underlying instruments. We could be required to immediately settle certain structured note obligations for cash or other securities under certain circumstances, which we take into account for liquidity planning purposes. Structured notes outstanding were \$46.7 billion and \$33.8 billion at June 29, 2007 and December 29, 2006, respectively.

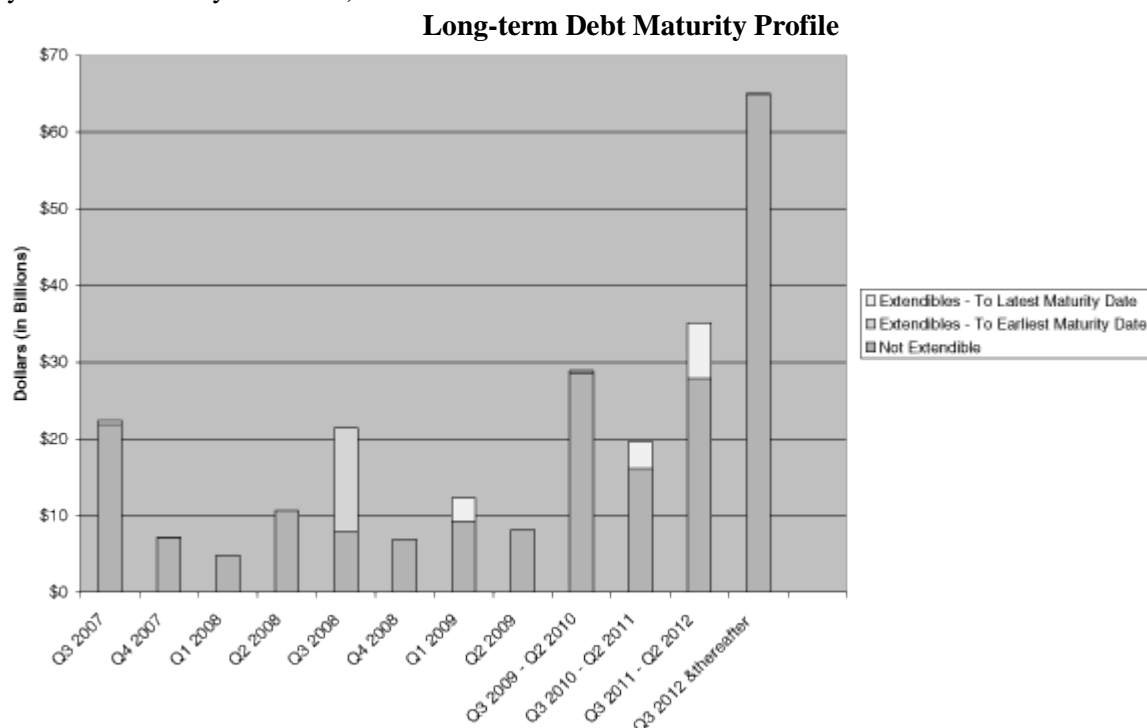

Extendible notes are debt obligations that have an extendible maturity. The initial maturity of the majority of our extendible notes is thirteen months. These notes automatically extend before they become current, unless the holders exercise their option to redeem the notes. Extendible notes are included in long-term borrowings while the remaining maturity is greater than one year. Based on current market conditions, we expect that these notes will automatically extend. Total extendible notes outstanding were \$14.2 billion and \$10.6 billion at June 29, 2007 and December 29, 2006, respectively.

Maintenance of Sufficient Long-Term Borrowings

An important objective of our asset-liability management is maintaining sufficient long-term borrowings to meet our long-term capital requirements. As such, we routinely issue debt in a variety of maturities and currencies to achieve cost efficient funding and an appropriate maturity profile. While the cost and availability of unsecured funding may be negatively impacted by general market conditions or by matters specific to the financial services industry or Merrill Lynch, we seek to mitigate this refinancing risk by actively managing the amount of our borrowings that we anticipate will mature within any one month or quarter.

[Table of Contents](#)

At June 29, 2007, the weighted average maturity of our long-term borrowings exceeded five years. The following chart presents our long-term borrowings maturity profile as of June 29, 2007 (quarterly for two years and annually thereafter):

Major components of the change in long-term borrowings, excluding junior subordinated debt (related to trust preferred securities), during the first six months of 2007 are as follows:

(dollars in billions)

Balance at December 29, 2006	\$181.4
Issuance and resale	74.6
Amortization and repurchase	(29.6)
Other ⁽¹⁾	(0.4)
Balance at June 29, 2007 ⁽²⁾	\$226.0

(1) Relates to foreign exchange and other movements.

(2) See Note 9 to the Condensed Consolidated Financial Statements for the long-term borrowings maturity schedule.

Subordinated debt is an important part of our long-term borrowings. During the first six months of 2007, ML & Co. issued \$4.0 billion of subordinated debt in four currencies and with maturities ranging from 2017 to 2037. This subordinated debt was issued to satisfy certain anticipated CSE capital requirements. All of ML & Co.'s subordinated debt is junior in right of payment to ML & Co.'s senior indebtedness. At June 29, 2007, senior and subordinated debt issued by ML & Co. or by subsidiaries and guaranteed by ML & Co., including short-term borrowings, totaled \$229.4 billion. Except for the \$2.2 billion of zero-coupon contingent convertible debt (Liquid Yield Option Notes or "LYONs[®]") that were

[Table of Contents](#)

outstanding at June 29, 2007, senior and subordinated debt obligations issued by ML & Co. and senior debt issued by subsidiaries and guaranteed by ML & Co. do not contain provisions that could, upon an adverse change in ML & Co.'s credit rating, financial ratios, earnings, cash flows, or stock price, trigger a requirement for an early repayment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation. See Note 9 to the Condensed Consolidated Financial Statements for additional information.

We use derivative transactions to more closely match the duration of borrowings to the duration of the assets being funded, thereby enabling interest rate risk to be within limits set by our Market Risk Management Group. Interest rate swaps also serve to convert our interest expense and effective borrowing rate principally to floating rate. We also enter into currency swaps to hedge assets that are not financed through debt issuance in the same currency. We hedge investments in subsidiaries in non-U.S. dollar currencies in whole or in part to mitigate foreign exchange translation adjustments in accumulated other comprehensive loss. See Notes 1 and 6 to the 2006 Annual Report for further information.

Concentration of Unsecured Funding at ML & Co.

ML & Co. is the primary issuer of all unsecured, non-deposit financing instruments that we use predominantly to fund assets in subsidiaries, some of which are regulated. The primary benefits of this strategy are greater control, reduced funding costs, wider name recognition by investors, and greater flexibility to meet variable funding requirements of subsidiaries. Where regulations, time zone differences, or other business considerations make this impractical, certain subsidiaries enter into their own financing arrangements.

Deposit Funding

At June 29, 2007, our bank subsidiaries had \$82.8 billion in customer deposits, which provide a diversified and stable base for funding assets within those entities. Our U.S. deposit base of \$59.3 billion includes an estimated \$47.8 billion of FDIC-insured deposits, which we believe are less sensitive to our credit ratings. We predominantly source deposit funding from our customer base in the form of our bank sweep programs and time deposits.

Deposits are not available as a source of funding to ML & Co. See Liquidity Risk in the Risk Management section for more information regarding our deposit liabilities.

