- (1) the Formula Rate
- (2) the related Net WAC Cap for that Distribution Date
$>$ The Formula Rate for the Class A and Class M Certificates is as follows:
- On or prior to the Optional Termination Date: The lesser of (i) 1-Month LIBOR plus a margin which will be set at pricing for the Class A and Class M Certificates and (ii) the related maximum cap rate.

Prior to the Stepdown Date or if a Trigger Event occurs, the Class A Certificates will receive ALL of the principal collected on the related mortgage loans plus any Excess Interest from the mortgage loans required to build to or maintain the Targeted Overcollateralization Amount.

On or after the Stepdown Date and assuming no Trigger Event is in effect, principal distributed to the Class A Certificates will be an amount such that the Class A Certificates will have approximately [44.30]\% of the current principal balance of the related Mortgage Loans as credit enhancement (which is 2 x the initial credit support).

The Class M Certificates will NOT receive any principal distributions prior to the Stepdown Date, or if a Trigger Event occurs, unless the aggregate certificate principal balance of the Class A Certificates is reduced to zero.

Thereafter (assuming no Trigger Event is in effect), principal will be shared among the Class M Certificates to maintain, in each case, approximately $2 x$ their respective initial credit support.
