The rating actions reflect deterioration in the credit quality of the underlying portfolio, as well as the occurrence on April 7, 2008, as reported by the Trustee, of an event of default caused by a default in the payment of accrued interest on the Class B Notes and Class C Notes, as described in Section 5.1(a) of the Indenture dated March 28, 2007.

As provided in Article V of the Indenture during the occurrence and continuance of an Event of Default, certain parties to the transaction may be entitled to direct the Trustee to take particular actions with respect to the Collateral Debt Securities and the Notes.

The rating downgrades taken today reflect the increased expected loss associated with each tranche. Losses are attributed to diminished credit quality on the underlying portfolio. The severity of losses of certain tranches may be different, however, depending on the timing and choice of remedy to be pursued following the default event. Because of this uncertainty, the ratings assigned to the Class A-1 Notes remain on review for possible further action.

Maxim High Grade CDO II, Ltd. is a collateralized debt obligation backed primarily by a portfolio of Structured Finance securities.