Prudent Governance

We manage the growth and composition of our assets and set limits on the overall level of unsecured funding. Funding activities are subject to regular senior management review and control through Asset/Liability Committee meetings with treasury management and other independent risk and control groups. Our funding strategy and practices are reviewed by the Risk Oversight Committee ("ROC"), Merrill Lynch's executive management and the Finance Committee of the Board of Directors.

Credit Ratings

Our credit ratings affect the cost and availability of our unsecured funding, and it is our objective to maintain high quality credit ratings. In addition, credit ratings are important when we compete in certain markets and when we seek to engage in certain long-term transactions, including OTC

Table of Contents

derivatives. Factors that influence our credit ratings include the credit rating agencies' assessment of the general operating environment, our relative positions in the markets in which we compete, our reputation, level and volatility of our earnings, our corporate governance and risk management policies, and our capital management practices.

The following table sets forth ML & Co.'s unsecured credit ratings as of July 27, 2007. Rating agencies express outlooks from time to time on these credit ratings, and each of these agencies describes its current outlook as stable.

Rating Agency	Senior Debt Ratings	Subordinated Debt Ratings	Preferred Stock Ratings	Commercial Paper Ratings
Minion Bond Rating Service Ltd.	AA (low)	A (high)	A	R-1 (middle)
S&P's Ratings	AA-	A+	A+	F1+
Moody's Investors Service, Inc.	Aa3	A1	A2	P-1
Rating & Investment Information, Inc. (Japan)	AA	AA-	A+	a-1+
Standard & Poor's Ratings Services	AA-	A+	A	A-1+

In connection with certain OTC derivatives transactions and other trading agreements, we could be required to provide additional collateral to certain counterparties in the event of a downgrade of the senior debt ratings of ML & Co. At June 29, 2007, the amount of additional collateral that would be required for such derivatives transactions and trading agreements was approximately \$610 million in the event of a one-notch downgrade and approximately \$829 million in the event of a two-notch downgrade of ML & Co.'s long term senior debt credit rating. We consider additional collateral on derivative contracts that may be required in the event of changes in ML & Co.'s ratings as part of our liquidity management practices.

Cash Flows

Cash and cash equivalents of \$38.8 billion at June 29, 2007 increased by \$6.6 billion from December 29, 2006. Cash flows from financing activities provided \$57.5 billion during the first six months of 2007, primarily due to issuances and resales of long-term borrowings, net of settlements and repurchases, of \$45.5 billion and cash from derivative financing transactions of \$12.8 billion. Cash flows used for investing activities during the first six months of 2007 were \$4.8 billion and were primarily due to acquisitions and other investments and net cash used for available-for-sale securities, partially offset by proceeds from loans, notes and mortgages held for investment. Cash flows used for operating activities during the first six months of 2007 were \$46.1 billion and were primarily due to net cash used for resale agreements and securities borrowed transactions, partially offset by cash provided by repurchase agreements and securities loaned transactions.

RISK MANAGEMENT

Risk-taking is integral to the core businesses in which we operate. In the course of conducting our business operations, we are exposed to a variety of risks including market, credit, liquidity, operational and other risks that are material and require comprehensive controls and ongoing oversight. Senior managers of our core businesses are responsible and accountable for management of the risks associated with their business activities. In addition, independent risk groups manage market risk, credit risk, liquidity risk and operational risk. These independent risk groups fall under the management responsibility of our Chief Financial Officer. Along with other independent control groups, including Corporate Audit, Finance and the Office of General Counsel, these disciplines work

[Table of Contents](#)

to ensure risks are properly identified, measured, monitored, and managed throughout Merrill Lynch. For a full discussion of our risk management framework, see our 2006 Annual Report.

Market Risk

We define market risk as the potential change in value of financial instruments caused by fluctuations in interest rates, exchange rates, equity and commodity prices, credit spread, and/or other risks. We have a Market Risk Framework that defines and communicates our market risk tolerance and broad overall limits across Merrill Lynch by defining and constraining exposure to specific asset classes, market risk factors and value at risk, or VaR. VaR is a statistical measure of the potential loss in the fair value of a portfolio due to adverse movements in underlying risk factors.

Our Market Risk Management Group and other independent risk and control groups are responsible for approving the products and markets in which our business units and functions will transact and take risk. Moreover, this group is responsible for identifying the risks to which these business units will be exposed in these approved products and markets. Market Risk Management uses a variety of quantitative methods to assess the risk of our positions and portfolios. In particular, Market Risk Management quantifies the sensitivities of our current portfolios to changes in market variables. These sensitivities are then utilized in the context of historical data to estimate earnings and loss distributions that our current portfolios would have incurred throughout the historical period. From these distributions, Market Risk Management derives a number of useful risk statistics, including VaR.

The VaR disclosed in the accompanying table is an estimate of the amount that our current trading portfolios could lose with a specified degree of confidence, over a given time interval. The aggregate VaR for our trading portfolios is less than the sum of the VaRs for individual risk categories because movements in different risk categories occur at different times and, historically, extreme movements have not occurred in all risk categories simultaneously. The difference between the sum of the VaRs for individual risk categories and the VaR calculated for all risk categories is shown in the following table and may be viewed as a measure of the diversification within our portfolios. We believe that the tabulated risk measures provide broad guidance as to the amount we could lose in future periods, and we work continually to improve our measurement and the methodology of our VaR. However, the calculation of VaR requires numerous assumptions and thus VaR should not be viewed as a precise measure of risk. In addition, VaR is not intended to capture worst case scenario losses.

To calculate VaR, we aggregate sensitivities to market risk factors and combine them with a database of historical market factor movements to simulate a series of profits and losses. The level of loss that is exceeded in that series 5% of the time is used as the estimate for the 95% confidence level VaR. The overall VaR amounts are presented across major risk categories, which include exposure to volatility risk found in certain products, such as options. Over the past year, our overall risk profile has become more diverse across the major risk categories.

The table that follows presents our average and ending VaR for trading instruments for the first and second quarters of 2007 and the full-year 2006. Additionally, high and low VaR for the second quarter of 2007 is presented independently for each risk category and overall. Because high and low VaR numbers for these risk categories may have occurred on different days, high and low numbers for diversification benefit would not be meaningful.

(2) Subtotals are not provided for highs and lows as they are not meaningful.

On June 29, 2007, trading VaR was higher than on March 30, 2007 due primarily to increased equity exposures. This increase was offset by reduced interest rate and credit spread exposures. The average trading VaR was higher in the second quarter than in the first quarter due primarily to higher equity exposures and higher interest and credit spread exposures earlier in the period. If market conditions are favorable, we may increase our risk-taking in a number of our businesses, including our proprietary trading activities. These activities provide revenue opportunities while also increasing the loss potential under certain market conditions. We monitor these risk levels on a daily basis to verify they remain within corporate risk guidelines and tolerance levels.

To complement VaR and in recognition of its inherent limitations, we use a number of additional risk measurement methods and tools as part of our overall market risk management process. These include stress testing and event risk analysis, which examine portfolio behavior under significant adverse market conditions, including scenarios that would result in material losses for Merrill Lynch.

Non-Trading Market Risk

Non-trading market risk includes the risks associated with certain non-trading activities, including investment securities, securities financing transactions and equity and certain principal investments. Also included are the risks related to funding activities. Risks related to lending activities are covered in the Credit Risk section that follows.

