I heard there was massive short selling; CFC traded more than 100 million shares today. I don't think there is any chance IMB will go out of business, far more liquidity here than at CFC. In any case the stock will be a good buy at 17. !

Hi Tom – another rough day for the market. I see that IMB and CFC have dropped in after hours trading; does that mean we are in for another drop tomorrow?

Yikes.....

Best regards,

Lisa