The primary market risk of non-trading investment securities and non-trading repurchase and reverse repurchase agreements is expressed as sensitivity to changes in the general level of credit spreads, which are defined as the differences in the yields on debt instruments from relevant LIBOR/Swap rates. Non-trading investment securities include securities that are classified as available-for-sale and held-to-maturity as well as investments of insurance subsidiaries. At the end of the second quarter of 2007, the total credit spread sensitivity of these instruments is a pre-tax loss of \$26 million in fair market value for an increase of one basis point, which is one one-hundredth of a percent, in credit spreads, compared to a pre-tax loss of \$22 million at the end of the first quarter of 2007. This change in fair market value is a measurement of economic risk which may differ significantly in magnitude and timing from the actual profit or loss that would be realized under generally accepted accounting principles.

The interest rate risk associated with the non-trading positions, together with funding activities, is expressed as sensitivity to changes in the general level of interest rates. Our funding activities include LYONs®, trust preferred securities and other long-term debt issuances together with interest rate

[Table of Contents](#)

hedges. At the end of the second quarter of 2007, the net interest rate sensitivity of these positions is a pre-tax loss in fair market value of \$0.3 million for a parallel one basis point increase in interest rates across all yield curves, compared to \$1 million at the end of the first quarter of 2007. This change in fair market value is a measurement of economic risk which may differ significantly in magnitude and timing from the actual profit or loss that would be realized under generally accepted accounting principles.

Other non-trading equity investments include direct private equity interests, private equity fund investments, hedge fund interests, certain direct and indirect real estate investments and other principal investments. These investments are broadly sensitive to general price levels in the equity or commercial real estate markets as well as to specific business, financial and credit factors which influence the performance and valuation of each investment uniquely. Refer to Note 5 of the 2006 Annual Report for additional information on these investments.

Credit Risk

We define credit risk as the potential for loss that can occur as a result of an individual, counterparty or issuer being unable or unwilling to honor its contractual obligations to us. The Credit Risk Framework is the primary tool that we use to communicate firm-wide credit limits and monitor exposure by constraining the magnitude and tenor of exposure to counterparty and issuer families. Additionally, we have country risk limits that constrain total aggregate exposure across all counterparties and issuers (including sovereign entities) for a given country within predefined tolerance levels.

We have a Global Credit and Commitments Group that assesses the creditworthiness of existing and potential individual clients, institutional counterparties and issuers, and determines firm-wide credit risk levels within the Credit Risk Framework among other tools. This group reviews and monitors specific transactions as well as portfolio and other credit risk concentrations both within and across businesses. This group is also responsible for ongoing monitoring of credit quality and limit compliance and actively works with all of our business units to manage and mitigate credit risk.

Commercial Lending

Our commercial lending activities consist primarily of corporate and institutional lending, asset-based finance, commercial finance, and commercial real estate related activities. In evaluating certain potential commercial lending transactions, we use a risk-adjusted return-on-capital model in addition to other methodologies.

The following tables present a distribution of commercial loans and closed commitments by credit quality, industry and country as of June 29, 2007, gross of allowances for loan losses and reserves, without considering the impact of purchased credit protection. Closed commitments represent the unfunded portion of existing commitments available for draw down and do not include contingent commitments extended but not yet closed. These tables do not include our large, diversified portfolio of loans and commitments to small- and middle-market businesses, totaling approximately \$3.0 billion in loans and \$2.1 billion in closed commitments as of June 29, 2007. The majority of these

Table of Contents

counterparties carry non-investment grade ratings and are predominantly domiciled in the United States.
(dollars in millions)

By Credit Quality ⁽¹⁾	Loans		Closed Commitments	
	Secured	Unsecured	Secured	Unsecured
A or above	\$ 5,342	\$ 11	\$ 3,419	\$ 3,989

By Country	Loans		Closed Commitments	
	Secured	Unsecured	Secured	Unsecured
United States	56%	51%	62%	73%
United Kingdom	12	1	14	7
Germany	7	18	12	7
Japan	10	6	-	2
France	4	2	3	1
Other	11	22	9	10
total	100%	100%	100%	100%

As of June 29, 2007, our largest commercial lending industry concentration was to financial institutions. Commercial borrowers were predominantly domiciled in the United States or had principal operations tied to the United States or its economy. The majority of all outstanding commercial loan balances had a remaining maturity of less than three years. Additional detail on our commercial lending related activities can be found in Note 7 to the Condensed Consolidated Financial Statements.

Residential Mortgage Lending

We originate and purchase residential mortgage loans, certain of which include features that may result in additional credit risk when compared to more traditional types of mortgages. The potential additional credit risk arising from these mortgages is addressed through adherence to underwriting guidelines. Credit risk is closely monitored in order to ensure that reserves are sufficient and valuations are appropriate. For additional information on residential mortgage lending, see the 2006 Annual Report.

Table of Contents

Derivatives

We enter into International Swaps and Derivatives Association, Inc. master agreements or their equivalent (“master netting agreements”) with substantially all of our derivative counterparties as soon as possible. Master netting agreements provide protection in bankruptcy in certain circumstances and, in some cases, enable receivables and payables with the same counterparty to be offset for risk management purposes. Agreements are negotiated bilaterally and can require complex terms. While we make every effort to execute such agreements, it is possible that a counterparty may be unwilling to sign such an agreement and, as a result, would subject us to additional credit risk. The enforceability of master netting agreements under bankruptcy laws in certain countries or in certain industries is not free from doubt, and receivables and payables with counterparties in these countries or industries are accordingly recorded on a gross basis.

In addition, to reduce the risk of loss, we require collateral, principally cash and U.S. Government and agency securities, on certain derivative transactions. From an economic standpoint, we evaluate risk exposures net of related collateral that meets specified standards.

The following is a summary of counterparty credit ratings for the replacement cost (net of \$12.8 billion of collateral, of which \$8.0 billion represented cash collateral) of OTC trading derivatives in a gain position by maturity at June 29, 2007.

(dollars in millions)

By Credit Quality ⁽¹⁾	Years to Maturity				Cross-Maturity Netting ⁽²⁾	Total
	0 to 3	3+ to 5	5+ to 7	Over 7		
A or above	\$ 5,677	\$1,324	\$1,724	\$ 7,772	\$(2,277)	\$14,220
	6,315	1,755	891	3,202	(2,681)	9,482
3B	2,197	473	289	1,389	(291)	4,057
3	592	445	254	255	(96)	1,450
her	4,065	532	257	898	(92)	5,660
ital	\$18,846	\$4,529	\$3,415	\$13,516	\$(5,437)	\$34,869

(1) Represents credit rating agency equivalent of internal credit ratings.

(2) Represents netting of payable balances with receivable balances for the same counterparty across maturity band categories. Receivable and payable balances with the same counterparty in the same maturity category, however, are net within the maturity category.

In addition to obtaining collateral, we attempt to mitigate our default risk on derivatives whenever possible by entering into transactions with provisions that enable us to terminate or reset the terms of our derivative contracts.

Liquidity Risk

We define liquidity risk as the potential inability to meet financial obligations, on- or off-balance sheet, as they come due. Liquidity risk relates to the ability of a company to repay short-term borrowings with new borrowings or with assets that can be quickly converted into cash while meeting other obligations and continuing to operate as a going concern. This is particularly important for financial services firms. Liquidity risk also includes both the potential inability to raise funding with appropriate maturity, currency and interest rate characteristics and the inability to liquidate assets in a timely manner at a reasonable price. We actively manage the liquidity risks in our business that can arise from asset-liability mismatches, credit sensitive funding, commitments or contingencies.

Table of Contents

The Liquidity Risk Management Group is responsible for measuring, monitoring and controlling our liquidity risks. This group establishes methodologies and specifications for measuring liquidity risks, performs scenario analysis and liquidity stress testing, and sets and monitors liquidity limits. The group works with our business units to limit liquidity risk exposures and reviews liquidity risks associated with new products and new business strategies. The Liquidity Risk Management Group also reviews liquidity risk with other independent risk and control groups and Treasury Management in Asset/Liability Committee meetings.

Our primary liquidity objectives are to ensure liquidity through market cycles and periods of financial stress and to ensure that all funding requirements and unsecured debt obligations that mature within one year can be met without issuing new unsecured debt or requiring liquidation of business assets. In managing liquidity, we place significant emphasis on monitoring the near term cash flow profiles and exposures through extensive scenario analysis and stress testing. To achieve our objectives, we have established a set of liquidity management practices that are outlined below:

- Maintain excess liquidity in the form of unencumbered liquid assets and committed credit facilities;
- Match asset and liability profiles appropriately;
- Perform scenario analysis and stress testing; and
- Maintain a well formulated and documented contingency funding plan, including access to lenders of last resort.

Excess Liquidity and Unencumbered Assets

Consistent with our objectives, we maintain excess liquidity at ML & Co. and selected subsidiaries in the form of cash and high quality unencumbered liquid assets, which represent our “Global Liquidity Sources” and serve as our primary source of liquidity risk protection. We maintain these sources of liquidity at levels we believe are sufficient to sustain Merrill Lynch in the event of stressed liquidity conditions. In assessing liquidity, we monitor the extent to which the unencumbered assets are available as a source of funds, taking into consideration any regulatory or other restrictions that may limit the availability of unencumbered assets of subsidiaries to ML & Co. or other subsidiaries.

As of June 29, 2007 and December 29, 2006, the aggregate Global Liquidity Sources were \$216 billion and \$178 billion, respectively, consisting of the following:

(dollars in billions)

	June 29, 2007	Dec. 29, 2006
Excess liquidity pool	\$ 81	\$ 63
Unencumbered assets at regulated bank subsidiaries	58	57
Unencumbered assets at regulated non-bank subsidiaries	<u>77</u>	<u>58</u>
Global Liquidity Sources	\$216	\$178

The excess liquidity pool is maintained at, or readily available to, ML & Co. and can be deployed to meet cash outflow obligations under stressed liquidity conditions. The excess liquidity pool includes cash and cash equivalents, investments in short-term money market mutual funds, U.S. government and agency obligations and other liquid securities. In the first quarter of 2007, we changed our investment strategy and eliminated our exposure to long-term fixed rate assets. At June 29, 2007 and December 29, 2006, the total carrying value of the excess liquidity pool, net of related hedges, was \$81 billion and \$63 billion, respectively, which included liquidity sources at subsidiaries that we believe are available to ML & Co. without restrictions. We regularly test our ability to access components of our excess liquidity pool. We fund our excess liquidity pool with debt that has an appropriate term maturity

Table of Contents

structure. Additionally, our policy is to fund at least \$15 billion of our excess liquidity pool with debt that has a remaining maturity of at least one year. At June 29, 2007, the amount of our excess liquidity pool funded with debt with a remaining maturity of at least one year exceeded this requirement.

We manage the size of our excess liquidity pool by taking into account the potential impact of unsecured debt maturities, normal business volatility, cash and collateral outflows under various stressed scenarios, and stressed draws for unfunded commitments and contractual obligations. At June 29, 2007, our excess liquidity pool and other liquidity sources including maturing short-term assets and committed credit facilities, significantly exceeded short-term obligations and other contractual and contingent cash outflows based on our estimates.

At June 29, 2007 and December 29, 2006, unencumbered liquid assets of \$58 billion and \$57 billion, respectively, in the form of unencumbered high investment grade asset-backed securities and prime residential mortgages were available at our regulated bank subsidiaries to meet potential deposit obligations, business activity demands and stressed liquidity needs of the bank subsidiaries. Our liquidity model conservatively assumes that these unencumbered assets are restricted from transfer and unavailable as a liquidity source to ML & Co. and other non-bank subsidiaries.

At June 29, 2007 and December 29, 2006, our regulated non-bank subsidiaries, including broker-dealer subsidiaries, maintained \$77 billion and \$58 billion, respectively, of unencumbered securities, including \$12 billion of customer margin securities at both June 29, 2007 and December 29, 2006. These unencumbered securities are an important source of liquidity for broker-dealer activities and other individual subsidiary financial commitments, and are generally restricted from transfer and therefore unavailable to support liquidity needs of ML & Co. or other subsidiaries. Proceeds from encumbering customer margin securities are further limited to supporting qualifying customer activities.

Committed Credit Facilities

In addition to the Global Liquidity Sources, we maintain credit facilities that are available to cover regular and contingent funding needs. We maintain a committed, three-year multi-currency, unsecured bank credit facility that totaled \$4.0 billion as of June 29, 2007 and which expires in April 2010. This facility permits borrowings by ML & Co. and replaced a previous 364-day \$4.5 billion facility that was in place December 29, 2006 which would have matured in June 2007. We borrow regularly from this facility as an additional funding source to conduct normal business activities. At June 29, 2007 and December 29, 2006, we had \$1.0 billion and no borrowings outstanding, respectively, under this facility.

We also maintain two committed, secured credit facilities which totaled \$7.0 billion at June 29, 2007 and \$7.5 billion at December 29, 2006. One of these facilities is multi-currency and includes a tranche of up to approximately \$1.2 billion that is available on an unsecured basis, at our option. These facilities expire in May 2008 and December 2007. Both facilities include a one-year term-out feature that allows ML & Co., at its option, to extend borrowings under the facilities for an additional year beyond their respective expiration dates. The secured facilities permit borrowings by ML & Co. and select subsidiaries, secured by a broad range of collateral. At June 29, 2007 and December 29, 2006, we had no borrowings outstanding under either facility.

In addition, we maintain committed, secured credit facilities with two financial institutions that totaled \$11.75 billion at June 29, 2007 and December 29, 2006. The secured facilities may be collateralized by government obligations eligible for pledging. The facilities expire at various dates through 2014, but may be terminated earlier with at least a nine-month notice by either party. At June 29, 2007 and December 29, 2006, we had no borrowings outstanding under these facilities.

[Table of Contents](#)

Asset-Liability Management

We manage the profiles of our assets and liabilities and the relationships between them with the objective of ensuring that we maintain sufficient liquidity to meet our funding obligations in all environments, including periods of financial stress. This asset-liability management involves maintaining the appropriate amount and mix of financing related to the underlying asset profiles and liquidity characteristics, while monitoring the relationship between cash flow sources and uses. Our asset-liability management takes into account restrictions at the subsidiary level with coordinated and centralized oversight at ML & Co. We consider a legal entity focus essential in view of the regulatory, tax and other considerations that can affect the transfer and availability of liquidity between legal entities. We assess the availability of cash flows to fund maturing liability obligations when due under stressed market liquidity conditions in time frames from overnight through one year, with an emphasis on the near term periods during which liquidity risk is considered to be the greatest.

An important objective of our asset-liability management is ensuring that sufficient funding is available for our long-term assets and other long-term capital requirements. Long-term capital requirements are determined using a long-term capital model that takes into account:

- The portion of assets that cannot be self-funded in the secured financing markets, considering stressed market conditions, including illiquid and less liquid assets;
- Subsidiaries' regulatory capital;
- Collateral on derivative contracts that may be required in the event of changes in our credit ratings or movements in the underlying instruments;
- Portions of commitments to extend credit based on our estimate of the probability of draws on these commitments; and
- Other contingencies based on our estimates.

In assessing the appropriateness of our long-term capital, we seek to: (1) ensure sufficient matching of our assets based on factors such as holding period, contractual maturity and regulatory restrictions and (2) limit the amount of liabilities maturing in any particular period. We also consider liquidity needs for business growth and circumstances that might cause contingent liquidity obligations. Our policy is to operate with an excess of long-term capital sources of at least \$15 billion over our long-term capital requirements. At June 29, 2007, our long-term capital sources of \$280 billion exceeded our estimated long-term capital requirements by more than \$15 billion.

Our regulated bank subsidiaries maintain strong liquidity positions and manage the liquidity profile of their assets, liabilities and commitments so that they can appropriately balance cash flows and meet all of their deposit and other funding obligations when due. This asset-liability management includes: projecting cash flows, monitoring balance sheet liquidity ratios against internal and regulatory requirements, monitoring depositor concentrations, and maintaining liquidity and contingency plans. In managing liquidity, our bank subsidiaries place emphasis on a stable and diversified retail deposit base, which serves as a reliable source of liquidity. The banks' liquidity models use behavioral and statistical approaches to measure and monitor the liquidity characteristics of the deposits.

Our asset-liability management process also focuses on maintaining diversification and an appropriate mix of borrowings through application and monitoring of internal concentration limits and guidelines on various factors, including debt instrument types, maturities, currencies, and single investors.

Scenario Analysis and Stress Testing

Scenario analysis and stress testing is an important part of our liquidity management process. Our Liquidity Risk Management Group performs regular scenario-based stress tests covering credit rating downgrades and stressed market conditions both market-wide and in specific market segments. We run

Table of Contents

scenarios covering crisis durations ranging from as short as one week through as long as one year. Some scenarios assume that normal business is not interrupted.

In our scenario analysis, we assume loss of access to unsecured funding markets during periods of financial stress. Various levels of severity are assessed through sensitivity analysis around key liquidity risk drivers and assumptions. Key assumptions that are stressed include diminished access to the secured financing markets, run-off in deposits, draws on liquidity facilities, cash outflows due to the loss of funding from asset-backed commercial paper conduits and derivative collateral outflows. We assess the liquidity sources that can be accessed during the crisis and the residual positions.

Management judgment is applied in scenario modeling. The Liquidity Risk Management Group works with our Credit and Market Risk Management groups to incorporate the results of their judgment and analytics where credit or market risk implications exist. We assess the cash flow exposures under the various scenarios and use the results to refine liquidity assumptions, size our excess liquidity pools and/or adjust the asset-liability profiles.

Contingency Funding Plan

We maintain a contingency funding plan that outlines our responses to liquidity stress events of various levels of severity. The plan includes the funding action steps, potential funding strategies and a range of communication procedures that we will implement in the event of stressed liquidity conditions. We periodically review and test the contingency funding plan to achieve ongoing validity and readiness.

Our U.S. bank subsidiaries also retain access to contingency funding through the Federal Reserve discount window and Federal Home Loan Banks, while certain non-U.S. subsidiaries have access to the central banks for the jurisdictions in which they operate. While we do not rely on these sources in our liquidity modeling, we maintain the policies, procedures and governance processes that would enable us to access these sources.

Operational Risk

We define operational risk as the risk of loss resulting from the failure of people, internal processes and systems or from external events. The primary responsibility for managing operational risk on a day-to-day basis lies with our businesses and support groups. The Operational Risk Management Group provides the framework within which these groups manage operational risk. These groups manage operational risk in a number of ways, including the use of technology to automate processes; the establishment of policies and key controls; the provision and testing of business continuity plans; and the training, supervision, and development of staff.

Other Risks

We encounter a variety of other risks, which could have the ability to impact the viability, profitability, and cost-effectiveness of present or future transactions. Such risks include political, tax, and regulatory risks that may arise due to changes in local laws, regulations, accounting standards, or tax statutes. To assist in the mitigation of such risks, we rigorously review new and pending legislation and regulations. Additionally, we employ professionals in jurisdictions in which we operate to actively follow issues of potential concern or impact to Merrill Lynch and to participate in related interest groups.

[Table of Contents](#)

NON-INVESTMENT GRADE HOLDINGS AND HIGHLY LEVERAGED TRANSACTIONS

Non-investment grade holdings and highly leveraged transactions involve risks related to the creditworthiness of the issuers or counterparties and the liquidity of the market for such investments. We recognize these risks and, whenever possible, employ strategies to mitigate exposures. The specific components and overall level of non-investment grade and highly leveraged positions may vary significantly from period to period as a result of inventory turnover, investment sales, and asset redeployment.

In the normal course of business, we underwrite, trade, and hold non-investment grade cash instruments in connection with our investment banking, market-making, and derivative structuring activities. Non-investment grade holdings are defined as debt and preferred equity securities rated lower than BBB or equivalent ratings by recognized credit rating agencies, sovereign debt in emerging markets, amounts due under derivative contracts from non-investment grade counterparties, and other instruments that, in the opinion of management, are non-investment grade.

In addition to the amounts included in the following table, derivatives may also expose us to credit risk related to the underlying security where a derivative contract can either replicate ownership of the underlying security (e.g., long total return swaps) or potentially force ownership of the underlying security (e.g., short put options). Derivatives may also subject us to credit spread or issuer default risk, in that changes in credit spreads or in the credit quality of the underlying securities may adversely affect the derivatives' fair values. We seek to manage these risks by engaging in various hedging strategies to reduce our exposure associated with non-investment grade positions, such as purchasing an option to sell the related security or entering into other offsetting derivative contracts.

We provide financing and advisory services to, and invest in, companies entering into leveraged transactions, which may include leveraged buyouts, recapitalizations, and mergers and acquisitions. On a selected basis, we provide extensions of credit to leveraged companies, in the form of senior and subordinated debt, as well as bridge financing. In addition, we syndicate loans for non-investment grade companies or in connection with highly leveraged transactions and may retain a portion of these loans.

We hold direct equity investments in leveraged companies and interests in partnerships that invest in leveraged transactions. We have also committed to participate in limited partnerships that invest in leveraged transactions. Future commitments to participate in limited partnerships and other direct equity investments will continue to be made on a selective basis.

Trading Exposures

The following table summarizes our trading exposures to non-investment grade or highly leveraged corporate issuers or counterparties:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
ading assets:		
ash instruments	\$31,251	\$26,855
derivatives	9,317	9,661
ading liabilities — cash instruments	(4,164)	(4,034)

Table of Contents

Included in the preceding table are debt and equity securities and traded bank loans of companies in various stages of bankruptcy proceedings or in default. At June 29, 2007, the carrying value of such debt and equity securities totaled \$541 million, of which 31% resulted from our market-making activities in such securities. This compared with \$618 million at December 29, 2006, of which 49% related to market-making activities in such securities. Also included are distressed bank loans totaling \$150 million and \$219 million at June 29, 2007 and December 29, 2006, respectively.

Non-Trading Exposures

The following table summarizes our non-trading exposures to non-investment grade or highly leveraged corporate issuers or counterparties. This table excludes lending-related exposures which are included in the Credit Risk section of Risk Management:

(dollars in millions)

	June 29, 2007	Dec. 29, 2006
vestment securities	\$1,306	\$1,050
her investments ⁽¹⁾ :		
rtnership interests	6,304	4,913
her equity investments ⁽²⁾	4,079	4,238
her assets	889	618

(1) Includes a total of \$787 million and \$777 million in investments held by employee partnerships at June 29, 2007 and December 29, 2006, respectively, for which a portion of the market risk of the investments rests with the participating employees.

(2) Includes investments in 143 and 155 enterprises at June 29, 2007 and December 29, 2006, respectively.

In addition, we had commitments to non-investment grade or highly leveraged corporate issuers or counterparties of \$3.6 billion at June 29, 2007 and \$2.4 billion at December 29, 2006, which primarily relate to commitments to purchase loans to be held in inventory and commitments to invest in partnerships.

RECENT ACCOUNTING DEVELOPMENTS

In June 2007, the Accounting Standards Executive Committee of the AICPA issued Statement of Position 07-1, *Clarification of the Scope of the Audit and Accounting Guide Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies* ("SOP 07-1"). The intent of SOP 07-1 is to clarify which entities are within the scope of the AICPA Audit and Accounting Guide, *Investment Companies* (the "Guide"). For those entities that are investment companies under SOP 07-1, the SOP also addresses whether the specialized industry accounting principles of the Guide (referred to as "investment company accounting") should be retained by the parent company in consolidation or by an investor that has the ability to exercise significant influence over the investment company and applies the equity method of accounting to its investment in the entity. Under SOP 07-1, an investment company is generally defined as a separate legal entity whose business purpose and activity are investing in multiple substantive investments for current income, capital appreciation, or both, with investment plans that include exit strategies. The provisions of SOP 07-1 are effective for fiscal years beginning on or after December 15, 2007, with earlier application permitted. Entities that previously applied the provisions of the Guide, but that do not meet the provisions of SOP 07-1 to be an investment company within the scope of the Guide, must

Table of Contents

report the effects of adopting SOP 07-1 prospectively by accounting for their investments in conformity with applicable generally accepted accounting principles, other than investment company accounting, as of the date of adoption. Entities that are investment companies within the scope of the Guide, but that previously had not followed the provisions of the Guide, should report the cumulative effect of adopting SOP 07-1 as an adjustment to beginning retained earnings as of the beginning of the year in which SOP 07-1 is adopted. Merrill Lynch is currently evaluating the provisions of SOP 07-1 and is assessing its potential impact on the Condensed Consolidated Financial Statements.

In February 2007, the FASB issued SFAS No. 159, which provides a fair value option election that allows companies to irrevocably elect fair value as the initial and subsequent measurement attribute for certain financial assets and liabilities. Changes in fair value for assets and liabilities for which the election is made will be recognized in earnings as they occur. SFAS No. 159 permits the fair value option election on an instrument-by-instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007 provided that the entity makes that choice in the first 120 days of that fiscal year, has not yet issued financial statements for any interim period of the fiscal year of adoption, and also elects to apply the provisions of SFAS No. 157 (described below). We early adopted SFAS No. 159 in the first quarter of 2007. In connection with this adoption, management reviewed its treasury liquidity portfolio and determined that we should decrease our economic exposure to interest rate risk by eliminating long-term fixed rate assets from the portfolio and replacing them with floating rate assets. The fixed rate assets had been classified as available-for-sale and the unrealized losses related to such assets had been recorded in accumulated other comprehensive loss. As a result of the adoption of SFAS No. 159, the loss related to these assets was removed from accumulated other comprehensive loss and a loss of approximately \$185 million, net of tax, primarily related to these assets, was recorded as a cumulative-effect adjustment to beginning retained earnings, with no material impact to total stockholders' equity. Refer to Note 3 to the Condensed Consolidated Financial Statements for additional information.

In September 2006, the FASB issued SFAS No. 157. SFAS No. 157 defines fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the quality of inputs used to measure fair value and enhances disclosure about fair value measurements. SFAS No. 157 nullifies the guidance provided by EITF 02-3 that prohibits recognition of day one gains or losses on derivative transactions where model inputs that significantly impact valuation are not observable. In addition, SFAS No. 157 prohibits the use of block discounts for large positions of unrestricted financial instruments that trade in an active market and requires an issuer to incorporate changes in its own credit spreads when determining the fair value of its liabilities. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 with early adoption permitted provided that the entity has not yet issued financial statements for that fiscal year, including any interim periods. The provisions of SFAS No. 157 are to be applied prospectively, except that the provisions related to block discounts and existing derivative financial instruments measured under EITF 02-3 are to be applied as a one-time cumulative effect adjustment to opening retained earnings in the year of adoption. We early adopted SFAS No. 157 in the first quarter of 2007. The cumulative-effect adjustment to beginning retained earnings was an increase of approximately \$53 million, net of tax, primarily representing the difference between the carrying amounts and fair value of derivative contracts valued using the guidance in EITF 02-3. The impact of adopting SFAS No. 157 was not material to our Condensed Consolidated Statement of Earnings. Refer to Note 3 to the Condensed Consolidated Financial Statements for additional information.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132R* ("SFAS No. 158"). SFAS No. 158 requires an employer to recognize the overfunded or underfunded

Table of Contents

status of its defined benefit pension and other postretirement plans, measured as the difference between the fair value of plan assets and the benefit obligation as an asset or liability in its statement of financial condition. Upon adoption, SFAS No. 158 requires an entity to recognize previously unrecognized actuarial gains and losses and prior service costs within accumulated other comprehensive income (loss), net of tax. In accordance with the guidance in SFAS No. 158, we adopted this provision of the standard for year-end 2006. The adoption of SFAS No. 158 resulted in a net increase of \$65 million to accumulated other comprehensive loss recorded on the Consolidated Financial Statements at December 29, 2006. SFAS No. 158 also requires defined benefit plan assets and benefit obligations to be measured as of the date of the company's fiscal year-end. We have historically used a September 30 measurement date. Under the provisions of SFAS No. 158, we will be required to change our measurement date to coincide with our fiscal year-end. This provision of SFAS No. 158 will be effective for us in fiscal 2008. We are currently assessing the impact of adoption of this provision of SFAS No. 158 on the Condensed Consolidated Financial Statements.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109* ("FIN 48"). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. We adopted FIN 48 in the first quarter of 2007. The impact of the adoption of FIN 48 resulted in a decrease to beginning retained earnings and an increase to the liability for unrecognized tax benefits of approximately \$66 million. See Note 14 to the Condensed Consolidated Financial Statements for further information.

In March 2006, the FASB issued Statement No. 156, *Accounting for Servicing of Financial Assets* ("SFAS No. 156"). SFAS No. 156 amends Statement No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, to require all separately recognized servicing assets and servicing liabilities to be initially measured at fair value, if practicable. SFAS No. 156 also permits servicers to subsequently measure each separate class of servicing assets and liabilities at fair value rather than at the lower of amortized cost or market. For those companies that elect to measure their servicing assets and liabilities at fair value, SFAS No. 156 requires the difference between the carrying value and fair value at the date of adoption to be recognized as a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year in which the election is made. Prior to adoption of SFAS No. 156, we accounted for servicing assets and servicing liabilities at the lower of amortized cost or market. We adopted SFAS No. 156 on December 30, 2006. We have not elected to subsequently fair value those mortgage servicing rights ("MSR") held as of the date of adoption or those MSRs acquired or retained after December 30, 2006. The adoption of SFAS No. 156 did not have a material impact on the Condensed Consolidated Financial Statements.

In February 2006, the FASB issued Statement No. 155, *Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140* ("SFAS No. 155"). SFAS No. 155 clarifies the bifurcation requirements for certain financial instruments and permits hybrid financial instruments that contain a bifurcable embedded derivative to be accounted for as a single financial instrument at fair value with changes in fair value recognized in earnings. This election is permitted on an instrument-by-instrument basis for all hybrid financial instruments held, obtained, or issued as of the adoption date. At adoption, any difference between the total carrying amount of the individual components of the existing bifurcated hybrid financial instruments and the fair value of the combined hybrid financial instruments is recognized as a cumulative-effect adjustment to beginning retained earnings. We adopted SFAS No. 155 on a prospective basis beginning in the first quarter of 2007. Since SFAS No. 159 incorporates accounting and disclosure requirements that are similar to SFAS No. 155, we

apply SFAS No. 159, rather than SFAS No. 155, to our fair value elections for hybrid financial instruments.

Table of Contents

Merrill Lynch adopted the provisions of Statement No. 123 (revised 2004), *Share-Based Payment*, a revision of SFAS No. 123, *Accounting for Stock-Based Compensation* (“SFAS No. 123R”) as of the beginning of the first quarter of 2006. Under SFAS No. 123R, compensation expenses for share-based awards that do not require future service are recorded immediately, and share-based awards that require future service continue to be amortized into expense over the relevant service period. We adopted SFAS No. 123R under the modified prospective method whereby the provisions of SFAS No. 123R are generally applied only to share-based awards granted or modified subsequent to adoption. Thus, for Merrill Lynch, SFAS No. 123R required the immediate expensing of share-based awards granted or modified in 2006 to retirement-eligible employees, including awards that are subject to non-compete provisions.

Prior to the adoption of SFAS No. 123R, we had recognized expense for share-based compensation over the vesting period stipulated in the grant for all employees. This included those who had satisfied retirement eligibility criteria but were subject to a non-compete agreement that applied from the date of retirement through each applicable vesting period. Previously, we had accelerated any unrecognized compensation cost for such awards if a retirement-eligible employee left Merrill Lynch. However, because SFAS No. 123R applies only to awards granted or modified in 2006, expenses for share-based awards granted prior to 2006 to employees who were retirement-eligible with respect to those awards must continue to be amortized over the stated vesting period.

In addition, beginning with performance year 2006, for which we granted stock awards in January 2007, we accrued the expense for future awards granted to retirement-eligible employees over the award performance year instead of recognizing the entire expense related to the award on the grant date.

Compensation expense for 2006 performance year and all future stock awards granted to employees not eligible for retirement with respect to those awards will be recognized over the applicable vesting period. SFAS No. 123R also requires expected forfeitures of share-based compensation awards for non-retirement-eligible employees to be included in determining compensation expense. Prior to the adoption of SFAS No. 123R, any benefits of employee forfeitures of such awards were recorded as a reduction of compensation expense when the employee left Merrill Lynch and forfeited the award. In the first quarter of 2006, we recorded a benefit based on expected forfeitures which was not material to the results of operations for the quarter.

The adoption of SFAS No. 123R resulted in a charge to compensation expense of approximately \$550 million on a pre-tax basis and \$370 million on an after-tax basis in the first quarter of 2006.

The adoption of SFAS No. 123R, combined with other business and competitive considerations, prompted us to undertake a comprehensive review of our stock-based incentive compensation awards, including vesting schedules and retirement eligibility requirements, examining their impact to both Merrill Lynch and its employees. Upon the completion of this review, the Management Development and Compensation Committee of Merrill Lynch’s Board of Directors determined that to fulfill the objective of retaining high quality personnel, future stock grants should contain more stringent retirement provisions. These provisions include a combination of increased age and length of service requirements. While the stock awards of employees who retire continue to vest, retired employees are subject to continued compliance with the strict non-compete provisions of those awards. To facilitate transition to the more stringent future requirements, the terms of most outstanding stock awards previously granted to employees, including certain executive officers, were modified, effective March 31, 2006, to permit employees to be immediately eligible for retirement with respect to those earlier awards. While we modified the retirement-related provisions of the previous stock awards, the vesting and non-compete provisions for those awards remain in force.

Table of Contents

Since the provisions of SFAS No. 123R apply to awards modified in 2006, these modifications required us to record additional one-time compensation expense in the first quarter of 2006 for the remaining unamortized amount of all awards to employees who had not previously been retirement-eligible under the original provisions of those awards.

The one-time, non-cash charge associated with the adoption of SFAS No. 123R, and the policy modifications to previous awards resulted in a net charge to compensation expense in the first quarter of 2006 of approximately \$1.8 billion pre-tax, and \$1.2 billion after-tax, or a net impact of \$1.34 and \$1.21 on basic and diluted earnings per share, respectively. Policy modifications to previously granted awards amounted to \$1.2 billion of the pre-tax charge and impacted approximately 6,300 employees.

Prior to the adoption of SFAS No. 123R, we presented the cash flows related to income tax deductions in excess of the compensation expense recognized on share-based compensation as operating cash flows in the Consolidated Statements of Cash Flows. SFAS No. 123R requires cash flows resulting from tax deductions in excess of the grant-date fair value of share-based awards to be included in cash flows from financing activities. The excess tax benefits of \$283 million related to total share-based compensation included in cash flows from financing activities in the first quarter of 2006 would have been included in cash flows from operating activities if we had not adopted SFAS No. 123R.

As a result of adopting SFAS No. 123R, approximately \$600 million of liabilities associated with the Financial Advisor Capital Accumulation Award Plan ("FACAAP") were reclassified to stockholders' equity. In addition, as a result of adopting SFAS No. 123R, the unamortized portion of employee stock grants, which was previously reported as a separate component of stockholders' equity on the Consolidated Balance Sheets, has been reclassified to Paid-in capital.

In June 2005, the FASB ratified the consensus reached by the Emerging Issues Task Force on Issue 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights* ("EITF 04-5"). EITF 04-5 presumes that a general partner controls a limited partnership, and should therefore consolidate a limited partnership, unless the limited partners have the substantive ability to remove the general partner without cause based on a simple majority vote or can otherwise dissolve the limited partnership, or unless the limited partners have substantive participating rights over decision making. The guidance in EITF 04-5 was effective beginning in the third quarter of 2005 for all new limited partnership agreements and any limited partnership agreements that were modified. For those partnership agreements that existed at the date EITF 04-5 was issued, the guidance became effective in the first quarter of 2006. The adoption of this guidance did not have a material impact on the Condensed Consolidated Financial Statements.

(1) GWM net new money excludes flows associated with the Institutional Advisory Division which serves certain small-and middle-market companies, as well as net inflows at BlackRock from distribution channels other than Merrill Lynch.					
(2) Includes both net new client assets into annuitized-revenue products, as well as existing client assets transferred into annuitized-revenue products.					
(3) Excludes 300 full-time employees on salary continuation severance at the end of 2Q06, 200 at the end of 3Q06, 100 at the end of 4Q06, 200 at the end of 1Q07 and 300 at the end of 2Q07.					
(4) Excludes 2,400 MLIM employees that transferred to BlackRock at the end of 3Q06.					
(5) Includes 140 Financial Advisors associated with the Mitsubishi UFJ joint venture at the end 2Q06, 150 at the end of 3Q06 and 4Q06, 160 at the end of 1Q07 and 170 at the end of 2Q07.					

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information under the caption Item 2. “Management’s Discussion and Analysis of Financial Condition and Results of Operations — Risk Management” above in this Report is incorporated herein by reference.

Item 4. Controls and Procedures

ML & Co.’s Disclosure Committee assists with the monitoring and evaluation of our disclosure controls and procedures. ML & Co.’s Chief Executive Officer, Chief Financial Officer and Disclosure Committee have evaluated the effectiveness of ML & Co.’s disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Report. Based on that evaluation, ML & Co.’s Chief Executive Officer and Chief Financial Officer have concluded that ML & Co.’s disclosure controls and procedures are effective.

In addition, no change in ML & Co.’s internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the second fiscal quarter of 2007 that has materially affected, or is reasonably likely to materially affect, ML & Co.’s internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

The following information supplements the discussion in Part I, Item 3 “Legal Proceedings” in ML & Co.’s Annual Report on Form 10-K for the fiscal year ended December 29, 2006 and ML & Co.’s Quarterly Report on Form 10-Q for the quarter ended March 30, 2007:

IPO Allocation Litigation

In re Initial Public Offering Antitrust Litigation: On June 18, 2007, the United States Supreme Court ruled in defendants’ favor and held that the claims in this case, all of which were brought under the antitrust laws, should have been dismissed because they were preempted by the federal securities laws.

Short Sales Litigation

Overstock.com, Inc. v. Morgan Stanley & Co., et al and *Avenius v. Banc of America Securities LLC, et al:* On July 17, 2007, the Superior Court of the State of California, County of San Francisco, rejected defendants’ argument that state law claims of facilitating improper short sales were preempted by the federal securities laws. The court did not rule on the substance of the underlying claims. The defendants, including Merrill Lynch, are vigorously defending themselves against the claims.

Parmalat Litigation

In June 2007, Merrill Lynch agreed to pay \$39 million to settle, without any finding or admission of liability, all outstanding claims with Parmalat in connection with its 2003 bankruptcy.

[Table of Contents](#)

Other

Merrill Lynch has been named as a defendant in various other legal actions, including arbitrations, class actions, and other litigation arising in connection with its activities as a global diversified financial services institution. Some of the legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. In some cases, the issuers that would otherwise be the primary defendants in such cases are bankrupt or otherwise in financial distress. Merrill Lynch is also involved in investigations and/or proceedings by governmental and self-regulatory agencies.

Merrill Lynch believes it has strong defenses to, and where appropriate, will vigorously contest, many of these matters. Given the number of these matters, some are likely to result in adverse judgments, penalties, injunctions, fines, or other relief. Merrill Lynch may explore potential settlements before a case is taken through trial because of the uncertainty, risks, and costs inherent in the litigation process. In accordance with SFAS No. 5, Merrill Lynch will accrue a liability when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. In many lawsuits and arbitrations, including the class action lawsuits disclosed in ML & Co.'s public filings, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case no accrual is made until that time. In view of the inherent difficulty of predicting the outcome of such matters, particularly in cases in which claimants seek substantial or indeterminate damages, Merrill Lynch cannot predict what the eventual loss or range of loss related to such matters will be. Subject to the foregoing, Merrill Lynch continues to assess these cases and believes, based on information available to it, that the resolution of these matters will not have a material adverse effect on the financial condition of Merrill Lynch as set forth in the Consolidated Financial Statements, but may be material to Merrill Lynch's operating results or cash flows for any particular period and may impact ML & Co.'s credit ratings

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, "Item 1A. Risk Factors" in the Annual Report on Form 10-K for the year ended December 29, 2006, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing Merrill Lynch. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

[Table of Contents](#)

Item 2. Unregistered Sales of Equity Securities, Use of Proceeds and Issuer Purchases of Equity Securities

The table below sets forth the information with respect to purchases made by or on behalf of Merrill Lynch or any “affiliated purchaser” of Merrill Lynch’s common stock during the quarter ended June 29, 2007.

(dollars in millions, except per share amounts)

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program⁽¹⁾	Approximate Dollar Value of Shares that May Yet be Purchased Under the Program
Month #1 (Mar. 31, 2007 – May 4, 2007)				
Capital Management Program	9,758,950	\$89.07	9,758,950	\$6,374
Employee Transactions ⁽²⁾	360,379	\$87.63	N/A	N/A
Month #2 (May 5, 2007 – Jun. 1, 2007)				
Capital Management Program	9,290,910	\$92.77	9,290,910	\$5,512
Employee Transactions ⁽²⁾	139,077	\$93.00	N/A	N/A
Month #3 (Jun. 2, 2007 – Jun. 29, 2007)				
Capital Management Program	752,234	\$91.59	752,234	\$5,443
Employee Transactions ⁽²⁾	510,717	\$86.74	N/A	N/A
Second Quarter 2007 (Mar. 31, 2007 – Jun. 29, 2007)				
Capital Management Program	19,802,094	\$90.90	19,802,094	\$5,443
Employee Transactions ⁽²⁾	1,010,173	\$87.92	N/A	N/A

(1) Share repurchases under the program were made pursuant to open-market purchases, Rule 10b5-1 plans or privately negotiated transactions as market conditions warranted and at prices Merrill Lynch deemed appropriate.

(2) Included in the total number of shares purchased are: (1) shares purchased during the period by participants in the Merrill Lynch 401(k) Savings and Investment Plan (“401(k)”) and the Merrill Lynch Retirement Accumulation Plan (“RAP”), (2) shares delivered or attested to in satisfaction of the exercise price by holders of ML & Co. employee stock options (granted under employee stock compensation plans) and (3) Restricted Shares withheld (under the terms of grants under employee stock compensation plans) to offset tax withholding obligations that occur upon vesting and release of Restricted Shares. ML & Co.’s employee stock compensation plans provide that the value of the shares delivered or attested, or withheld, shall be the average of the high and low price of ML & Co.’s common stock (Fair Market Value) on the date the relevant transaction occurs. See Notes 13 and 14 of the 2006 Annual Report for additional information on these plans.

[Table of Contents](#)

Item 4. Submission of Matters to a Vote of Security Holders

On April 27, 2007, ML & Co. held its Annual Meeting of Shareholders. Further details concerning matters submitted for shareholders' vote can be found in ML & Co.'s Quarterly Report on Form 10-Q for the quarterly period ended March 30, 2007.

Item 6. Exhibits

An exhibit index has been filed as part of this report and is incorporated herein by reference.
